Ivan Valbusa

The biblatex-philosophy bundle

v1.9.8g – 2022/09/16

The serif typeface is Cochineal, created by Michael Sharpe on the basis of Sebastian Kosch's Crimson. The `typewriter` font is Inconsolata, designed by Raph Levien and the sans serif text is typeset in Linux Biolinum, created by Philipp H. Poll.

User's guide to biblatex-philosophy

Bibliography styles for (Italian) users of biblatex

v1.9.8g – 2022/09/16

Ivan Valbusa

ivan dot valbusa at gmail dot com

Abstract

This bundle provides a small collection of bibliography and citation styles for use with Philipp Lehman's biblatex package. The styles try to be language-indipendent but their prime aim is to match the needs of the Italian writers, particularly those concerned in the humanities. They offer useful features to compose detailed bibliographic entries including the translation data of foreign texts, annotations etc. Many options allow you to change the style defaults. Only the Italian, English, Spanish and French localizations are available for now but you can use the styles with all the languages supported by babel or polyglossia adding simple redefinitions.

Contents

1 Usage **4**

2 The styles **4**
- 2.1 philosophy-classic . . 5
- 2.2 philosophy-modern . . . 5
- 2.3 philosophy-verbose . . 6

3 Specialities 7
- 3.1 Related entries 7
- 3.2 Cross references 9
- 3.3 Classical works 11

4 New fields **12**

5 New citation commands **13**

6 New options **14**
- 6.1 Global 14
- 6.2 For classic/modern styles 17
- 6.3 For modern style 17
- 6.4 For verbose style 17

7 Customizations **17**
- 7.1 Fonts 18
- 7.2 Punctuation 18
- 7.3 Lengths 18
- 7.4 Languages 19

8 Backward compatibility **20**
- 8.1 Deprecated fields 20
- 8.2 Deprecated options 21

9 Known issues **22**

Examples **22**

10 The Code **34**
- 10.1 philosophy-standard.bbx 34
- 10.2 philosophy-verbose.bbx 70
- 10.3 philosophy-classic.bbx 79
- 10.4 philosophy-modern.bbx 87
- 10.5 Bibliography drivers 91
- 10.6 philosophy-verbose.cbx 92
- 10.7 philosophy-classic.cbx 94

10.8 philosophy-modern.cbx 101
10.9 italian-philosophy.lbx 101
10.10 english-philosophy.lbx 107
10.11 spanish-philosophy.lbx 107
10.12 french-philosophy.lbx 108
References **109**

A brief history

The firs step toward the creation of the philosophy-modern style was the request of Lorenzo Pantieri in the GUIT Forum at http://www.guit.sssup.it/phpbb/viewtopic.php?t=6472 (See the discussion on http://www.guit.sssup.it/phpbb/viewtopic.php?t=6717.) Now this is the bibliography style of *L'arte di scrivere con LaTeX*, the most popular Italian guide to LaTeX (Pantieri and Gordini 2019).

Acknowledgments

I would like to thank all those who took part in the debate on GUIT website and the authors of the styles which inspired biblatex-philosophy, specifically: Dominik Waßenhoven (2016), James Clawson (2016) and Sander Gliboff (2010). Last but not least, a special thank to Philipp Lehman (2019) for his fundamental package and to current developers, Philip Kime, Audrey Boruvka and Joseph Wright.

1 Usage

The styles can be loaded as usual, but to ensure language-specific quotation marks you need babel (or polyglossia) and csquotes (see Braams 2020; Charette 2020; Lehman and Wright 2019). biber in place of BibTeX is also required as backend bibliography processor (Kime and Charette 2019). The example below shows a typical code for an Italian document. Replace ⟨*style*⟩ with classic, modern or verbose, and ⟨*bibfile*⟩ with the name of your bibliography database ("`.bib`" must be declared). For other languages you can choose to use or not the Italian-style quotation marks provided by csquotes.

```
\usepackage[italian]{babel}
\usepackage[style=italian]{csquotes}
\usepackage[style=philosophy-⟨style⟩]{biblatex}
  \addbibresource{⟨bibfile⟩.bib}
```

To uniform the style of quotation marks in multilingual bibliographies typeset using the autolang=other option, you can use the \DeclareQuoteAlias command. For example:

```
\DeclareQuoteAlias[italian]{german}
```

2 The styles

This bundle provides two author-year styles (philosophy-classic and philosophy-modern) and a verbose style (philosophy-verbose). The first simple and trivial characteristic of

these style is that they use commas instead of dots to separate the parts of the entry, according to the most common Italian tradition. But they do much more, of course. The other features, some of which are style-dependent, are described in the next sections and can be easily examined looking at the examples at the end of this documentation or typesetting the example files in the TEX Live folder `texmf-dist/doc/latex/biblatex-philosophy/examples.zip`.

Note that `biblatex` adopts by default a very rational criterion for the ordering of the list of names in multi-authors/editors entries. Only for the first author/editor the surname precedes the name while the other authors/editors are typeset in the form "Name Surname" (e.g. "Eco, Umberto and Gianni Vattimo"). The Italian (academic) writers often see this feature like a sort of inconsistency. Actually it is inconsistent to typeset all the authors in the form "Surname, Name" when this is useless.

2.1 The `philosophy-classic` style

The `classic` style is a standard author-year style associated to a compact citation scheme which allows to cite multiple entries of the same author and/or published in the same year, omitting some redundant informations. It is based on `authoryear-comp`:

Knuth (1984, 1986a,b,c,d)

A `classic` bibliography is shown below. You can change indentation, horizontal and vertical space between entries and between blocks or groups of entries. The dash can be replaced by the author's label via the `dashed=false` option and you can have brackets in place of parentheses as well. See the `biblatex` documentation and section 7.3.

The `philosophy-classic` bibliography

Donald E. Knuth (1984-1986), *Computers & Typesetting*, 5 vols., Addison-Wesley.
— (1984) *Computers & Typesetting*, vol. A: *The TEXbook*, Addison-Wesley.
— (1986a) *Computers & Typesetting*, vol. B: *TEX: The Program*, Addison-Wesley.
— (1986b) *Computers & Typesetting*, vol. C: *The METAFONTbook*, Addison-Wesley.
— (1986c) *Computers & Typesetting*, vol. D: *METAFONT: The Program*, Addison-Wesley.
— (1986d) *Computers & Typesetting*, vol. E: *Computer Modern Typefaces*, Addison-Wesley.

2.2 The `philosophy-modern` style

The `modern` style uses the "classic" citation scheme but produces a fancy bibliography divided into blocks, which is particularly suited for bibliographies with many entries for the same author. This kind of structure is adopted by many Italian publisher, for example Einaudi, and it is particularly loved by Umberto Eco, who recommends it in his Italian bestseller (Eco 1977). You can change the distance between year and title and, of course, all the common features with the `classic` style. Here is an example of a `modern` bibliography:

The `philosophy-modern` bibliography

Knuth, Donald E.
1984 *Computers & Typesetting*, vol. A: *The TEXbook*, Addison-Wesley.

1986a *Computers & Typesetting*, vol. B: *TEX: The Program*, Addison-Wesley.
1986b *Computers & Typesetting*, vol. C: *The METAFONTbook*, Addison-Wesley.
1986c *Computers & Typesetting*, vol. D: *METAFONT: The Program*, Addison-Wesley.

Nietzsche, Friedrich
1988a *Sämtliche Werke. Kritische Studienausgabe*, ed. by Giorgio Colli and Mazzino Montinari, 2nd ed., 15 vols., Deutscher Taschenbuch-Verlag and Walter de Gruyter, München, Berlin, and New York.
1988b *Sämtliche Werke. Kritische Studienausgabe*, vol. 1: *Die Geburt der Tragödie. Unzeitgemäße Betrachtungen I-IV. Nachgelassene Schriften 1870-1973*, ed. by Giorgio Colli and Mazzino Montinari, 2nd ed., Deutscher Taschenbuch-Verlag and Walter de Gruyter, München, Berlin, and New York.
1988c "Unzeitgemässe Betrachtungen. Zweites Stück. Vom Nutzen und Nachtheil der Historie für das Leben", in *Sämtliche Werke. Kritische Studienausgabe*, vol. 1: *Die Geburt der Tragödie. Unzeitgemäße Betrachtungen I-IV. Nachgelassene Schriften 1870-1973*, ed. by Giorgio Colli and Mazzino Montinari, Deutscher Taschenbuch-Verlag and Walter de Gruyter, München, Berlin, and New York, p. 243-334.

Van Gennep, Arnold
1909a *Les rites de passage*, Nourry, Paris.
1909b *Les rites de passage*, Nourry, Paris; trans. by Monika B. Vizedom and Gabrielle L. Caffee as *The Rites of Passage* (University of Chicago Press, 1960).
1960 The Rites of Passage, trans. from the French by Monika B. Vizedom and Gabrielle L. Caffee, University of Chicago Press.

2.3 The `philosophy-verbose` style

This style is aimed for citations given in the footnotes and follows the most popular scheme used in the Italian humanities. It prints a full citation similar to a bibliography entry when an item is cited for the first time, and a short citation afterwards, using the title (possibly shortened in the `shorttitle` field), followed by the string "cit.". Citing the same entry two times, in the second one the string "Ivi" ("Ibid." for English and French documents) is used; citing the same place of the previous citation you will have "Ibidem" ("Ibid." for English and French documents):

Italian `philosophy-verbose` citation scheme

[1] Arthur Hyman (1981), "Aristotle's Theory of the Intellect and its Interpretation by Averroes", in *Studies in Aristotle*, ed. by Dominic J. O'Meara, Studies in Philosophy and the History of Philosophy, 9, The Catholic University of America Press, Washington, D.C., pp. 161-191, p. 43.
[2] Ivi, p. 26.
[3] Ibidem.
[4] Martin Heidegger (2001), *Sein und Zeit*, 18th ed., Max Niemeyer Verlag, Tübingen. Originally published in 1927 in the *Jahrbuch für Philosophie und phänomenologische Forschung (vol. VIII)*, directed by H. Husserl.

[5] Hyman, «Aristotle's Theory of the Intellect» cit, p. 179.

English philosophy-verbose citation scheme

[1] Jules-Henri Poincaré (1968), *La science et l'hypothèse*, Flammarion, Paris; trans. *La scienza e l'ipotesi*, ed. by Corrado Sinigaglia, testo greco a fronte, Bompiani, Milano 2003, p. 43.
[2] Ibid., p. 26.
[3] Ibid.
[4] Martin Heidegger (2001), *Sein und Zeit*, 18th ed., Max Niemeyer Verlag, Tübingen. Originally published in 1927 in the *Jahrbuch für Philosophie und phänomenologische Forschung (vol. VIII)*, directed by H. Husserl.
[5] Poincaré, *La science et l'hypothèse* cit., p. 35.

When there is only one entry for the same author, with the `singletitle=true` option the string "op. cit." is used instead of the (short) title followed by "cit.":

[6] Heidegger, op. cit., p. 35.

All the scholarly abbreviations but "cit." are printed by default in normal font. With the `latinemph` option you can get them in italic shape (section 6.4).

A `verbose` bibliography is similar to a `classic` bibliography but with the year placed at the end of the entry:

The philosophy-verbose bibliography

Donald E. Knuth, *Computers & Typesetting*, 5 vols., Addison-Wesley, 1984-1986.
— *Computers & Typesetting*, vol. A: *The TEXbook*, Addison-Wesley, 1984.
— *Computers & Typesetting*, vol. B: *TEX: The Program*, Addison-Wesley, 1986.
— *Computers & Typesetting*, vol. C: *The METAFONTbook*, Addison-Wesley, 1986.
— *Computers & Typesetting*, vol. D: *METAFONT: The Program*, Addison-Wesley, 1986.
— *Computers & Typesetting*, vol. E: *Computer Modern Typefaces*, Addison- Wesley, 1986.

3 Specialities

3.1 Related entries

The `philosophy` styles use the mechanism provided by the `related` field to typeset complex entries comprising both the original publication data and the translation data (see Poincaré 1968). The related entry is preceded by the `translationas` string which defaults to "trad. it.", "trans.", "trad. es." and "trad." for Italian, English, Spanish and French documents, respectively. If you want to change it, use the `relatedstring` field, like in Popper (1934) which shows, among others, an entry with cascading relations.

Jules-Henri Poincaré (1968), *La science et l'hypothèse*, Flammarion, Paris; trans. *La scienza e l'ipotesi*, ed. by Corrado Sinigaglia, testo greco a fronte, Bompiani, Milano 2003.

```
@book{Poincare:1968-ORIG,
  author    = {Jules-Henri Poincaré},
  title     = {La science et l'hypothèse},
  publisher = {Flammarion},
  location  = {Paris},
  date      = {1968},
  related   = {Poincare:1968-ITA}}

@book{Poincare:1968-ITA,
  author    = {Jules-Henri Poincaré},
  editor    = {Corrado Sinigaglia},
  title     = {La scienza e l'ipotesi},
  publisher = {Bompiani},
  location  = {Milano}}
```

Karl R. Popper (1934), *Logik der Forschung*, Springer, Wien; trans. *The Logic of Scientific Discovery*, 3rd ed., Hutchinson, London 1959; it. trans. *Logica della scoperta scientifica*, 3rd ed., Einaudi, Torino 1998.

```
@book{popper-logik,
  title     = {Logik der Forschung},
  publisher = {Springer},
  author    = {Karl R. Popper},
  date      = {1934},
  location  = {Wien},
  related   = {popper-logik:ing}}

@book{popper-logik:ing,
  title         = {The Logic of Scientific Discovery},
  publisher     = {Hutchinson},
  author        = {Karl R. Popper},
  edition       = {3},
  date          = {1959},
  location      = {London},
  related       = {popper-logik:ita},
  relatedstring ={it\adddotspace trans\adddot}}

@book{popper-logik:ita,
  title     = {Logica della scoperta scientifica},
  publisher = {Einaudi},
  author    = {Karl R. Popper},
  edition   = {3},
  date      = {1998},
  location  = {Torino}}
```

3.2 Cross references

The philosophy styles allow you to manage entries referring to other entries via the crossref field. This is very useful when you have to cite two or more @incollection of the same @collection (see Chatelain and Slusser 2000; Westfahl 2000a). In this way the @collection is printed in the bibliography and it is cross-referenced inside the @incollection, using the corresponding author-year label (the mechanism is the same for @inbook items).

Westfahl, Gary (2000b), «The True Frontier. Confronting and Avoiding the Realities of Space in American Science Fiction Films», in Westfahl (2000a), p. 55-65.

Chatelain, Daniele e George Slusser (2000), «Flying to the Moon in French and American Science Fiction», in Westfahl (2000a), p. 25-33.

Westfahl, Gary (a cura di) (2000a), *Space and Beyond. The Frontier Theme in Science Fiction*, Greenwood, Westport, Conn. e London.

```
@collection{westfahl:frontier,
  editor       = {Westfahl, Gary},
  title        = {Space and Beyond},
  date         = {2000},
  subtitle     = {The Frontier Theme in Science Fiction},
  publisher    = {Greenwood},
  location     = {Westport, Conn. and London},
  booktitle    = {Space and Beyond},
  booksubtitle = {The Frontier Theme in Science Fiction}}

@incollection{westfahl:flying,
  author       = {Daniele Chatelain and George Slusser},
  title        = {Flying to the Moon in French and American
                  Science Fiction},
  pages        = {25-33},
  crossref     = {westfahl:frontier}}

@incollection{westfahl:space,
  author       = {Westfahl, Gary},
  title        = {The True Frontier},
  subtitle     = {Confronting and Avoiding the Realities of Space in
                  {American} Science Fiction Films},
  pages        = {55-65},
  crossref     = {westfahl:frontier}}
```

When you have to cite *only one* @incollection of a single @collection you have three choices.

1. Use the crossref field (see Termini 2007). In this case all the @collection data are automatically printed inside the @incollection entry:

Settimo Termini (2007), "Vita morte e miracoli di Alan Mathison Turing", in *Vite matematiche. Protagonisti del '900 da Hilbert a Wiles*, ed. by Claudio Bartocci et al., Springer-Verlag Italia, Milano.

```
@incollection{Termini:2007,
  author   = {Settimo Termini},
  title    = {Vita morte e miracoli di Alan Mathison Turing},
  crossref = {Bartocci:2007}}

@collection{Bartocci:2007,
  title         = {Vite matematiche},
  booktitle     = {Vite matematiche},
  booksubtitle  = {Protagonisti del '900 da Hilbert a Wiles},
  editor        = {Claudio Bartocci and Renato Betti and Angelo Guerraggio
                   and Roberto Lucchetti},
  publisher     = {Springer-Verlag Italia},
  location      = {Milano},
  date          = {2007}}
```

2. Put the `@collection` data in the fields of the `@incollection` entry (see Hyman 1981). In this case the `@incollection` is self-contained:

Arthur Hyman (1981), "Aristotle's Theory of the Intellect and its Interpretation by Averroes", in *Studies in Aristotle*, ed. by Dominic J. O'Meara, Studies in Philosophy and the History of Philosophy, 9, The Catholic University of America Press, Washington, D.C., pp. 161-191.

```
@incollection{hyman,
  author       = {Arthur Hyman},
  editor       = {O'Meara, Dominic J.},
  title       = {Aristotle's Theory of the Intellect and its Interpretation
                 by {Averroes}},
  date         = {1981},
  booktitle    = {Studies in {Aristotle}},
  series       = {Studies in Philosophy and the History of Philosophy},
  number       = {9},
  publisher    = {The Catholic University of America Press},
  location     = {Washington, D.C.},
  pages        = {161-191}}
```

3. Put the `@collection` data in the fields of the `@incollection` entry and put the `@collection` label in the `xref` field of the `@incollection` (see Kant 1968b [henceforth cited as KpV]; Kant 1968d):

Immanuel Kant (1968a), *Kants Werke. Akademie Textausgabe*, 9 vols., Walter de Gruyter, Berlin.
— (1968b), *Kritik der praktischen Vernunft*, in Kant (1968a), vol. 5, p. 1-163.
— (1968c), *Kritik der Urtheilskraft*, in Kant (1968a), vol. 5, p. 165-485.

```
@bookinbook{kant:kpv:xref,
  author     = {Kant, Immanuel},
  title      = {Kritik der praktischen Vernunft},
  shorttitle = {Kritik der praktischen Vernunft},
  volume     = {5},
  pages      = {1-163},
  date       = {1968},
  xref       = {kant:werke}}

@bookinbook{kant:ku:xref,
  author = {Kant, Immanuel},
  title  = {Kritik der Urtheilskraft},
  volume = {5},
  pages  = {165-485},
  date   = {1968},
  xref   = {kant:werke}}

@mvbook{kant:werke,
  author    = {Kant, Immanuel},
  title     = {Kants Werke. Akademie Textausgabe},
  maintitle = {Kants Werke. Akademie Textausgabe},
  booktitle = {Kants Werke. Akademie Textausgabe},
  volumes   = {9},
  publisher = {Walter de Gruyter},
  location  = {Berlin},
  date      = {1968}}
```

With the `verbose` style, when citing `@incollection`s entries, the data of the `@collection` are printed entirely in the first citation and shortened afterwards. Anyway in the final bibliography the `@incollection` is always complete of all the informations about the corresponding `@collection`.

3.3 Classical works

The treatment of classical works (a fuzzy concept) and other writings with uncertain or omitted date is not particularly difficult if you use the `verbose` style, but with the `classic` and `modern` styles some difficulties inevitably impose clear choices.

If a critical edition (or similar) exists you should cite it directly, such as Heidegger (2001). If you do not like this "anachronistic" label you may use the `shorthand` field, such as KpV. Note that a "shorthand intro" is automatically printed when the entry is cited for the first time (see p. 10) and omitted afterwards. To turn off this feature load the option `shorthandintro=false`. Of course in this case you will need a list of shorthands. If you do not like these solutions you

can use the `entrysubtype` or the `\sdcite` command in order to get an author-title citation, such as Aristotle, *Nich. Ethics* (see sections 4 and 5).

Anyway remember that every citation label is *merely* a label and it does not affect in any way the object or the subject it refers to. The label "Plato 1978" simply means "the entry in the bibliography which is alphabetized under the name 'Plato' and the year '1978'". All the information about the *object* (in this case a book or a collection of writings) will be retrieved in the bibliography entry.

4 New fields

`nameaddon` field (literal)

An addon to be printed immediately after the author name in the bibliography. It is useful for those author known with alias, Latinized names, etc. For example Komensky (1969):

Komensky, Jan Amos [Comenius] (1969), *Opera Omnia*, Praga.

```
@mvbook{comenio:oo,
  author    = {Jan Amos Komensky},
  nameaddon = {Comenius},
  title     = {Opera Omnia}
  location  = {Praga},
  date      = {1969}}
```

`entrysubtype` field (literal) [`philosophy-classic` and `philosophy-modern` only]

With the `classic` value the citation commands will produce an author-title label. This is useful for citing works from classical antiquity.

This topic is examined in Aristotle, *Nich. Ethics* and in Rogers (2015).

```
@book{aristotle:ethics,
  entrysubtype = {classic},
  author       = {Aristotle},
  title        = {Nichomachean Ethics},
  ...
 }
```

In the bibliography the entry is printed with the author-year label, but with the `skipbib` option in the `options` field you can exclude it from the bibliography.

`library` field (literal)

This field is printed at the end of the entry, in a new period. It is aimed for secondary informations such as the location of the texts, historical notes, etc. For example Heidegger (2001):

Heidegger, Martin (2001), *Sein und Zeit*, 18th ed., Max Niemeyer Verlag, Tübingen.
Originally published in 1927 in the *Jahrbuch für Philosophie und phänomenologische Forschung (vol. VIII)*, directed by H. Husserl.

```
@book{heidegger:sz,
  author    = {Martin Heidegger},
  title     = {Sein und Zeit},
  edition   = {18},
  publisher = {Max Niemeyer Verlag},
  location  = {Tübingen},
  date      = {2001},
  library   = {Originally published in 1927 in the \emph{Jahrbuch für
               Philosophie und phänomenologische Forschung (vol. VIII)},
               directed by H. Husserl}}
```

`annotation` field (literal)

This field is printed in a new paragraph at the very end of the entry. It requires the `annotation` option. The default font can be changed redefining the `\annotationfont` command (section 7):

Philipp Lehman [with Philip Kime and Moritz Wemheuer] (2019), *The* `biblatex` *Package. Programmable Bibliographies and Citations*, version 3.14, Dec. 1, 2019, `http://mirrors.ctan.org/macros/latex/contrib/biblatex/doc/biblatex.pdf`.
This package provides advanced bibliographic facilities for use with LaTeX. The package is a complete reimplementation of the bibliographic facilities provided by LaTeX. The `biblatex` package works with the "backend" (program) `biber`, which is used to process BibTeX format data files and them performs all sorting, label generation.

```
@online{lehman:biblatex,
  author     = {Philipp Lehman},
  title      = {The \texttt{biblatex} Package},
  subtitle   = {Programmable Bibliographies and Citations},
  version    = {3.7},
  date       = {2016-11-16},
  annotation = {This package provides advanced bibliographic facilities
                for use with \LaTeX. The package is a complete
                reimplementation of the bibliographic facilities provided
                by \LaTeX. The \texttt{biblatex} package works with the
                "backend" (program) \texttt{biber}, which is used to
                process \textsc{Bib}\TeX{} format data files and them
                performs all sorting, label generation.}}
```

5 New citation commands

`\sdcite`{⟨*key*⟩} [`philosophy-classic` and `philosophy-modern` only]

Uses an author-title label instead of an author-year label. It is useful for some classical or

undated works. Anyway you should prefer the `entrysubtype=classic` field (see above).

See Guzmán de Rojas, *Problemática* and Rogers (2015) for details.

`\footcitet{`⟨*key*⟩`}` [`philosophy-classic` and `philosophy-modern` only]

Same as `\footcite` but with the `\textcite` style.[b]

Medicine is an art[a] but it is also a science.[b]

[a] Garlik 1978, p. 13.
[b] Garlik (1978, p. 13)

`\ccite{`⟨*key*⟩`}` [`philosophy-verbose` only]

The same as `\cite`, but omits the author's (editor's) name (defined only for the `verbose` style). Here is an example:

The topic is discussed in P. Rossi, *History of Types*, La TeXnica, Verona 2007 and in the recent *Types of History*, Typographica, Milano 2008.

```
The topic is discussed in \cite{Rossi:2007} and in the recent
\ccite{Rossi:2008}.
```

6 New options

6.1 Global

`relatedformat = semicolon | parens | brackets` default: `semicolon`

`semicolon` The "related" entry is preceded by a semicolon.

Poincaré, Jules-Henri (1968), *La science et l'hypothèse*, Paris, Flammarion; trad. it. *La scienza e l'ipotesi*, Bompiani, 2003.

`parens` Puts the "related" entry in parentheses.

Poincaré, Jules-Henri (1968), *La science et l'hypothèse*, Paris, Flammarion (trad. it. *La scienza e l'ipotesi*, Bompiani, 2003).

`brackets` Same as the previous option but with brackets.

Poincaré, Jules-Henri (1968), *La science et l'hypothèse*, Paris, Flammarion [trad. it. *La scienza e l'ipotesi*, Bompiani, 2003].

`publocformat = publocyear | locpubyear | loccolonpub` default: `publocyear`

This option provides three styles for typesetting the "publisher/location/date" block. It is active also for the related entry and for the `orig-` fields (section 8.1).

`publocyear` Oxford University Press, Oxford 2007

`locpubyear` Oxford, Oxford University Press, 2007

`loccolonpub` Oxford: Oxford University Press, 2007

`volnumformat = strings | parens | plain` default: `plain`

This option provides three styles for typesetting the "volume/number" block in `@article` entries.

`plain` …*Journal Title*, 5, 8, …

`strings` …*Journal Title*, vol. 5, n. 8, …

`parens` …*Journal Title* (5, 8), …

`volumeformat = arabic | roman | romanscRoman` default: `arabic`

This option provides three styles for typesetting the `volume` field.

`arabic` …*Book Title*, vol. 12, …

`roman` …*Book Title*, vol. xii, …

`romansc` …*Book Title*, vol. xii, …

`Roman` …*Book Title*, vol. XII, …

`editionformat = arabic | roman | romansc | Roman | superscript` default: `arabic`

This option provides three styles for typesetting the `edition` field.

`arabic` …*Book Title*, 3ª ed., …

`roman` …*Book Title*, iii ed., …

`romansc` …*Book Title*, iii ed., …

`Roman` …*Book Title*, III ed., …

`superscript` [only for `philosophy-verbose`]
…*Book Title*, Publisher, Location 2010[3].

`scauthors = bib | cite | bibcite | citefn | bibcitefn | all` default: `false`

Prints some or all names (authors, editors, translators, etc.) in small caps.

`bib` Small caps only for the names at the beginning of the entry in the bibliography.

`cite` Small caps only for the names at the beginning of the entry in the citations.

`bibcite`	Small caps only for the names at the beginning of the entry both in bibliography and citations.
`citefn`	Small caps only for the names at the beginning of the entry in the citations inside footnotes.
`bibcitefn`	Small caps only for the names at the beginning of the entry both in bibliography and citations inside footnotes.
`all`	Small caps for *all* the names both in bibliography and citations.

`lowscauthors = true, false` default: `false`

Prints the initials of the names in lowercase small capitals.

DONALD E. KNUTH or DONALD E. KNUTH.

`shorthandintro = true, false` default: `true`

Prints a language-specific expression such as "henceforth cited as ⟨*shorthand*⟩" to introduce shorthands on the first citation.

Kant (1968a [henceforth cited as KpV]).

You can overwrite the default expression using the `shorthandintro`. Note that the alternative expression must include the shorthand. Obviously, if you do not use an intro to the shorthands you will need a list of shorthands (`\printshorthand` command).

`inbeforejournal = true, false` default: `false`

Prints the string "in" before the `journaltitle` in the `@article` entries.

Doody, Terrence (1974), "Hemingway's Style and Jake's Narration", in *The Journal of Narrative Technique*, 4, 3, p. 212-225.

`classical = true, false` default: `false` [Only for Italian documents]

It requires `babel` or `polyglossia`. If `true` it doubles the last consonant of the abbreviations such as "p.", "vol.", "col.", etc., when used in the plural form. For example you will have "p." for "page" and "pp." for "pages". This habit is very common in Italian writings even if it remains useless.

Chatelain, Daniele e George Slusser (2000), «Flying to the Moon in French and American Science Fiction», in Westfahl (2000a), pp. 25-33.

`library = true, false` default: `true`

Shows the `library` field, both in the bibliography and in the citations (see also section 4).

`annotation = true, false` default: `false`

Shows the `annotation` field only in the bibliography (see also section 4). This option can be given globally or on a per-bibliography basis.

```
\printbibliography[annotation=true]
```

6.2 Options for philosophy-classic and philosophy-modern

`latinemph = true, false` default: `false`

Prints "et al." (*et alii*) in italic shape.

`square = true, false` default: `false`

Uses brackets instead of parentheses in the citations and in the author-year label used in the bibliography.

`nodate = true, false` default: `true`

Prints the `nodate` string (localized) when `year` or `date` is missing. Yo can set this option globally in the package options or in the optional argument of `\printbibliography`.

6.3 Options for philosophy-modern

`yearleft = true, false` default: `false`

Prints the date flushed left in the bibliography.

`restoreclassic = true, false` default: `true`

This option can be given in the optional argument of `\printbibliography`. It restores the `classic` style within a document typeset using the `modern` style. It is useful to compose a "Web List" like that at the end of this document. For example:

```
\printbibliography[restoreclassic,type=online]
```

6.4 Options for philosophy-verbose

`latinemph = true, false` default: `false`

Prints the scholarly abbreviations "ibidem", "et al.", "op. cit.", "idem" in italic shape.

`iviemph = true, false` default: `false`

Prints the scholarly abbreviation "ivi" in italic shape.

`commacit = true, false` default: `false`

Adds a comma at the end of the `shorttitle` field when this is followed by the string "cit.":

"Descartes, *Discours de la méthode*, cit.".

7 Customizations

Here we introduce the new commands and lenghts provided by `biblatex-philosophy`. The `biblatex` package offers other commands, lenghts and options to modify many aspects

of citations and bibliography. See the biblatex documentation for details.

7.1 Fonts

\annotationfont default: \footnotesize

The font of the annotation field. It can be redefined with:

```
\renewcommand*{\annotationfont}{\normalsize\sffamily}
```

\libraryfont default: \normalfont

The font of the library field. It can be redefined with:

```
\renewcommand*{\libraryfont}{\sffamily}
```

7.2 Punctuation

\volnumpunct default: \addcomma\space

The separator between volume and number in @article entries. It can be redefined with:

```
\renewcommand*{\volnumpunct}{/}
```

Combining this with the volnumformat and volumeformat options you can get other styles for volume and number. For example:

… *Journal Title*, 5/8, …
… *Journal Title*, V/8, …
… *Journal Title* (5/8), …
… *Journal Title* (V/8), …

\editorstrgdelim default: \addspace

The separator to be printed after the strings editorstrg, authorstrg and translatorstrg, which are enclosed in parentheses by default. If you want omit the parentheses you should also change it as follows:

```
\renewcommand*{\editorstrgdelim}{\addcomma\space}
\DeclareFieldFormat{editortype}{#1}% no parentheses
```

7.3 Lengths

These lengths are (re)defined only for the modern style. It introduces two new lengths:

\postnamesep The space between author (or editor) and the first entry relating to him.

`\yeartitle` The space between year and title.

It also redefines the following `biblatex` lengths:

`\bibnamesep` The vertical space between two blocks of authors.

`\bibitemsep` The vertical space between the individual entries in the bibliography.

`\bibhang` The hanging indentation of the bibliography.

These are the default values for the lengths used by the `modern` style. You can change them according to your specific needs.

```
\setlength{\yeartitle}{0.8em}
\setlength{\postnamesep}{0.5ex plus 2pt minus 1pt}
\setlength{\bibitemsep}{\postnamesep}
\setlength{\bibnamesep}{1.5ex plus 2pt minus 1pt}
\setlength{\bibhang}{4\parindent}
```

7.4 Using the styles with other languages

The languages currently supported by this bundle are Italian, English, Spanish and French. In order to use the styles with different languages, you have first of all to declare the new `opcited` string introduced by `biblatex-philosophy`. You can then test the styles and if the default strings provided in the localization module does not match your needs you can redefine them.

Here is a sample code for using the styles in German documents. Note that we first declare the new string `opcited`, then we define it and inherit the German default strings from `german.lbx`. The other strings (`translationas`, `ibidem`, `loccit`, …) may be redefined if the default ones are not satisfying. For example you may prefer "deut. Übers" to the default "Übers unter dem Titel". Another approach is to use the `\DeclareLanguageMapping` command. See the documentation of the `biblatex` package for details (Lehman 2019).

```
\NewBibliographyString{opcited}
\DefineBibliographyStrings{german}{%
  inherit       = {german},
  opcited       = {op\adddotspace cit\adddot},
  translationas = {deut\adddotspace \"Ubers\adddot},
  ...other strings...
}
```

The French default localization module redefines, among others, the `\mkbibnamefamily` command in order to get the family name in small caps. We do not like this approach because an author could use a localization module without adhering to the typographical standards which should be indipendent from the linguistic standards. For this reason we have reset it to the default definition. If you prefer the `french.lbx` choice, use this code:

```
\DefineBibliographyExtras{french}{%
  \protected\def\mkbibnamefamily#1{%
    \textsc{\textnohyphenation{#1}}}}%
```

The philosophy styles redefine the \bibrangedash and \bibdaterangesep commands in order to get a simple dash (-) instead of an en dash (–), in the page and date ranges. If you prefer the en dash use the following code for all the languages loaded by babel or polyglossia:

```
\DefineBibliographyExtras{<langid>}{%
  \protected\def\bibrangedash{%
    \textendash\penalty\hyphenpenalty}%
  \protected\def\bibdaterangesep{\bibrangedash}}%
```

8 Backward compatibility

Previous versions of the styles provided a different mechanism to manage entries comprising both the original publication data and the translation data. This feature is now deprecated and it is still supported only for backward compatibility. This mechanism uses some special fields and provides specific options.

8.1 Deprecated fields

The following fields can hold the translation or the original edition data. They are preceded by the string "trans." or "orig. ed.", respectively according to the origfields=trans (default) or origfields=origed option (see below). Note that the origdate/transdate field is needed in order to print these fields. Contrarily they will be ignored.

origtitle field (literal)
transtitle field (literal)

The title of the translation/original edition.

origpublisher field (list)
transpublisher field (list)

The publisher of the translation/original edition.

origlocation field (list)
translocation field (list)

The location of the translation/original edition.

origdate field (range)
transdate field (range)

The publication date of the translation/original edition.

reprinttitle field (literal)

The title of a reprint of the work.

usera field (literal)
origbooktitle field (literal)
transbooktitle field (literal)

The title of the @collection/@book/@mvbook in which the translation/original edition of an @article/@inbook/@incollection is published.

The field is printed after the origtitle/transtitle fields.

userb field (literal)
orignote field (literal)
transnote field (literal)

This field is printed after the origtitle/transtitle. It is meat for secondary informations about the translation/original edition, such as the name of editors, translators, etc.

userc field (literal)
origpages field (literal)
transpages field (literal)

This field is printed at the end of the entry, after the origdate/transdate field. It is meant for the page range of the translation/original edition or other useful informations. In the first case, string "p." is omitted.

8.2 Deprecated options

origfields = trans | none | edorig default: trans

true	Prints the orig- fields.
none	Omits the orig- fields.
origed	This option cites the translation data first and adds the original publication data at the end of the entry, preceded by the string "orig. ed" (or "ed. orig." for Italian documents).

origed = true, false default: true

Same as the previous but can be set on a per-entry basis in the options field.

origfieldsformat = semicolon | parens | brackets default: semicolon

Use the relatedformat option instead.

semicolon	The translation/original publication data are preceded by a semicolon.
parens	Puts the translation or the original publication data in parentheses.
brackets	Same as the previous option, but with brackets instead of parentheses.

scauthorsbib = true, false default: false

Same as scauthors=bib.

scauthorscite = true, false default: false

Same as scauthors=cite.

`scauthors = true, false` default: `false`

Same as `scauthors=bibcite`.

9 Known issues

The `parskip` package redefines `\parindent` and sets it to 0 pt by default. This conflicts with the `philosophy-modern` style, which uses this length for the left indentation of bibliographic entries. In such a case, remember to select the correct value of `\bibhang`, which is set to `4\parindent` by default (see section 7.3).

Examples

Shorthands

KpV Immanuel Kant, *Kritik der praktischen Vernunft*, in KW, vol. 5, 1968, pp. 1-163.

KpV Immanuel Kant, "Kritik der praktischen Vernunft", in *Kants Werke. Akademie Textausgabe*, vol. 5: *Kritik der praktischen Vernunft. Kritik der Urtheilskraft*, Walter de Gruyter, Berlin 1968, pp. 1-163.

KU Immanuel Kant, "Kritik der Urtheilskraft", in *Kants Werke. Akademie Textausgabe*, vol. 5: *Kritik der praktischen Vernunft. Kritik der Urtheilskraft*, Walter de Gruyter, Berlin 1968, pp. 165-485.

KW Immanuel Kant, *Kants Werke. Akademie Textausgabe*, 9 vols., Walter de Gruyter, Berlin 1968.

A Web List

Here we have a list of Web sites typeset in the `classic` style through the `restoreclassic` option. Only the `@online` entries are printed and the annotation is omitted via the contextual option `annotation=false`.

GUIT. *Gruppo degli Utilizzatori Italiani di TEX* (2012), `http://www.guitex.org` (visited on 01/15/2012).

CTAN (2006), *CTAN. The Comprehensive TeX Archive Network*, `http://www.ctan.org` (visited on 10/01/2006).

Philosophy examples

The source of this bibliography, typeset in the `modern` style, is the `biblatex-philosophy.bib` database, distributed with the `biblatex-philosophy` package. It is provided for checking all the style-specific features. This list should not highlight any bugs.

Aristotle

1872 *Nichomachean Ethics*, trans. by F. M. F. A. Paley, J. Hall & Son, London.
A `@book` entry with a `translator` field. Note also the `entrysubtype` field which is set to `classic`.

Guzmán de Rojas, Iván

s.d. *Problemática logico-lingüística de la comunicacíon social con el pueblo Aymara*, mimeo, Con los auspicios del Centro internacional de Investigacíones para el Desarrollo de Canada.

A work without a pubblication date. The string `nodate` (localized) is automatically printed.

Heidegger, Martin

2001 *Sein und Zeit*, 18th ed., Max Niemeyer Verlag, Tübingen. Originally published in 1927 in the *Jahrbuch für Philosophie und phänomenologische Forschung (vol. VIII)*, directed by H. Husserl.

Note the `library` field, use for some details about the first edition.

Kant, Immanuel

1968a *Kants Werke. Akademie Textausgabe*, 9 vols., Walter de Gruyter, Berlin.

1968b *Kritik der praktischen Vernunft*, in Kant (1968a), vol. 5, pp. 1-163.

A single volume from the critical edition of Kant's (*Kants Werke*). Note the `xref` field.

1968d *Kritik der Urtheilskraft*, in Kant (1968a), vol. 5, pp. 165-485.

A single volume from the critical edition of Kant's (*Kants Werke*). Note the `xref` field.

Komensky, Jan Amos [Comenius]

1969 *Opera Omnia*, Praga.

This author is known with his Latin name, given in the `nameaddon` field.

Poincaré, Jules-Henri

1968 *La science et l'hypothèse*, Flammarion, Paris; trans. *La scienza e l'ipotesi*, ed. by Corrado Sinigaglia, testo greco a fronte, Bompiani, Milano 2003.

A `@book` entry followed by its translation, cross-referenced in the `related` field.

Popper, Karl R.

1934 *Logik der Forschung*, Springer, Wien; trans. *The Logic of Scientific Discovery*, 3rd ed., Hutchinson, London 1959; it. trans. *Logica della scoperta scientifica*, 3rd ed., Einaudi, Torino 1998.

A `@book` entry followed by two differents translations, cross-referenced in the `related` (Biber 1.6 required).

Termini, Settimo

2007 "Vita morte e miracoli di Alan Mathison Turing", in *Vite matematiche. Protagonisti del '900 da Hilbert a Wiles*, ed. by Claudio Bartocci, Renato Betti, Angelo Guerraggio, and Roberto Lucchetti, Springer-Verlag Italia, Milano.

This entry includes all the informations of the parent `collection` linked through the `crossref` field.

Biblatex examples

The source of this bibliography, typeset in the `modern` style, is the `biblatex-examples.bib` database, distributed with the `biblatex` package. It is provided for checking all the standard features. This list could highlight some bugs.

Almendro, José L., Jacinto Martín, Alberto Sánchez, and Fernando Nozal

1998 "Elektromagnetisches Signalhorn", EU-29702195U (FR, GB, DE).

This is a `patent` entry with a `location` field. The number is given in the `number` field. Note the format of the `location` field in the database file. Compare `laufenberg`, `sorace`, and `kowalik`.

Angenendt, Arnold

2002 "In Honore Salvatoris – Vom Sinn und Unsinn der Patrozinienkunde", *Revue d'Histoire Ecclésiastique*, 97, pp. 431-456, 791-823.

A German article in a French journal. Apart from that, a typical `article` entry. Note the `indextitle` field.

Aristotle

1877 *The Rhetoric of Aristotle with a commentary by the late Edward Meredith Cope*, ed. and comm. by Edward Meredith Cope, 3 vols., Cambridge University Press.

A commented edition. Note the concatenation of the `editor` and `commentator` fields as well as the `volumes`, `sorttitle`, and `indextitle` fields.

1907 *De Anima*, ed. by Robert Drew Hicks, Cambridge University Press, Cambridge.

A `book` entry with an `author` and an `editor`.

1929 *Physics*, trans. by P. H. Wicksteed and F. M. Cornford, G. P. Putnam, New York.

A `book` entry with a `translator` field.

1968 *Poetics*, ed. by D. W. Lucas, Clarendon Aristotle, Clarendon Press, Oxford.

A `book` entry with an `author` and an `editor` as well as a `series` field.

Augustine, Robert L.

1995 *Heterogeneous catalysis for the synthetic chemist*, Marcel Dekker, New York.

A plain `book` entry.

Averroes

1869 *Drei Abhandlungen über die Conjunction des separaten Intellects mit dem Menschen. Von Averroes (Vater und Sohn), aus dem Arabischen übersetzt von Samuel Ibn Tibbon*, ed. and trans. by J. Hercz, S. Hermann, Berlin.

A `book` entry. Note the concatenation of the `editor` and `translator` fields as well as the `indextitle` and `indexsorttitle` fields.

1892 *Des Averroës Abhandlung: "Über die Möglichkeit der Conjunktion" oder "Über den materiellen Intellekt"*, ed., trans., and annot. by Ludwig Hannes, C. A. Kaemmerer, Halle an der Saale.

An annotated edition. Note the concatenation of the `editor`, `translator`, and `annotator` fields. Also note the `shorttitle`, `indextitle`, `sorttitle`, and `indexsorttitle` fields.

1982 *The Epistle on the Possibility of Conjunction with the Active Intellect by Ibn Rushd with the Commentary of Moses Narboni*, ed. and trans. by Kalman P. Bland, Moreshet: Studies in Jewish History, Literature and Thought, 7, Jewish Theological Seminary of America, New York.

A `book` entry with a `series` and a `number`. Note the concatenation of the `editor` and `translator` fields as well as the `indextitle` field.

Baez, John C. and Aaron D. Lauda

2004a *Higher-Dimensional Algebra V: 2-Groups*, version 3, Oct. 27, 2004, arXiv: math/0307200v3.

An online reference from arXiv. Note the eprint and eprinttype fields. Compare baez/article which is the same item given as an article entry with eprint information.

2004b "Higher-Dimensional Algebra V: 2-Groups", version 3, *Theory and Applications of Categories*, 12, pp. 423-491, arXiv: math/0307200v3.

An article with eprint and eprinttype fields. Note that the arXiv reference is transformed into a clickable link if hyperref support has been enabled. Compare baez/online, which is the same item given as an online entry.

Bertram, Aaron and Richard Wentworth

1996 "Gromov invariants for holomorphic maps on Riemann surfaces", *J. Amer. Math. Soc.*, 9, 2, pp. 529-571.

An article entry with a volume and a number field.

Brandt, Ahasver von and Erich Hoffmann

1987 "Die nordischen Länder von der Mitte des 11. Jahrhunderts bis 1448", in *Europa im Hoch- und Spätmittelalter*, ed. by Ferdinand Seibt, Handbuch der europäischen Geschichte, 2, Klett-Cotta, Stuttgart, pp. 884-917.

An incollection entry with a series and a number. Note the format of the printed name and compare the useprefix option in the options field as well as vangennep. Also note the indextitle, and indexsorttitle fields.

CMS

2003 *The Chicago Manual of Style. The Essential Guide for Writers, Editors, and Publishers*, 15th ed., University of Chicago Press, Chicago, Ill., ISBN: 0-226-10403-6.

This is a manual entry without an author or editor. Note the label field in the database file which is provided for author-year citation styles. Also note the sorttitle and indextitle fields. By default, all entries without an author or editor are alphabetized by title but we want this entry to be alphabetized under 'C' rather than 'T'. There's also an isbn field.

Chiu, Willy W. and We Min Chow

1978 *A Hybrid Hierarchical Model of a Multiple Virtual Storage (MVS) Operating System*, research rep. RC-6947, IBM.

This is a report entry for a research report. Note the format of the type field in the database file which uses a localization key. The number of the report is given in the number field. Also note the sorttitle and indextitle fields.

Cicero, Marcus Tullius

1995 *De natura deorum. Über das Wesen der Götter*, Latin and German, ed. and trans. by Ursula Blank-Sangmeister, afterw. by Klaus Thraede, Reclam, Stuttgart.

A bilingual edition of Cicero's *De natura deorum*, with a German translation. Note the format of the language field in the database file, the concatenation of the editor and translator fields, and the afterword field.

Coleridge, Samuel Taylor

1983 *The collected works of Samuel Taylor Coleridge*, vol. 7.2: *Biographia literaria, or Biographical sketches of my literary life and opinions*, ed. by Kathleen Coburn, James Engell, and W. Jackson Bate, Bollingen Series, 75, Routledge and Kegan Paul, London.

One (partial) volume of a multivolume book. This is a `book` entry with a `volume` and a `part` field which explicitly refers to the second (physical) part of the seventh (logical) volume. Also note the `series` and `number` fields.

Computers and Graphics

2011 35, 4: *Semantic 3D Media and Content*, ISSN: 0097-8493.

This is a `periodical` entry with an `issn` field.

Cotton, Frank Albert, Geoffrey Wilkinson, Carlos A. Murillio, and Manfred Bochmann

1999 *Advanced inorganic chemistry*, 6th ed., Wiley, Chichester.

A `book` entry with 4 authors and an `edition` field. By default, long `author` and `editor` lists are automatically truncated. This is configurable.

CTAN

2006 *CTAN. The Comprehensive TeX Archive Network*, `http://www.ctan.org` (visited on 10/01/2006).

This is an `online` entry. The URL, which is given in the `url` field, is transformed into a clickable link if `hyperref` support has been enabled. Note the format of the `urldate` field (`yyyy-mm-dd`) in the database file. Also note the `label` field which may be used as a fallback by citation styles which need an `author` and/or a `year`.

Doody, Terrence

1974 "Hemingway's Style and Jake's Narration", *The Journal of Narrative Technique*, 4, 3, pp. 212-225; excerpt in *Contemporary Literary Criticism*, ed. by Roger Matuz, vol. 61, Gale, Detroit 1990, pp. 204-208.

An `article` entry cited as an excerpt from a `collection` entry. Note the format of the `related` and `relatedstring` fields.

EB

2003 *The New Encyclopædia Britannica*, ed. by Warren E. Preece, 15th ed., 32 vols., Encyclopædia Britannica, Chicago, Ill.

This is a `mvcollection` entry for an encyclopedia. Note the `useeditor` option in the `options` field as well as the `sorttitle` field. We want this entry to be cited and alphabetized by title even though there is an editor. In addition to that, we want the title to be alphabetized under 'E' rather than 'T'. Also note the `label` field which is provided for author-year citation styles.

Gaonkar, Dilip Parameshwar

2001a (ed.), *Alternative Modernities*, Duke University Press, Durham and London, ISBN: 0-822-32714-7.

This is a `collection` entry. Note the format of the `location` field in the database file as well as the `isbn` field.

2001b "On Alternative Modernities", in *Alternative Modernities*, ed. by Dilip Parameshwar Gaonkar, Duke University Press, Durham and London, pp. 1-23, ISBN: 0-822-32714-7.

Geer, Ingrid de

1985 *Earl, Saint, Bishop, Skald – and Music. The Orkney Earldom of the Twelfth Century. A Musicological Study*, PhD thesis, Uppsala Universitet, Uppsala.

This is a typical `thesis` entry for a PhD thesis. Note the `type` field in the database file which uses a localization key. Also note the format of the printed name and compare the `useprefix` option in the `options` field as well as `vangennep`.

Gerhardt, Michael J.

2000 *The Federal Appointments Process. A Constitutional and Historical Analysis*, Duke University Press, Durham and London.

This is a `book` entry. Note the format of the `location` field as well as the `sorttitle` and `indextitle` fields.

Gillies, Alexander

1933 "Herder and the Preparation of Goethe's Idea of World Literature", *Publications of the English Goethe Society*, new ser., 9, pp. 46-67.

An `article` entry with a `series` and a `volume` field. Note that format of the `series` field in the database file.

Glashow, Sheldon

1961 "Partial Symmetries of Weak Interactions", *Nucl. Phys.*, 22, pp. 579-588; Weinberg, Steven (1967), "A Model of Leptons", *Phys. Rev. Lett.*, 19, pp. 1264-1266; Salam, Abdus (1968), "Weak and Electromagnetic Interactions", in *Elementary particle theory. Relativistic groups and analyticity*, Proceedings of the Eighth Nobel Symposium, Aspenäsgarden, Lerum, May 19-25, 1968, ed. by Nils Svartholm, Almquist & Wiksell, Stockholm, pp. 367-377.

A `set` with three members discussing the standard model of particle physics.

Gonzalez, Ray

2001 *The Ghost of John Wayne and Other Stories*, The University of Arizona Press, Tucson, ISBN: 0-816-52066-6.

A collection of short stories. This is a `book` entry. Note the `sorttitle` and `indextitle` fields in the database file. There's also an `isbn` field.

Goossens, Michel, Frank Mittelbach, and Alexander Samarin

1994 *The LaTeX Companion*, 1st ed., Addison-Wesley, Reading, Mass., 528 pp.

A book with three authors. Note the formatting of the author list. By default, only the first name is reversed in the bibliography.

Hammond, Christopher

1997 *The basics of crystallography and diffraction*, International Union of Crystallography and Oxford University Press, Oxford.

A `book` entry. Note the `sorttitle` and `indextitle` fields as well as the format of the `publisher` field.

Herrmann, Wolfgang A., Karl Öfele, Sabine K. Schneider, Eberhardt Herdtweck, and Stephan D. Hoffmann

2006 "A carbocyclic carbene as an efficient catalyst ligand for C–C coupling reactions", *Angew. Chem. Int. Ed.*, 45, 23, pp. 3859-3862; Aksın, Özge, Hayati Türkmen, Levent Artok, Bekir Çetinkaya, Chaoying Ni, Orhan Büyükgüngör, and Erhan Özkal (2006), "Effect of immobilization on catalytic characteristics of saturated Pd-N-heterocyclic carbenes in Mizoroki-Heck reactions", *J. Organomet. Chem.*, 691, 13, pp. 3027-3036; Yoon, Myeong S., Dowook Ryu, Jeongryul Kim, and Kyo Han Ahn (2006), "Palladium pincer complexes with reduced bond angle strain: efficient catalysts for the Heck reaction", *Organometallics*, 25, 10, pp. 2409-2411.

A `set` with three members.

Homer

2004 *Die Ilias*, trans. by Wolfgang Schadewaldt, intro. by Joachim Latacz, 3rd ed., Artemis & Winkler, Düsseldorf and Zürich.

A German translation of the *Iliad*. Note the `translator` and `introduction` fields and the format of the `location` field in the database file. Also note the `sorttitle` and `indextitle` fields.

Hostetler, Michael J., Julia E. Wingate, Chuan-Jian Zhong, Jay E. Harris, Richard W. Vachet, Michael R. Clark, J. David Londono, Stephen J. Green, Jennifer J. Stokes, George D. Wignall, Gary L. Glish, Marc D. Porter, Neal D. Evans, and Royce W. Murray

1998 "Alkanethiolate gold cluster molecules with core diameters from 1.5 to 5.2 nm. Core and monolayer properties as a function of core size", *Langmuir*, 14, 1, pp. 17-30.

An `article` entry with 14 authors. By default, long author and editor lists are automatically truncated. This is configurable.

Hyman, Arthur

1981 "Aristotle's Theory of the Intellect and its Interpretation by Averroes", in *Studies in Aristotle*, ed. by Dominic J. O'Meara, Studies in Philosophy and the History of Philosophy, 9, The Catholic University of America Press, Washington, D.C., pp. 161-191.

An `incollection` entry with a `series` and `number` field.

Itzhaki, Nissan

1996 *Some remarks on 't Hooft's S-matrix for black holes*, version 1, Mar. 11, 1996, arXiv: `hep-th/9603067`.

An `online` reference from arXiv. Note the `eprint` and `eprinttype` fields. Also note that the arXiv reference is transformed into a clickable link if `hyperref` support has been enabled.

Jaffé, Philipp

1885-1888 (ed.), *Regesta Pontificum Romanorum ab condita ecclesia ad annum post Christum natum* MCXCVIII, red. by Samuel Loewenfeld, Ferdinand Kaltenbrunner, and Paul Ewald, 2nd ed., 2 vols., Leipzig.

A `mvcollection` entry with `edition` and `volumes` fields. Note the `editora` and `editoratype` fields.

Kant, Immanuel

1968c "Kritik der praktischen Vernunft", in *Kants Werke. Akademie Textausgabe*, vol. 5: *Kritik der praktischen Vernunft. Kritik der Urtheilskraft*, Walter de Gruyter, Berlin, pp. 1-163.

An edition of Kant's *Collected Works*, volume five. This is an `inbook` entry which explicitly refers to the *Critique of Practical Reason* only, not to the entire fifth volume. Note the `author` and `bookauthor` fields in the database file. By default, the `bookauthor` is omitted if the values of the `author` and `bookauthor` fields are identical.

1968e "Kritik der Urtheilskraft", in *Kants Werke. Akademie Textausgabe*, vol. 5: *Kritik der praktischen Vernunft. Kritik der Urtheilskraft*, Walter de Gruyter, Berlin, pp. 165-485.

An edition of Kant's *Collected Works*, volume five. This is an `inbook` entry which explicitly refers to the *Critique of Judgment* only, not to the entire fifth volume.

Kastenholz, M. A. and Philippe H. Hünenberger

2006 "Computation of methodology-independent ionic solvation free energies from molecular simulations. I. The electrostatic potential in molecular liquids", *J. Chem. Phys.*, 124, 124106, DOI: 10.1063/1.2172593.

An `article` entry with an `eid` and a `doi` field. Note that the DOI is transformed into a clickable link if `hyperref` support has been enabled.

Knuth, Donald E.

1984-1986a *Computers & Typesetting*, 5 vols., Addison-Wesley, Reading, Mass.

A five-volume book cited as a whole. This is a `mvbook` entry, note the `volumes` field.

1984-1986b *Computers & Typesetting*, 5 vols., Addison-Wesley, Reading, Mass.Vol. A: *The TEXbook*, 1984.
Vol. B: *TEX: The Program*, 1986.
Vol. C: *The METAFONTbook*, 1986.
Vol. D: *METAFONT: The Program*, 1986.
Vol. E: *Computer Modern Typefaces*, 1986.

A five-volume book cited as a whole and related to its individual volumes. Note the `related` and `relatedtype` fields.

1984 *Computers & Typesetting*, vol. A: *The TEXbook*, Addison-Wesley, Reading, Mass.

The first volume of a five-volume book. Note the `sorttitle` field. We want this volume to be listed after the entry referring to the entire five-volume set. Also note the `indextitle` and `indexsorttitle` fields. Indexing packages that don't generate robust index entries require some control sequences to be protected from expansion.

1986a *Computers & Typesetting*, vol. B: *TEX: The Program*, Addison-Wesley, Reading, Mass.

The second volume of a five-volume book. Note the `sorttitle` field. Also note the `indexsorttitle` field.

1986b *Computers & Typesetting*, vol. C: *The METAFONTbook*, Addison-Wesley, Reading, Mass.

The third volume of a five-volume book. Note the `sorttitle` field as well as the `indextitle` field.

1986c *Computers & Typesetting*, vol. D: *METAFONT: The Program*, Addison-Wesley, Reading, Mass.

The fourth volume of a five-volume book. Note the `sorttitle` field.

Knuth, Donald E.

1986d *Computers & Typesetting*, vol. E: *Computer Modern Typefaces*, Addison-Wesley, Reading, Mass.

The fifth volume of a five-volume book. Note the `sorttitle` field.

Kowalik, F. and M. Isard

1995 "Estimateur d'un défaut de fonctionnement d'un modulateur en quadrature et étage de modulation l'utilisant", French pat. req. 9500261, Jan. 11, 1995.

This is a `patent` entry for a French patent request with a full date. The number is given in the `number` field. Note the format of the `type` and `date` fields in the database file. Compare `almendro`, `laufenberg`, and `sorace`.

Kullback, Solomon

1959 *Information Theory and Statistics*, John Wiley & Sons, New York.

1997a *Information Theory and Statistics*, Dover Publications, New York; trans. John Wiley & Sons, 1959.

A reprint of the `kullback` entry. Note the format of `origyear` and `origpublisher`. These fields are not used by the standard bibliography styles.

1997b *Information Theory and Statistics*, Dover Publications, New York; orig. pub. in 1959 by John Wiley & Sons.

A reprint of the `kullback` entry. Note the format of the `related` and `relatedtype` fields.

Laufenberg, Xaver, Dominique Eynius, Helmut Suelzle, Stephan Usbeck, Matthias Spaeth, Miriam Neuser-Hoffmann, Christian Myrzik, Manfred Schmid, Franz Nietfeld, Alexander Thiel, Harald Braun, and Norbert Ebner

2006 "Elektrische Einrichtung und Betriebsverfahren", European pat. 1700367, Robert Bosch GmbH, Daimler Chrysler AG, and Bayerische Motoren Werke AG, Sept. 13, 2006.

This is a `patent` entry with a `holder` field. Note the format of the `type` and `location` fields in the database file. Compare `almendro`, `sorace`, and `kowalik`.

Loh, Nin C.

1992 *High-Resolution Micromachined Interferometric Accelerometer*, MA thesis, Massachusetts Institute of Technology, Cambridge, Mass.

This is a typical `thesis` entry for an MA thesis. Note the `type` field in the database file which uses a localization key.

Malinowski, Bronisław

1972 *Argonauts of the Western Pacific. An account of native enterprise and adventure in the Archipelagoes of Melanesian New Guinea*, 8th ed., Routledge and Kegan Paul, London.

This is a `book` entry. Note the format of the `publisher` and `edition` fields as well as the `subtitle` field.

Markey, Nicolas

2005 *Tame the BeaST. The B to X of BibTeX*, version 1.3, Oct. 16, 2005, `http://mirror.ctan.org/info/bibtex/tamethebeast/ttb_en.pdf` (visited on 10/01/2006).

An `online` entry for a tutorial. Note the format of the `date` field (`yyyy-mm-dd`) in the database file.

Maron, Monika

2000 *Animal Triste*, trans. from the German by Brigitte Goldstein, University of Nebraska Press, Lincoln.

An English translation of a German novel with a French title. In other words: a book entry with a translator field. Note the origlanguage field which is concatenated with the translator.

Massa, Werner

2004 *Crystal structure determination*, 2nd ed., Spinger, Berlin.

A book entry with an edition field.

Matuz, Roger

1990 (ed.), *Contemporary Literary Criticism*, vol. 61, Gale, Detroit, pp. 204-208.

A collection entry providing the excerpt information for the doody entry. Note the format of the pages field.

Moore, Gordon E.

1965 "Cramming more components onto integrated circuits", *Electronics*, 38, 8, pp. 114-117.

1998 "Cramming more components onto integrated circuits", *Proceedings of the IEEE*, 86, 1, pp. 82-85; repr. from *Electronics*, 38, 8, pp. 114-117.

A reprint of Moore's law. Note the related and relatedtype fields.

Moraux, Paul

1979 "Le *De Anima* dans la tradition grècque. Quelques aspects de l'interpretation du traité, de Theophraste à Themistius", in *Aristotle on Mind and the Senses*, Proceedings of the Seventh Symposium Aristotelicum, 1975, ed. by G. E. R. Lloyd and G. E. L. Owen, Cambridge University Press, Cambridge, pp. 281-324.

This is a typical inproceedings entry. Note the booksubtitle, shorttitle, indextitle, and indexsorttitle fields. Also note the eventdate field.

Nietzsche, Friedrich

1988a *Sämtliche Werke. Kritische Studienausgabe*, ed. by Giorgio Colli and Mazzino Montinari, 2nd ed., 15 vols., Deutscher Taschenbuch-Verlag and Walter de Gruyter, München, Berlin, and New York.

The critical edition of Nietzsche's works. This is a mvbook entry referring to a 15-volume work as a whole. Note the volumes field and the format of the publisher and location fields in the database file. Also note the sorttitle and field which is used to fine-tune the sorting order of the bibliography. We want this item listed first in the bibliography.

1988b *Sämtliche Werke. Kritische Studienausgabe*, vol. 1: *Die Geburt der Tragödie. Unzeitgemäße Betrachtungen I–IV. Nachgelassene Schriften 1870–1973*, ed. by Giorgio Colli and Mazzino Montinari, 2nd ed., Deutscher Taschenbuch-Verlag and Walter de Gruyter, München, Berlin, and New York.

A single volume from the critical edition of Nietzsche's works. This book entry explicitly refers to the first volume only. Note the title and maintitle fields. Also note the sorttitle field. We want this entry to be listed after the entry referring to the entire edition.

Nietzsche, Friedrich

1988c "Unzeitgemässe Betrachtungen. Zweites Stück. Vom Nutzen und Nachtheil der Historie für das Leben", in *Sämtliche Werke. Kritische Studienausgabe*, vol. 1: *Die Geburt der Tragödie. Unzeitgemäße Betrachtungen I–IV. Nachgelassene Schriften 1870–1973*, ed. by Giorgio Colli and Mazzino Montinari, Deutscher Taschenbuch-Verlag and Walter de Gruyter, München, Berlin, and New York, pp. 243-334.

A single essay from the critical edition of Nietzsche's works. This `inbook` entry explicitly refers to an essay found in the first volume. Note the `title`, `booktitle`, and `maintitle` fields. Also note the `sorttitle` field. We want this entry to be listed after the entry referring to the entire first volume.

Nussbaum, Martha

1978 *Aristotle's "De Motu Animalium"*, Princeton University Press, Princeton.

A book entry. Note the `sorttitle` and `indexsorttitle` fields and the markup of the quotes in the database file.

Padhye, Jitendra, Victor Firoiu, and Don Towsley

1999 *A Stochastic Model of TCP Reno Congestion Avoidance and Control*, tech. rep. 99-02, University of Massachusetts, Amherst, Mass.

This is a `report` entry for a technical report. Note the format of the `type` field in the database file which uses a localization key. The number of the report is given in the `number` field. Also note the `sorttitle` and `indextitle` fields.

Piccato, Pablo

2001 *City of Suspects. Crime in Mexico City, 1900–1931*, Duke University Press, Durham and London.

This is a `book` entry. Note the format of the `location` field in the database file.

Pines, Shlomo

1979 "The Limitations of Human Knowledge According to Al-Farabi, ibn Bajja, and Maimonides", in *Studies in Medieval Jewish History and Literature*, ed. by Isadore Twersky, Harvard University Press, Cambridge, Mass., pp. 82-109.

A typical `incollection` entry. Note the `indextitle` field.

Reese, Trevor R.

1958 "Georgia in Anglo-Spanish Diplomacy, 1736–1739", *William and Mary Quarterly*, 3rd ser., 15, pp. 168-190.

An `article` entry with a `series` and a `volume` field. Note the format of the series. If the value of the `series` field is an integer, this number is printed as an ordinal and the string 'series' is appended automatically.

Sarfraz, M. and M. F. A. Razzak

2002 "Technical section: An algorithm for automatic capturing of the font outlines", *Computers and Graphics*, 26, 5, pp. 795-804, ISSN: 0097-8493.

An `article` entry with an `issn` field.

Shore, Bradd

1991 "Twice-Born, Once Conceived. Meaning Construction and Cultural Cognition", *American Anthropologist*, new ser., 93, 1 (Mar. 1991), pp. 9-27.

An `article` entry with `series`, `volume`, and `number` fields. Note the format of the `series` which is a localization key.

Sigfridsson, Emma and Ulf Ryde

1998 "Comparison of methods for deriving atomic charges from the electrostatic potential and moments", *Journal of Computational Chemistry*, 19, 4, pp. 377-395, DOI: 10.1002/(SICI)1096-987X(199803)19:4<377::AID-JCC1>3.0.CO;2-P.

An `article` entry with `volume`, `number`, and `doi` fields. Note that the DOI is transformed into a clickable link if `hyperref` support has been enabled.

Sorace, Ronald E., Victor S. Reinhardt, and Steven A. Vaughn

1997 "High-Speed Digital-to-RF Converter", U.S. pat. 5668842, Hughes Aircraft Company, Sept. 16, 1997.

This is a `patent` entry with a `holder` field. Note the format of the `type` and `date` fields in the database file. Compare `almendro`, `laufenberg`, and `kowalik`.

Spiegelberg, Herbert

1969 "'Intention' und 'Intentionalität' in der Scholastik, bei Brentano und Husserl", *Studia Philosophica*, 29, pp. 189-216.

An `article` entry. Note the `sorttitle` and `indexsorttitle` fields and the markup of the quotes in the database file.

Springer, Otto

1950 "Mediaeval Pilgrim Routes from Scandinavia to Rome", *Mediaeval Studies*, 12, pp. 92-122.

A plain `article` entry.

Van Gennep, Arnold

1909a *Les rites de passage*, Nourry, Paris.

A `book` entry. Note the format of the printed name and compare the `useprefix` option in the `options` field as well as `brandt` and `geer`.

1909b *Les rites de passage*, Nourry, Paris; trans. by Monika B. Vizedom and Gabrielle L. Caffee as *The Rites of Passage* (University of Chicago Press, 1960).

A variant of the `vangennep` entry related to its translation. Note the format of the `related` and `relatedtype` fields.

1960 *The Rites of Passage*, trans. from the French by Monika B. Vizedom and Gabrielle L. Caffee, University of Chicago Press.

A translation of the `vangennep` entry. Note the `translator` and `origlanguage` fields. Compare with the `vangennep:related` entry.

Vázques de Parga, Luis, José María Lacarra, and Juan Uría Ríu

1993 *Las Peregrinaciones a Santiago de Compostela*, 3 vols., Ed. facs. de la realizada en 1948–49, Iberdrola, Pamplona.

A multivolume book cited as a whole. This is a `mvbook` entry with `volumes`, `note`, `sorttitle`, and `indextitle` fields.

Vizedom, Monika B. and Gabrielle L. Caffee

1960 (trans.), *The Rites of Passage*, University of Chicago Press; trans. of *Les rites de passage*, Nourry, Paris 1909.

A translated work from vangennep. Note the format of the related and relatedtype fields.

Wassenberg, Jan and Peter Sanders

2010 *Faster Radix Sort via Virtual Memory and Write-Combining*, version 1, Aug. 17, 2010, arXiv: 1008.2849v1 [cs.DS].

A recent online reference from arXiv using the new (April 2007 onward) identifier format. Note the eprint, eprinttype, and eprintclass fields. Also note that the arXiv reference is transformed into a clickable link if hyperref support has been enabled.

Westfahl, Gary

2000a (ed.), *Space and Beyond. The Frontier Theme in Science Fiction*, Greenwood, Westport, Conn. and London.

This is a collection entry. Note the format of the location field as well as the subtitle field.

2000b "The True Frontier. Confronting and Avoiding the Realities of Space in American Science Fiction Films", in Westfahl (2000a), pp. 55-65.

A cross-referenced article from a collection. This is an incollection entry with a crossref field. Note the subtitle and indextitle fields.

Wilde, Oscar

1899 *The Importance of Being Earnest: A Trivial Comedy for Serious People*, English and American drama of the Nineteenth Century, Leonard Smithers and Company, Google Books: 4HIWAAAAYAAJ.

A book with eprint and eprinttype fields.

Worman, Nancy

2002 *The Cast of Character. Style in Greek Literature*, University of Texas Press, Austin.

A book entry. Note the sorttitle and indextitle fields.

10 The Code

10.1 philosophy-standard.bbx

10.1.1 Initial settings

biber is the default bibliography processor for biblatex. The philosophy styles could work without biber (excluding the experimental @jurisprudence driver) but it is required because it offers many useful functionalities. The backend=bibtex or backend=bibtex8 options produce an error message.

```
\RequireBiber[3]
\@ifpackagelater{biblatex}{2020/08/23}
  {}
  {\PackageError{biblatex-philosophy}
  {Package biblatex is too old. Please update your LaTeX distribution}}
```

The styles are base on `standard` `biblatex` default style.

```
\RequireBibliographyStyle{standard}
```

A command to get an error message if you use an unknown value for an option.

```
\def\optionerror#1{%
  \ClassError{biblatex-philosophy}
  {\MessageBreak**** Unknown value for '#1' option}
  {\MessageBreak**** Unknown value for '#1' option}}
```

The `philosophy` styles redefine some localized strings for Italian, English, Spanish and French in specific localization modules. So we declare and map them to the associated languages.

```
\DeclareLanguageMapping{italian}{italian-philosophy}
\DeclareLanguageMapping{english}{english-philosophy}
\DeclareLanguageMapping{spanish}{spanish-philosophy}
\DeclareLanguageMapping{french}{french-philosophy}
```

The default value for the boolean options is `true`. This means that giving the options without the value is just like giving `option=true`.

```
\newtoggle{bbx:annotation}
\newtoggle{bbx:library}
\newtoggle{bbx:inbeforejournal}
\newtoggle{bbx:classical}
\newtoggle{bbx:lowscauthors}
\newtoggle{cbx:shorthandintro}
\newtoggle{cbx:scauthorscite}
\newtoggle{bbx:scauthorsbib}
\newtoggle{cbx:scauthorscitefn}
\newtoggle{cbx:latinemph}
\newtoggle{cbx:iviemph}

\DeclareBibliographyOption{annotation}[true]{%
  \settoggle{bbx:annotation}{#1}}
\DeclareBibliographyOption{library}[true]{%
  \settoggle{bbx:library}{#1}}
\DeclareBibliographyOption{inbeforejournal}[true]{%
  \settoggle{bbx:inbeforejournal}{#1}}
\DeclareBibliographyOption{classical}[true]{%
  \settoggle{bbx:classical}{#1}}
\DeclareBibliographyOption{lowscauthors}[true]{%
  \settoggle{bbx:lowscauthors}{#1}}
\DeclareBibliographyOption{shorthandintro}[true]{%
  \settoggle{cbx:shorthandintro}{#1}}
\DeclareBibliographyOption{latinemph}[true]{%
  \settoggle{cbx:latinemph}{#1}}
\DeclareBibliographyOption{iviemph}[true]{%
  \settoggle{cbx:iviemph}{#1}}
```

Also the multi-value options have a default value, which is declared in the optional bracketed

argument of the \DeclareBibliographyOption commands below. For example, the new scauthors option is now multi-value and defaults to all. So scauthors=all is the same of scauthors. In this way this option works exactly like the old scauthors boolean option that for this reason has been erased.

```
\newcommand{\bbx@publocformat}{}
\newcommand{\bbx@volnumformat}{}
\newcommand{\bbx@relatedformat}{}
\newcommand{\bbx@editionformat}{}
\newcommand{\bbx@volumeformat}{}
\newcommand{\bbx@scauthors}{}
\DeclareBibliographyOption{publocformat}[publocyear]{%
  \renewcommand{\bbx@publocformat}{#1}}
\DeclareBibliographyOption{volnumformat}[plain]{%
  \renewcommand{\bbx@volnumformat}{#1}}
\DeclareBibliographyOption{origfieldsformat}[semicolon]{%
  \renewcommand{\bbx@relatedformat}{#1}}
\DeclareBibliographyOption{relatedformat}[semicolon]{%
  \renewcommand{\bbx@relatedformat}{#1}}
\DeclareBibliographyOption{origfields}[true]{%
  \renewcommand{\bbx@origfields}{#1}}
\DeclareBibliographyOption{editionformat}[arabic]{%
  \renewcommand{\bbx@editionformat}{#1}}
\DeclareBibliographyOption{volumeformat}[arabic]{%
  \renewcommand{\bbx@volumeformat}{#1}}
\DeclareBibliographyOption{scauthors}[all]{%
  \renewcommand{\bbx@scauthors}{#1}}
```

These options are defined for backwards compatibility. The origed option is now useless and it is substituted by the 'related' mechanism. The scauthorscite and scauthorsbib are substituted by scauthors=cite and scauthors=bib, respectively.

```
\newcommand{\bbx@origfields}{}
\DeclareEntryOption{origed}[true]{%
  \renewcommand{\bbx@origfields}{origed}}
\DeclareBibliographyOption{scauthorsbib}[true]{%
  \settoggle{bbx:scauthorsbib}{#1}}
\DeclareBibliographyOption{scauthorscite}[true]{%
  \settoggle{cbx:scauthorscite}{#1}}
```

And now one option to be used in the \printbibliography and \printbiblist commands.

```
\blx@kv@defkey{blx@bib1}{annotation}[]{}
\blx@kv@defkey{blx@bib2}{annotation}[true]{\settoggle{bbx:annotation}{#1}}
\blx@kv@defkey{blx@biblist1}{annotation}[]{}
\blx@kv@defkey{blx@biblist2}{annotation}[true]{\settoggle{bbx:annotation}{#1}}
```

Now we can execute the default options.

```
\ExecuteBibliographyOptions{%
  publocformat     = publocyear,
```

```
  volnumformat     = plain,
  origfieldsformat = semicolon,
  relatedformat    = semicolon,
  editionformat    = arabic,
  volumeformat     = arabic,
  scauthors        = false,
  editionformat    = arabic,
  volumeformat     = arabic,
  shorthandintro   = true,
  library          = true,
  annotation       = false,
  latinemph        = false,
  iviemph          = false,
  classical        = false,
  inbeforejournal  = false,
  lowscauthors     = false,
  useprefix        = true,
  maxcitenames     = 2,
  mincitenames     = 1,
  maxbibnames      = 999,
  minbibnames      = 999}
```

Changing the penalty of the urls will prevent many overfull boxes:

```
\setcounter{biburlnumpenalty}{9000}
\setcounter{biburlucpenalty}{9000}
\setcounter{biburllcpenalty}{9000}
```

These counters control the list of names in the cross-referenced entries:

```
\newcounter{maxnamesincross}
\newcounter{minnamesincross}
```

The `scauthors` and `lowscauthors` options are based on tests that require to be executed inside a command, a macro or `\AtBeginDocument` and similar hooks. Otherwise they would produce an error message.

```
\AtBeginDocument{%
\ifdefstring{\bbx@scauthors}{bibcite}
  {\toggletrue{bbx:scauthorsbib}%
   \toggletrue{cbx:scauthorscite}%
  }{}%
\ifdefstring{\bbx@scauthors}{bib}
  {\toggletrue{bbx:scauthorsbib}%
  }{}%
\ifdefstring{\bbx@scauthors}{cite}
  {\toggletrue{cbx:scauthorscite}%
  }{}%
\ifdefstring{\bbx@scauthors}{citefn}
  {\toggletrue{cbx:scauthorscitefn}%
  }{}%
\ifdefstring{\bbx@scauthors}{bibcitefn}
```

```
  {\toggletrue{bbx:scauthorsbib}%
   \toggletrue{cbx:scauthorscitefn}%
  }{}%
\ifdefstring{\bbx@scauthors}{all}
  {\usebibmacro{bbx:scswitch}%
  }{}%
}
```

With the `scauthors=cite` option all the citations are printed in small caps. Anyway we do not like small caps in the citations inside the bibliography so we deactivate this option at the beginning of the bibliography.

```
\AtBeginBibliography{%
  \togglefalse{cbx:scauthorscite}%
  \togglefalse{cbx:shorthandintro}%
}
```

The `annotation` field and the shorthand intro are omitted in the list of shorthands.

```
\AtBeginShorthands{%
  \togglefalse{bbx:annotation}%
  \togglefalse{cbx:shorthandintro}%
}
```

The `annotation` field is omitted in every citations.

```
\AtEveryCite{%
  \togglefalse{bbx:annotation}%
}
```

10.1.2 New commands

The `\mkibid` command is provided for formatting "et al.", "ibidem" and other abbreviations. Actually the command is introduce for formatting "et al." considering that it is already defined by `verbose-trad2.cbx` which uses it for "ivi" and "ibidem". A new command `\mkivi` is use to format only the string "ivi".

```
\providecommand*{\mkibid}[1]{\iftoggle{cbx:latinemph}{\mkbibemph{#1}}{#1}}
\providecommand*{\mkivi}[1]{\iftoggle{cbx:iviemph}{\mkbibemph{#1}}{#1}}
```

We (re)define some internal commands for the punctuation. The new `\volnumpunct` command is provided to separate volume and number in `@article` entries.

```
\newcommand*{\volnumpunct}{\addcomma\space}
\renewcommand*{\newunitpunct}{\addcomma\space}
\renewcommand*{\subtitlepunct}{\addperiod\space}
%\renewcommand*{\intitlepunct}{\addspace}
\renewcommand*{\relatedpunct}{\addsemicolon\space}
```

The `\editorstrgdelim` is introduced to customize the delimiter to be printed before the `editorstrg`, `authorstrg` and `translatorstrg` strings. These strings are enclosed

in parentheses by default: (eds.), (trans.), etc. Redefining the delimiter we can omit the parentheses end reset to the default authoryear style: eds., trans., etc. This requires to change the `editortype` field format too.

```
\DeclareDelimFormat{editorstrgdelim}{\addspace}
```

New internal commands assure pure parentheses/brackets for some specific fields when using the `square` option.

```
\newrobustcmd*{\mkpureparens}[1]{%
  \begingroup
    \blx@blxinit
    \blx@setsfcodes
    \bibleftparen#1\bibrightparen%
  \endgroup}
\newrobustcmd*{\mkpurebrackets}[1]{%
  \begingroup
    \blx@blxinit
    \blx@setsfcodes

```

We define proper parentheses and brackets for "related" blocks

```
\def\mkrelatedparens{\mkpureparens}
\def\mkrelatedbrackets{\mkpurebrackets}
```

Some commands for changing the font of the `annotation`, `library` and `edition` fields.

```
\newcommand*{\annotationfont}{\footnotesize}
\newcommand*{\libraryfont}{}
\newcommand*{\editionfont}{%
  \ifdefstring{\bbx@editionformat}{Roman}
    {\uppercase}%
    {\ifdefstring{\bbx@editionformat}{romansc}
      {\scshape}%
      {\relax}}}%
\newrobustcmd*{\edfnt}[1]{%
  \begingroup
  \expandafter\editionfont%
  \expandafter{\romannumeral#1}%
  \endgroup}
```

A command to select lowercase small caps.

```
\newrobustcmd*{\mkbibsc}[1]{%
  \iftoggle{bbx:lowscauthors}{%
    \textsc{\MakeLowercase{#1}}}%
    {\textsc{#1}}}
```

10.1.3 Names format

First we define a macro to be used in the `\DeclareNameFormat` specifications. The macro simply maps the `\mkbibname*` commands to the new `\mkbibsc` command defined above.

```
\newbibmacro*{bbx:scswitch}{%
  \let\mkbibnamefamily\mkbibsc%
  \let\mkbibnamegiven\mkbibsc%
  \let\mkbibnameprefix\mkbibsc%
  \let\mkbibnamesuffix\mkbibsc}
```

In the following codes note that the font switching is declared inside `sortname` or `labelname` because the `scauthors=bib` or `scauthors=cite` option must be active only for the names at the beginning of the entry which are formatted by `sortname` or `labelname`.

```
\DeclareNameFormat{sortname}{%
  \iftoggle{bbx:scauthorsbib}{\usebibmacro{bbx:scswitch}}{}%
  \nameparts{#1}%
  \ifnumequal{\value{listcount}}{1}
  {\ifgiveninits
    {\usebibmacro{name:family-given}
      {\namepartfamily}
      {\namepartgiveni}
      {\namepartprefix}
      {\namepartsuffix}}
    {\usebibmacro{name:family-given}
      {\namepartfamily}
      {\namepartgiven}
      {\namepartprefix}
      {\namepartsuffix}}%
    \ifboolexpr{%
      test {\ifdefvoid\namepartgiven}
      and
      test {\ifdefvoid\namepartprefix}}
    {}
    {\usebibmacro{name:revsdelim}}}
  {\ifgiveninits
    {\usebibmacro{name:given-family}
      {\namepartfamily}
      {\namepartgiveni}
      {\namepartprefix}
      {\namepartsuffix}}
    {\usebibmacro{name:given-family}
      {\namepartfamily}
      {\namepartgiven}
      {\namepartprefix}
      {\namepartsuffix}}}%
  \usebibmacro{name:andothers}}%
\DeclareNameFormat{labelname}{%
  \iftoggle{cbx:scauthorscite}{\usebibmacro{bbx:scswitch}}{}%
 \iftoggle{cbx:scauthorscitefn}{\iffootnote{\usebibmacro{bbx:scswitch}}{}}{}%
  \bibhyperref{\nameparts{#1}%
```

```
\ifcase\value{uniquename}%
  \usebibmacro{name:family}%
    {\namepartfamily}%
    {\namepartgiven}%
    {\namepartprefix}%
    {\namepartsuffix}%
\or
  \ifuseprefix
    {\usebibmacro{name:given-family}%
      {\namepartfamily}%
      {\namepartgiveni}%
      {\namepartprefix}%
      {\namepartsuffixi}}%
    {\usebibmacro{name:given-family}%
      {\namepartfamily}%

             {\ifdefstring{\bbx@volumeformat}{roman}%
               {\Rn{#1}}%
               {\optionerror{volumeformat}}}}}}{#1}}
```

With the `parens` and `brackets` options, the related entries are enclosed in parentheses (or brackets) defined specifically, because in the case of cascading entries, they must be eliminated starting from the second entry. This is done below with the `begrelatedloop` macro. See section 10.1.6.

```
\DeclareFieldFormat{related}{%
  \ifdefstring{\bbx@relatedformat}{parens}%
  {\mkrelatedparens{#1}}%
  {\ifdefstring{\bbx@relatedformat}{brackets}%
    {\mkrelatedbrackets{#1}}%
    {\ifdefstring{\bbx@relatedformat}{semicolon}%
      {#1}%
      {\optionerror{relatedformat}}}}}%
\DeclareFieldAlias{related:origpubin}{related}
\DeclareFieldAlias{related:origpubas}{related}
\DeclareFieldFormat{relatedstring:default}{#1\addspace}
```

10.1.5 New macros

Experimental in version 1.9.4. The `translatorstrg` and `translator+othersstrg` macros do not use the `editortype` format so we add it for consistency with `editorstrg` and `editor+othersstrg` from `biblatex.def`. The idea behind this feature is that in this way you can change the format of the editor, translator, etc. following the year label simply with `\DeclareFieldFormat`.

```
\renewbibmacro*{translatorstrg}{%
  \printtext[editortype]{%
    \ifboolexpr{
      test {\ifnumgreater{\value{translator}}{1}}
      or
      test {\ifandothers{translator}}
    }
    {\bibstring{translators}}
    {\bibstring{translator}}}}
\renewbibmacro*{translator+othersstrg}{%
  \ifboolexpr{
    test {\ifnumgreater{\value{translator}}{1}}
    or
    test {\ifandothers{translator}}
  }
  {\def\abx@tempa{translators}}
```

```
  {\def\abx@tempa{translator}}%
  \ifnamesequal{translator}{commentator}
  {\appto\abx@tempa{co}%
    \clearname{commentator}}
  {\ifnamesequal{translator}{annotator}
    {\appto\abx@tempa{an}%
      \clearname{annotator}}
    {}}%
  \ifnamesequal{translator}{introduction}
  {\appto\abx@tempa{in}%
    \clearname{introduction}}
  {\ifnamesequal{translator}{foreword}
    {\appto\abx@tempa{fo}%
      \clearname{foreword}}
    {\ifnamesequal{translator}{afterword}
      {\appto\abx@tempa{af}%
        \clearname{afterword}}
      {}}}%
  \printtext[editortype]{\bibstring{\abx@tempa}}}
```

The default macros for indexing include the `indextitle` field (which defaults to `title`). This involves getting an index with names and titles together. So we redefine the following two macros in order to get a simple index of names.

```
\renewbibmacro*{citeindex}{%
  \ifciteindex
    {\indexnames{labelname}}
    {}}
\renewbibmacro*{bibindex}{%
  \ifbibindex
    {\indexnames{labelname}}
    {}}
```

Here we (re)define different macros used to print various fields.

```
\newbibmacro*{volnumdefault}{%
  \printfield{volume}%
    \setunit*{\volnumpunct}%
    \printfield{number}}

\newbibmacro*{volnumparens}{%
  \nopunct%
  \printtext[pureparens]{%
    \printfield{volume}%
      \setunit*{\volnumpunct}%
    \printfield{number}}}

\newbibmacro*{volnumstrings}{%
  \iffieldundef{volume}{}{%
    \printfield{volume}\setunit*{\volnumpunct}}%
  \iffieldundef{number}{}{%

  {\printtext{\bibstring{translationas}}}{}%
  \printtext{\addspace}%
  \relatedcite{\thefield{related}}}
```

We redefine the `begrelatedloop` macro to avoid nested parentheses in cascading related entries. In this way, with the `parens` and `brackets` options, only the entire block of the related entries will be enclosed in parentheses (or brackets), while the subordinated entries will be separated with a semicolon.

```
\renewbibmacro*{begrelatedloop}{%
  \renewrobustcmd*{\mkrelatedparens}{\relatedpunct}%
  \renewrobustcmd*{\mkrelatedbrackets}{\relatedpunct}}
```

This macro tests the value of the `relatedformat` option. If it sets to `semicolon` the macro adds `\relatedpunct` (i.e. a semicolon plus a space), otherwise it adds a simple space.

```
\newbibmacro*{phil:related}{%
  \iftoggle{bbx:related}

10.3 philosophy-classic.bbx

10.3.1 Initial settings

```
\RequireBibliographyStyle{authoryear-comp}
\RequireBibliographyStyle{philosophy-standard}

\newtoggle{bbx:square}
\newtoggle{bbx:nodate}

```

```
\DeclareBibliographyOption{square}[true]{%
  \settoggle{bbx:square}{#1}}
\DeclareBibliographyOption{nodate}[true]{%
  \settoggle{bbx:nodate}{#1}}
```

We define the `nodate` option also to be used in the optional argument of `\printbibliography`:

```
\blx@kv@defkey{blx@bib1}{nodate}[]{}%
\blx@kv@defkey{blx@bib2}{nodate}[true]{%
  \ifstrequal{#1}{false}{\togglefalse{bbx:nodate}}{}}%
```

The `mergedate` option from `authoryear.bbx` must be completely redefined. We actually revise only the `date+extradate` macro and all the `issue+date` macros except for that one in the `\bbx@opt@mergedate@maximum`. The test `\ifboolexpr` is required to make `bbx:nodate` macro work properly and the `\postsepyear` command is used to surround the date label with a box of fixed width.

```
\def\bbx@opt@mergedate@maximum{%
  \renewbibmacro*{date+extradate}{%
    \iffieldundef{labelyear}
      {\usebibmacro{bbx:nodate}}
      {\postsepyear{%

```

Now we can execute all the style-specific options previously defined. We also define other default options according to the style features.

```
\ExecuteBibliographyOptions{%
  nodate      = true,
  mergedate   = basic,
  uniquename  = false,
  pagetracker = true,
  singletitle = false,
  square      = false,
  dashed      = true,
}
```

The `\postsepyear` is introduced here for convenience. It will be significantly redefined in `philosophy-modern.bbx` below.

```
\newcommand*{\postsepyear}[1]{%
  \printtext[parens]{#1}}
\newbibmacro*{bbx:nodate}{%
    \iftoggle{bbx:nodate}{%
      \postsepyear{\midsentence\bibstring{nodate}}{}}}
```

The `classic` and `modern` styles redefine the `relateddate` and `commarelateddate` macros because the date has to be printed after the name of the author/editor. In the list of shorthands we need a standard entry, with the date at the end and no date after the name of the author/editor. So we overwrite these macros locally.

```
\AtBeginShorthands{%
\renewcommand{\labelnamepunct}{\addcomma\space}%
\renewbibmacro*{relateddate}{%
  \setunit*{\addspace}%
  \printdate}%
\renewbibmacro*{commarelateddate}{%
```

```
  \setunit*{\addcomma\space}%
  \printdate}%
```

In the list of shorthands the author-date format is useless but the cross-referenced entries still require this format. So we first save the `date+extradate` then we redefine it so that it print nothing and finally we restore it in the definition of `\bbx@crossref@inbook` command. The redefinition of `\postsepyear` is also required here because the next codes are inherited by the `modern` style which globally define `\postsepyear`.

```
\savebibmacro{date+extradate}
\renewbibmacro*{date+extradate}{}

We redefine the `relateddate` bibliography macro to delete the date at the end of the entry.

```
\renewbibmacro*{relateddate}{}
\renewbibmacro*{commarelateddate}{}
```

10.3.2 Authors and editors

In the `author` macro add the `nameaddon` test which prints the `nameaddon` field (if defined) inside brackets. Moreover we use the new `editorstrgdelim` delimiter previously defined in `philosophy-standard.bbx` which defaults to `\addspace`. In the `editor` macro we modify only the line which uses the `editorstrgdelim` delimiter. In the `translator` macro we modify also the line with #1 (this is missing in the code provided by `authoryear.bbx`).

```
\renewbibmacro*{author}{%

```

Execute default options.

```
\ExecuteBibliographyOptions{yearleft=false}
```

The separator to be printed after the name is omitted in the modern style.

```
\renewcommand{\labelnamepunct}{}
```

We declare and set two new lengths: \yeartitle and \postnamesep.

```
\newlength{\yeartitle}
\newlength{\postnamesep}
\setlength{\yeartitle}{0.8em}
\setlength{\postnamesep}{0.5ex plus 2pt minus 1pt}
```

These three standard lengths are redefined according to the desired characteristics.

```
\setlength{\bibitemsep}{\postnamesep}
\setlength{\bibnamesep}{1.5ex plus 2pt minus 1pt}
\setlength{\bibhang}{4\parindent}
```

In the list of shorthands we in fact restore the classic style resetting \postsep and \labelnamepunct.

```
\AtBeginShorthands{%
  \renewcommand{\postsep}{\addspace}%
  \renewcommand{\labelnamepunct}{\newunitpunct}}
\AtBeginBibliography{%
  \iftoggle{bbx:yearleft}{%
    \setlength{\yeartitle}{\fill}}{}}
```

The next two codes are the core of the modern style. \postsep is the space to be printed after the name (author/editor…) and \postsepyear sets the box that encloses the date label. \nopunct is required to remove the potential punctuation in the field to be printed after the date label. This is useful for entries without an author or an editor such as @periodical or @online.

```
\newcommand{\postsep}{%
  \null\par\nobreak\vskip\postnamesep%

10.5 Bibliography drivers

In the `@set` entry type we restore the `classic` style from the second entry onward, using the `entrysetcount` counter. The `annotation` field is cleared before the first entry is processed and restored at the end of the set.

```
\DeclareBibliographyDriver{set}{%
  \savefield{annotation}{\@phil@nnote}%
  \clearfield{annotation}%
  \entryset{\ifnumgreater{\thefield{entrysetcount}}{1}%
    {\blx@kv@setkeys{blx@bib2}{restoreclassic}}{}}{}%
  \newunit\newblock
  \restorefield{annotation}{\@phil@nnote}%
  \usebibmacro{pageref}%
  \usebibmacro{finentry}}
```

10.6 `philosophy-verbose.cbx`

10.6.1 Initial settings

```
\RequireCitationStyle{verbose-trad2}

\newtoggle{cbx:commacit}

\DeclareBibliographyOption{commacit}[true]{%
  \settoggle{cbx:commacit}{#1}}

\ExecuteBibliographyOptions{%
  idemtracker=false,
  loccittracker=strict,
  commacit=false}
```

The `annotation` field is omitted in every citation:

```
\AtEveryCite{\togglefalse{bbx:annotation}}
```

10.6.2 New macros

These two macros come from `verbose-trad1.cbx` without any changes:

```
\newbibmacro*{cite:opcit}{%
  \printtext[bibhyperlink]{\bibstring[\mkibid]{opcited}}}

\newbibmacro*{cite:loccit}{%
  \printtext{%
    \bibhyperlink{cite\csuse{cbx@lastcite@\thefield{entrykey}}}{%
      \bibstring[\mkibid]{loccit}}}%
  \global\toggletrue{cbx:loccit}}
```

The following macros come from `verbose-trad2.cbx` and has been redefined according to the desired features.

```
\renewbibmacro*{cite:ibid}{%
```

```
  \ifloccit
  {\usebibmacro{cite:loccit}}{%
    \printtext{%
      \bibhyperlink{cite\csuse{cbx@lastcite@\thefield{entrykey}}}{%
        \bibstring[\mkivi]{ibidem}}}}%

\renewbibmacro*{cite:title}{%
  \ifsingletitle{\usebibmacro{cite:opcit}}{%
    \printtext[bibhyperlink]{%
      \printfield[citetitle]{labeltitle}%
      \iftoggle{cbx:commacit}{\setunit{\addcomma\space}}%
      {\setunit{\addspace\midsentence}}}%
    \bibstring{opcit}}}
```

10.6.3 Citation commands

The `cite:full` macro employs the bibliography driver to print the entry so it has to be redefined in order to use the `scdefault` name format when `scauthor=cite` or `scauthor=full` options are active. The test for the `shorthandintro` option allows for shorthand also in the first citation of an entry.

```
\newbibmacro{cite:full:noshorthand}{%
    \usebibmacro{cite:full:citepages}%
    \global\toggletrue{cbx:fullcite}%
    \printtext[bibhypertarget]{%
      \usedriver
      {\iftoggle{cbx:scauthorscite}{%
      \DeclareNameAlias{sortname}{scdefault}}%
      {\DeclareNameAlias{sortname}{default}}}%
      {\thefield{entrytype}}}}

\renewbibmacro*{cite:full}{%
\iffieldundef{shorthand}
  {\usebibmacro{cite:full:noshorthand}}
  {\iftoggle{cbx:shorthandintro}
    {\usebibmacro{cite:full:noshorthand}%
     \usebibmacro{shorthandintro}}%
    {\usebibmacro{cite:shorthand}}}}

\renewbibmacro*{cite:idem}{%
  \iftoggle{cbx:scauthorscite}{%
    \bibstring[\mkbibsc]{idem\thefield{gender}}}{%
    \bibstring[\mkibid]{idem\thefield{gender}}}%
  \setunit{\nametitledelim}}
```

A new macro to be used in the new `\ccite` command defined below.

```
\newbibmacro*{ccite:cite}{%
%  \usebibmacro{related:clearauthors}%
  \usebibmacro{cite:citepages}%
  \global\togglefalse{cbx:fullcite}%
  \global\togglefalse{cbx:loccit}%
```

```
  \bibhypertarget{cite\the\value{instcount}}{%
    \ifciteseen
    {\iffieldundef{shorthand}
      {\usebibmacro{cite:title}%
        \usebibmacro{cite:save}}
      {\usebibmacro{cite:shorthand}}}
    {\usebibmacro{cite:full}%
      \usebibmacro{cite:save}}}}
```

The `\fullcite` command employs the bibliography driver to print the entry so it has to be redefined in order to use the `scdefault` name format with `scauthor=cite` or `scauthor=full` options.

```
\DeclareCiteCommand{\fullcite}
  {\usebibmacro{prenote}}
  {\usedriver

    {\usebibmacro{#2}}}
```

10.7.2 New macros

The `cbx:testshorthand` macro provide a test for the `shorthandintro` option. This is the same for both author-title and author-year styles. The shorthand intro is printed only if the `shorthandintro` option is active and the entry has not been previously cited. Note that this

macro is used only when the shorthand exists (see below).

```
\newbibmacro*{cbx:testshorthand}[1]{%
\ifboolexpr{
  not test {\iftoggle{cbx:shorthandintro}}
    or
  test \ifciteseen}
  {\usebibmacro{cite:shorthand}}{\usebibmacro{#1}%
   \usebibmacro{shorthandintro}}}
```

Author-title macros Import from `authortitle-comp.cbx` all the macros but `cite:shorthand` that has been loaded above.

```

```

10.7.3 Citation commands

These are two common commands for authortitle-comp and authoryear-comp that require the \switchATAY to be executed internally.

```
\DeclareCiteCommand*{\cite}
  {\usebibmacro{cite:init}%
   \usebibmacro{prenote}}
  {\usebibmacro{citeindex}%
    \switchATAY{citetitle:AT}{citeyear}}%
  {}
  {\usebibmacro{postnote}}

\DeclareCiteCommand*{\parencite}[\mkbibparens]
  {\usebibmacro{cite:init}%
   \usebibmacro{prenote}}
  {\usebibmacro{citeindex}%
    \switchATAY{citetitle:AT}{citeyear}}
  {}
  {\usebibmacro{postnote}}
```

These citation commands come from biblatex.def. Maybe they should not be redefined. Do we really need years and titles hyperrefered?

```
\DeclareCiteCommand{\citetitle}
  {\boolfalse{citetracker}%
   \boolfalse{pagetracker}%
   \usebibmacro{prenote}}
  {\ifciteindex
     {\indexfield{indextitle}}
     {}%
   \printtext[bibhyperref]{\printfield[citetitle]{labeltitle}}}
  {\multicitedelim}
  {\usebibmacro{postnote}}

\DeclareCiteCommand*{\citetitle}
  {\boolfalse{citetracker}%
```

```
   \boolfalse{pagetracker}%
   \usebibmacro{prenote}}
  {\ifciteindex
     {\indexfield{indextitle}}
     {}%
   \printtext[bibhyperref]{\printfield[citetitle]{title}}}
  {\multicitedelim}
  {\usebibmacro{postnote}}

\DeclareCiteCommand{\citeyear}
  {\boolfalse{citetracker}%
   \boolfalse{pagetracker}%
   \usebibmacro{prenote}}
  {\printtext[bibhyperref]{\printfield{year}}}
  {\multicitedelim}
  {\usebibmacro{postnote}}

\DeclareCiteCommand*{\citeyear}
  {\boolfalse{citetracker}%
   \boolfalse{pagetracker}%
   \usebibmacro{prenote}}
  {\printtext[bibhyperref]{\printdateextra}}
  {\multicitedelim}
  {\usebibmacro{postnote}}

\DeclareCiteCommand{\citedate}
  {\boolfalse{citetracker}%
   \boolfalse{pagetracker}%
   \usebibmacro{prenote}}
  {\printtext[bibhyperref]{\printdate}}
  {\multicitedelim}
  {\usebibmacro{postnote}}

\DeclareCiteCommand*{\citedate}
  {\boolfalse{citetracker}%
   \boolfalse{pagetracker}%
   \usebibmacro{prenote}}
  {\printtext[bibhyperref]{\printdateextra}}
  {\multicitedelim}
  {\usebibmacro{postnote}}
```

The `\fullcite` command employs the bibliography driver to print the entry so it has to be redefined in order to use the `scdefault` name format with `scauthor=cite` or `scauthor=full` options.

```
\DeclareCiteCommand{\fullcite}
  {\usebibmacro{prenote}}
  {\usedriver
    {\iftoggle{cbx:scauthorscite}%
      {\DeclareNameAlias{sortname}{scdefault}}%
      {\DeclareNameAlias{sortname}{default}}}%
  {\thefield{entrytype}}}
```

```
  {\multicitedelim}
  {\usebibmacro{postnote}}
```

This is the only new command provided by the style:

```
\DeclareCiteCommand{\footcitet}[\mkbibfootnote]
  {\usebibmacro{cite:init}}
  {\usebibmacro{citeindex}%
   \usebibmacro{textcite}}
  {}%
  {\usebibmacro{textcite:postnote}}
```

This next command is now deprecated because it is substituted by the `entrysubtype=classic` mechanism.

```
\DeclareCiteCommand{\sdcite}
  {\boolfalse{citetracker}%
   \boolfalse{pagetracker}%
   \usebibmacro{prenote}}
  {\indexnames{labelname}%
   \printtext[bibhyperref]{\printnames{labelname}}%
   \setunit{\addcomma\space}%
   \indexfield{indextitle}%
   \printtext[bibhyperref]{\printfield[citetitle]{labeltitle}}}
  {\multicitedelim}
  {\usebibmacro{postnote}}
```

10.8 philosophy-modern.cbx

The `modern` style uses the `classic` citation scheme:

```
\RequireCitationStyle{philosophy-classic}
```

Here we only redefine `\fullcite` in order to have the `classic` style via `restoreclassic` format.

```
\DeclareCiteCommand{\fullcite}
  {\usebibmacro{prenote}}
  {\blx@kv@setkeys{blx@bib2}{restoreclassic}%
  \usedriver
    {\iftoggle{cbx:scauthorscite}%
      {\DeclareNameAlias{sortname}{scdefault}}%
      {\DeclareNameAlias{sortname}{default}}}%
  {\thefield{entrytype}}}
  {\multicitedelim}
  {\usebibmacro{postnote}}
```

10.9 italian-philosophy.lbx

The custom localization module of these style inherits the standard `italian.lbx` module. There is only one new string: `opcited`. The other strings are redefined according to the

particular features of the style.

```
\InheritBibliographyExtras{italian}

\DeclareBibliographyExtras{%
```

We prefer the simple dash (-) to the en dash (–) for page and date ranges.

```
  \protected\def\bibrangedash{-\penalty\hyphenpenalty}%
  \protected\def\bibdaterangesep{\bibrangedash}%
}%
```

The `opcit` string used by the `verbose-trad2` style works like the Italian 'cit.' and it is already defined in the `italian.lbx` file with "cit.". The string "cit.' is added to a truncated entry (usually after the short title) to mark that it has been previously cited. Additionally in the Italian bibliographies there is also the special string "op. cit." which stands for "the only entry" of an author. For example, if "Eco, *Il nome della rosa*" is the only entry of Eco cited in the paper, from the second occurence it will be abbreviated with "Eco, *op. cit.*". So we need a new string, `opcited`, in order to get "op. cit." for these cases:

```
\NewBibliographyString{opcited}
```

First of all we inherit the italian localization module and then we define the new string `opcited` and the other strings as well.

```
\DeclareBibliographyStrings{%
  inherit            = {italian},
  opcited          = {{op\adddotspace cit\adddot}{op\adddotspace cit\adddot}},
```

Redefined strings:

```
  ibidem             = {{ivi}{ivi}},
  loccit             = {{ibidem}{ibidem}},
  editor             = {{a cura di}{a cura di}},
  editors            = {{a cura di}{a cura di}},

  astitle            = {{come}{come}},
  bypublisher        = {{\addcomma\space}{\addcomma\space}},
  section            = {{sezione}{sez\adddot}},
 sections        = {{sezioni}{\iftoggle{bbx:classical}{sezz\adddot}{sez\adddot}}},
  withcommentator    = {{commenti di}{commenti di}},
  withannotator      = {{annotazioni di}{annotazioni di}},
  withintroduction   = {{introduzione di}{introduzione di}},
  withforeword       = {{prefazione di}{prefazione di}},
  withafterword      = {{postfazione di}{postfazione di}},
```

The endothers and andmore strings must be printed in italic shape when using the latinemph option so we add \mkibid. Adding it to the wrapper of the \bibstring command in the name:andothers and list:andothers macros is a wrong choice because some languages (for example German) uses non Latin expressions for those strings.

```
 andothers       = {{\mkibid{et\addabbrvspace al\adddot}}{\mkibid{et\addabbrvspace al\adddot}
 andmore         = {{\mkibid{et\addabbrvspace al\adddot}}{\mkibid{et\addabbrvspace al\adddot}
```

The followings strings are not yet defined in italian.lbx file:

```
 reviser            = {{revisore}{rev\adddot}},% FIXME: missing
 revisers           = {{revisori}{rev\adddot}},% FIXME: missing

```
\InheritBibliographyExtras{french}

\DeclareBibliographyExtras{%
```

The `french.lbx` localization module redefines `\mkbibnamefamily` in order to get the family name in small caps. We do not like this approach because an author could use a localization module without adhering to the typographical standards which should be indipendent from the linguistic standards. For this reason we prefer to reset it to the default definition.

References

This is the primary bibliography of this document and it is typeset in `classic` style (through the `restoreclassic` option) even if the bibliography style of the document is `philosophy-modern`. This is particularly useful for typesetting bibliographies in which there is only one entry for an author, such as the Web lists. See the example above (p. 22).

Braams, Johannes L. [with Javer Bezos] (2020), *Babel. Localization and internationalization*, version 3.41, Feb. 28, 2020, http://mirrors.ctan.org/macros/latex/contrib/babel/babel.pdf.

This manual describes babel, a package that makes use of the capabilities of TEX version 3 and, to some extent, xetex and luatex, to provide an environment in which documents can be typeset in a language other than US English, or in more than one language or script. However, no attempt has been done to take full advantage of the features provided by the latter, which would require a completely new core (as for example polyglossia or as part of LATEX3).

Charette, François [with Arthur Reutenauer, Bastien Roucariès and Jürgen Spitzmüller] (2020), *Polyglossia: Modern multilingual typesetting with XELATEX and LuaLATEX*, version 1.47, Jan. 29, 2020, http://mirrors.ctan.org/macros/latex/contrib/babel/babel.pdf.

Polyglossia is a package for facilitating multilingual typesetting with XELATEX and (with some exceptions) LuaLATEX. Basically, it can be used as an alternative to babel for performing the following tasks automatically: 1. Loading the appropriate hyphenation patterns. 2. Setting the script and language tags of the current font (if possible and available), via the package fontspec. 3. Switching to a font assigned by the user to a particular script or language. 4. Adjusting some typographical conventions according to the current lan- guage (such as afterindent, frenchindent, spaces before or after punctuation marks, etc.). 5. Redefining all document strings (like "chapter", "figure", "bibliography"). 6. Adapting the formatting of dates (for non-Gregorian calendars via external packages bundled with polyglossia: currently the Hebrew, Islamic and Farsi calendars are supported). 7. For languages that have their own numbering system, modifying the formatting of numbers appropriately (this also includes redefining the al- phabetic sequence for non-Latin alphabets). 8. Ensuring proper directionality if the document contains languages that are written from right to left (via the package bidi, available separately).

Clawson, James (2016), biblatex-mla. *MLA Style Using* Biblatex, version 1.9, Nov. 2, 2016, http://mirrors.ctan.org/macros/latex/contrib/biblatex-contrib/biblatex-mla/doc/biblatex-mla.pdf.

Biblatex-mla provides support to biblatex, BIBTEX, and LATEX for citations and Works Cited lists in the style established by the Modern Language Association (MLA). For commands and options to change package defaults, see § 3.1 and § 3.2, respectively, below. MLA style, a common standard for writers in the humanities, is outlined in the *MLA Style Manual*, in its 3rd edition, and the *MLA Handbook for Writers of Research Papers*, now in its 8th edition. Biblatex-mla follows the style outlined in the latter of these. It also follows the logic of the MLA when citing similar material repeatedly, trimming unnecessary information from citations where necessary. Biblatex-mla is compatible with Biblatex's support for hyperref and tex4ht, and the main word in each citation (either the author's name, the title, or the page number) serves as a link to the particular entry in the Works Cited.

Gliboff, Sander (2010), *User's Guide to* Historian. *A Footnotes-and-Bibliography Style, Following Turabian/Chicago Guidelines: For Use with the* Biblatex *System of Programmable Bibliographies and Citations*, version 0.4, Aug. 22, 2010, http://mirrors.ctan.org/macros/latex/contrib/biblatex-contrib/biblatex-historian/historian.pdf.

The files historian.bbx, historian.cbx, and historian.lbx implement a bibliography and citation style for use with Philipp Lehman's biblatex package. Historian follows the conventions of *The Chicago Manual of Style*, as presented in Turabian's *Manual for Writers*. The style is designed for use by historians who need to generate detailed footnotes not only for ordinary books and articles, but also reprint editions, correspondence, archives and archival documents, online sources, book reviews, unpublished manuscripts, and conference presentations.

Kime, Philip and François Charette (2019), biber. *A backend bibliography processor for* biblatex, version 2.14, Dec. 1, 2019, http://biblatex-biber.sourceforge.net.

Biber is conceptually a BIBTEX replacement for biblatex. It is written in Perl with the aim of providing a customised and sophisticated data preparation backend for biblatex. You do not need to install Perl to use Biber—binaries are provided for many operating systems via the main TEX distributions (TEX Live, MacTEX, MiKTEX) and also via download from SourceForge. Functionally, Biber offers a superset of BIBTEX's capabilities

but is tightly coupled with biblatex and cannot be used as a stand-alone tool with standard .bst styles. Biber's primary role is to support biblatex by performing the following tasks: Parsing data from datasources; Processing cross-references, entry sets, related entries; Generating data for name, name list and name/year disambiguation; Structural validation according to biblatex data model; Sorting reference lists; Outputting data to a .bbl for biblatex to consume.

Lehman, Philipp [with Philip Kime and Moritz Wemheuer] (2019), *The* biblatex *Package. Programmable Bibliographies and Citations*, version 3.14, Dec. 1, 2019, http://mirrors.ctan.org/macros/latex/contrib/biblatex/doc/biblatex.pdf.

This package provides advanced bibliographic facilities for use with LaTeX. The package is a complete reimplementation of the bibliographic facilities provided by LaTeX. The biblatex package works with the "backend" (program) biber, which is used to process BibTeX format data files and them performs all sorting, label generation (and a great deal more). Formatting of the bibliography is entirely controlled by TeX macros. Good working knowledge in LaTeX should be sufficient to design new bibliography and citation styles. This package also supports subdivided bibliographies, multiple bibliographies within one document, and separate lists of bibliographic information such as abbreviations of various fields. Bibliographies may be subdivided into parts and/or segmented by topics. Just like the bibliography styles, all citation commands may be freely defined. Features such as full Unicode support for bibliography data, customisable sorting, multiple bibliographies with different sorting, customisable labels and dynamic data modification are available.

Lehman, Philipp and Joseph Wright (2019), *The* csquotes *Package. Context Sensitive Quotation Facilities*, version 5.2j, Dec. 6, 2019, http://mirrors.ctan.org/macros/latex/contrib/csquotes/csquotes.pdf.

This package provides advanced facilities for inline and display quotations. It is designed for a wide range of tasks ranging from the most simple applications to the more complex demands of formal quotations. The facilities include commands, environments, and user-definable 'smart quotes' which dynamically adjust to their context. Quotation marks are switched automatically if quotations are nested and can adjust to the current language. There are additional features designed to cope with the more specific demands of academic writing. All quote styles as well as the optional active quotes are freely configurable.

Pantieri, Lorenzo and Tommaso Gordini (2019), *L'arte di scrivere con LaTeX. Un'introduzione a LaTeX*, forew. by Enrico Gregorio, http://www.lorenzopantieri.net/LaTeX_files/ArteLaTeX.pdf.

Lo scopo di questo lavoro, rivolto sia a chi muove i primi passi in LaTeX sia a quanti già lo conoscono, è di offrire ai suoi utenti italiani le conoscenze essenziali per poterlo usare con successo. I concetti fondamentali della materia, raccolti da svariati manuali, vengono presentati nel modo più chiaro e organico possibile; nel contempo si fornisce un vasto campionario di esempi e si analizzano alcuni tipici problemi che potrebbero presentarsi nella redazione di una pubblicazione scientifica o professionale in italiano, indicando per ciascuno le soluzioni per noi migliori.

Waßenhoven, Dominik (2016), biblatex-dw, version 1.7, Dec. 6, 2016, http://mirrors.ctan.org/macros/latex/contrib/biblatex-contrib/biblatex-dw/doc/biblatex-dw.pdf.

biblatex-dw is a small collection of styles for the biblatex package. It was designed for citations in the Humanities and offers some features that are not provided by the standard biblatex styles. biblatex-dw is dependent on biblatex – version 1.7 needs at least version 3.3 of biblatex and was tested with biblatex version 3.6 and biber version 2.6.

Change History

v0.4 biblatex version 0.9 1

General: Improved compatibility for

v0.5
General: Added new bibliography style philosophy-verbose. Added localization file italian-philosophy.lbx. Added package options origparens, origbrackets, latinemph. Changed package options scauthors, scauthorscite, scauthorsbib. Renamed file biblatex-philosophy-doc.tex to philosophy-authoryear-doc.tex. Added file philosophy-verbose-doc.tex. Updated documentation 1
v0.6
General: Added localization file italian-philosophy.lbx. Added file philosophy-standard.bbx. New documentation file biblatex-philosophy. Removed files philosophy-authoryear-doc.tex, philosophy-verbose-doc.tex. . 1
v0.7
General: Removed package option colonloc. Removed package options origparens origbrackets. Added package options origfieldsformat, publocformat, commacit, inbeforejournal, romanvol, volnumformat. Added command volnumpunct. Added citation commands \sdcite, \ccite. Updated documentation 1
v0.7a
General: Added command volumfont. Added command footcitet. Updated documentation 1
v0.7b
General: Removed package option romanvol. Added package option volumeformat. Added package option editionformat. Activated the option singletitle for style philosophy-verbose. Added bibliography driver @review. Added bibliography string cit. Added bibliography string reviewof. Updated documentation 1
v0.7c
General: Fixed some bugs. New origfieldtype option. Added nodate bibliography string. Updated documentation 1
v0.8a
General: New entrysubtype field for citing classical texts. New related field mechanism. New relatedformat option. New English documentation. Fixed some bugs 1
v0.8b
General: Added biber.conf configuration file 1
v0.8c
General: Removed biber.conf configuration file. Added internal biber settings with \DeclareDriverSourcemap command. Added trans- field alias 1
v0.8d
General: Fixed some bugs related to \DeclareDriverSourcemap, \ccite, and @review entry type . . 1
v0.8e
General: Improved relatedformat option for cascading entries. Implemented cross-referencing mechanism for @inproceedings entries. Improved \ccite command. Changed the values for the entrysubtype from classical to classic. Added nodate package option. 1
v0.8f
General: New option nodate for \printbibliography command . 1
v0.9a
General: Maintenance release. Corrected some bugs. 1
v0.9b
General: Updated bibliography drivers to correct a bug when using the related mechanism. 1
v0.9c
General: Maintenance release. Corrected some bugs. 1
v0.9d
General: Maintenance release.

Corrected some bugs. 1
v0.9e
General: Maintenance release. Updated documentation. 1
v0.9f
General: Updated documentation. Fixed a bug in the volnumformat option. 1
v0.9g
General: Added localization module for spanish. Fixed a bug in @inbook and @incollection entries when using crossref field. Updated documentation. 1
v0.9h
General: New option lowscauthors. Corrected some bugs. Updated documentation. 1
v0.9i
General: Fixed a bug with shorthandintro option. 1
v1.0
General: Fixed a bug in volumeformat and volnumformat options. Change value romanupp to Roman in volume format and edition format. Corrected bug in related format options: now the related block is not preceded by semicolon when using values parens and brackets styles. §updated documentation 1
v1.1
General: Maintenance release. Updated documentation. 1
v1.2
General: Maintenance release. New value superscript for editionformat option. 1
v1.3
General: Maintenance release. Corrected a spurious space in article entries. 1
v1.4
General: Maintenance release. Updated style for working with biblatex v.3.4. 1
v1.5
General: Improved compatibility with legacy BibTeX backend. 1
v1.6
General: Removed compatibility with legacy BibTeX backend. 1
v1.7
General: Maintenance release. Updated documentation. 1
v1.8
General: Maintenance release. Corrected an incompatibility with scauthors option. 1
v1.9
General: Redefined ibidem and loccit strings in file english-philosophy.lbx according to the Chicago Manual of Style. 1
v1.9.1
General: Redefined macros for the eechanism. Support for the @set entries for classic style. Support for the origpubin and origpubas default related types. Improved .lbx files. Updated documentation. 1
v1.9.2
General: Support for multivolume related type. The origed string is substituted with origpubas (redefined for Italiana and Spanish). New string opcited. Deleted cited string. New multi-value option scauthors substitutes scauthorcite and scauthorbib options. Updated documentation. . 1
v1.9.3
General: Maintenance release. Reset philosophy-verbose.cbx to version 1.9. Moved labelname format from philosophy-standard.bbx to philosophy-classic.cbx. 1
v1.9.4
General: Maintenance release. Fixed some bugs in modern style. 1
v1.9.5
General: Styles completely revised. Provided support for the mergedate default option. latinemph option defined globally. New values for scauthors option. Support for the @set entries for modern style. classical option removed for Spanish. Provided experimental French localization

module. Improved annotation option. Updated documentation. . . 1
v1.9.6
General: Maintenance release. Fixed a bug in the \fullcite command. . 1
v1.9.7
General: Maintenance release. Fixed a bug in the @set bibliography driver. 1
v1.9.8
General: Maintenance release. Updated macros involving extrayear component. 1
v1.9.8a
General: Maintenance release. Corrected missing commas in some .lbx files. 1
v1.9.8b
General: Maintenance release. Fixed a bug in @incollection and @inproceeding without editor. . . 1
v1.9.8c
General: Maintenance release. Fixed a bug in the related entries. Added \mkrelatedparens and \mkrelatedbrackets. 1
v1.9.8d
General: Changed crossrefdata macro. Updated italian-philosophy.lbx. . . . 1
v1.9.8e
General: New option iviemph. Updated documentation. 1
v1.9.8f
General: Fixed a bug in the @inbook entries occurring when author and bookauthor are the same person. . 1
v1.9.8g
General: Fixed a bug related to the @volumeformat option. 1

Index

Numbers written in italic refer to the page where the corresponding entry is described; numbers underlined refer to the code line of the definition; numbers in roman refer to the code lines where the entry is used.
