Title of presentation

Author

Date and place of presentation

Title of first page

This is an example of a LaTeX `itemize` list

- first line in an itemized list
- second line in an itemized list
- third line in an itemized list

Title of second page*

The second page with nested, "vertically compressed" lists using the `citemize` and `cenumerate` environments.

- first line in an itemized list
- second line in an itemized list
  1. first line of numbered list
  2. second line of numbered list
- final line in itemized list†

For footnotes, the `footmisc` package, providing the options `perpage` and `symbol`, is recommended.

* footnotes are often not a good idea for a presentation † ... it is therefore useful to write comments into a single footnote paragraph in order to save space

Title of third page

environment name: `cdescription`, comparable to LaTeXs `description` environment

used for: vertically compressed lists with small "titles"

A page with two columns

The “CTAN TEX-lion” drawn by Duane Bibby, thanks to `ctan.org`

A final page written with the `rsli` environment

- This slide type is intended to be used for freely arranged text and graphics.
- In contrast to `psli`-slides, the contents are *not* centered vertically.
