1 Introduction

This package provides LaTeX classes to format grant applications for the following federal agencies:

- `grant-afosr` : Air Force Office of Scientific Research
- `grant-aro` : Army Research Office
- `grant-darpa` : Defense Advanced Research Projects Agency
- `grant-doe` : Department of Energy
- `grant-nih` : National Institutes of Health
- `grant-nrl` : Naval Research Laboratory
- `grant-nsf` : National Science Foundation
- `grant-onr` : Office of Naval Research

2 Usage

The example below illustrates how to use the `nsf` class. Substitute `nsf` for any of the above class names to format applications for other federal agencies.

```
% \documentclass{nsf}
%
% \addbibresource{Bibliography.bib}
%
% \begin{document}
%
% \chapter{Project-Summary}
% ...
%
% \chapter{Project-Description}
% ...
%
```

*This document corresponds to grant v0.0.5, dated 2019/02/26.

```
% \chapter{Bibliography \& References Cited}
% \printbibliography[heading=none]
%
% \end{document}
```
