Critical notes

Summarium

This file provides examples of critical notes with reledmac. A critical note is associated to a lemma, marked by `\edtext`, and referenced by the line numbers of the lemma. If a critical notes refers to a long lemma, we can use `lemma` to obtain an abbreviated form.

Here we use four series of critical notes.

- Each note of series A has its own paragraph.
- Each note of series B has its own paragraph, but there are arranged in two columns.
- Each note of series C has its own paragraph, but there are arranged in three columns.
- The notes of series D are arranged in the same paragraph.
