**Abstract**

This file provides an example of typesetting verse for a dramatic text with reledmac and thalie packages.

We use the thalie features to manage characters.

We use the following features of reledmac to typeset the verses:

- `\antilabe` to show correctly the second half of a split line of verse (antilabe);
- `\afterantilabe` to add more space after `\antilabe`;
- `\setcounter{stanzaindentsrepetition}` and `\setcounter{startstanzaindentsrepetition}` to have the first line of a reply/stanza indented, but not the following ones;
- `\skipnumbering` to avoid counting the first half of an antilabe in the line counting.
