1. Introduction

Windy City is a style for biblatex that formats notes, bibliographies, parenthetical citations, and reference lists according to the 17th edition of *The Chicago Manual of Style* (*CMOS*).[1] It accurately handles a wide range of citations in different formats and includes a set of options and commands to support special circumstances. It also has extensive support for citing and arranging different kinds of editors and translators within a single citation. These features make Windy City especially suitable for academic work.

The following sections assume familiarity with *CMOS* and biblatex. Section 2 gives a brief overview of the style's features. Section 3 discusses the assignment and placement of editors and translators. Section 4 discusses several issues with collections, including options for formatting citations of individual volumes. Sections 5 and 6 reproduce examples from *CMOS* chapters 14 and 15, respectively, with occasional commentary and references to other sections.

Windy City requires biblatex version 3.13 or later.

2. Overview

This section covers basic information about Windy City. If you're completely new to biblatex, you should probably glance at its documentation. For the impatient, examples in sections 2.2, 2.3, 5, and 6 might be of more immediate interest.

2.1 Getting Started

If you already know how to use biblatex, getting started with Windy City is easy. First, confirm that biblatex and Windy City are installed properly on your system. Since both are included in some distributions of LaTeX, you might already have them.

Either way, please consider downloading the most recent release of Windy City from its home on CTAN or repository on GitHub. More recent but potentially less reliable updates are available on the main project page.

Windy City consists of four files:

- *windycity.bbx*
- *windycity.cbx*
- *windycity.dbx*
- *american-windycity.lbx*

If you need to install Windy City on your system, you have several options. For a one-off compilation, say, to give Windy City a trial run on a single document, you could copy Windy City's files to the document's root directory. Beyond that, your best option is to install it in your local `texmf`. Copy the files to a directory of your choosing, then update your `texmf` file name database.

To compile a document with Windy City, tell biblatex to load it with the load-time option *style*:

```
\usepackage[style=windycity]{biblatex}
```

Typically, this goes in a document's preamble or in one of its style files.

The localization file *american-windycity.lbx* is responsible for Windy City's American-style punctuation and dates and many of the bibliography strings that print in citations, such as *edited by*. Windy City loads this file if biblatex determines that your document's language is English—either due to settings in babel or polyglossia or because neither babel nor polyglossia has been loaded. You can prevent Windy City from loading *american-windycity.lbx* by commenting the following line in *windycity.bbx*:

```
\DeclareLanguageMapping{english}{american-windycity}
```

If you wish to use Windy City with a language other than English, set it accordingly with babel or polyglossia before loading biblatex. Windy City will then try to load *<language>-windycity.lbx* and, if it's available, use it to override any other localization files that were loaded. This allows you to make your own localization files for Windy City without needing to edit other files. For example, if you load

babel with option *german*, Windy City will try to load *german-windycity.lbx*. If it's available, it will override any other localization files that were loaded, including biblatex's own *german.lbx*.

For some entries in your bibliography database, you may need to add fields or make other adjustments to get the right output. But since Windy City relies as much as possible on standard BibTeX fields, and secondarily on biblatex fields, you may not need to make major changes. The examples in this document and its accompanying bibliography database, *windycity.bib*, should serve as a guide for how to manage your input for nearly every circumstance that the style is meant to handle.

2.2 Standard Citations

For a first set of examples, consider this passage from *CMOS* 14.30:

> 1. Samuel A. Morley, *Poverty and Inequality in Latin America: The Impact of Adjustment and Recovery* (Baltimore: Johns Hopkins University Press, 1995), 24–25.
> 2. Regina M. Schwartz, "Nationals and Nationalism: Adultery in the House of David," *Critical Inquiry* 19, no. 1 (1992): 131–32.
> 3. Ernest Kaiser, "The Literature of Harlem," in *Harlem: A Community in Transition*, ed. J. H. Clarke (New York: Citadel Press, 1964).
> 4. Morley, *Poverty and Inequality*, 43.
> 5. Schwartz, "Nationals and Nationalism," 138.
> 6. Kaiser, "Literature of Harlem," 189–90.

A work's first citation is similar to its entry in the bibliography. It includes all or most of its bibliographic information. Subsequent citations are shorter, usually consisting of a short form of the author's name and a short form of the work's title.

Windy City supports variations on this format. For information on short citations, including the use of *ibid.*, see section 2.3. For options to skip parts of citations, change the order of editors and translators, and more, see sections 2.4 and 2.5. For parenthetical citations, see section 6.

The block below shows Windy City's default bibliography for the previously cited works:

> Kaiser, Ernest. "The Literature of Harlem." In *Harlem: A Community in Transition*, edited by J. H. Clarke. New York: Citadel Press, 1964.
>
> Morley, Samuel A. *Poverty and Inequality in Latin America: The Impact of Adjustment and Recovery*. Baltimore: Johns Hopkins University Press, 1995.
>
> Schwartz, Regina M. "Nationals and Nationalism: Adultery in the House of David." *Critical Inquiry* 19, no. 1 (1992): 131–32.

You may also print a bibliography in the author-date format (what *CMOS* calls a reference list). The key difference is the placement of the publication date after the author's name:

Kaiser, Ernest. 1964. "The Literature of Harlem." In *Harlem: A Community in Transition*, edited by J. H. Clarke. New York: Citadel Press.

Morley, Samuel A. 1995. *Poverty and Inequality in Latin America: The Impact of Adjustment and Recovery*. Baltimore: Johns Hopkins University Press.

Schwartz, Regina M. 1992. "Nationals and Nationalism: Adultery in the House of David." *Critical Inquiry* 19 (1): 131–32.

To make *printbibliography* use the author-date format, load biblatex with Windy City's preamble option *reflist*:

```
\usepackage[reflist,style=windycity]{biblatex}
```

Alternatively:

```
\usepackage[reflist=true,style=windycity]{biblatex}
```

To use the author-date format on a case-by-case basis, run *printbibliography* with an appropriate *env* option. With Windy City, a so-called "bib environment" must set the style's internal *reflist* toggle to *true*. Windy City's own such environment is called *reflist*. Use it as follows:

```
\printbibliography[env=reflist]
```

Unfortunately, while the *env* option allows for differently formatted bibliographies within the same document, the reference lists may have problems with sorting. (You'll notice some in References, at the end of this document.) For best results, use the *reflist* preamble option.

As you proceed through this guide, note that all examples of citations and bibliographies are outputs of the style from commands that you can inspect in the document's source, *windycity.tex*, and in its style file, *windycity.sty*. Almost all citations are from *cite* or *parencite*. A few are from more specialized commands, such as *cite** or *cites*. All example bibliographies are outputs of the style from *printbibliography*. All bibliographic data reside in *windycity.bib*.

2.3 Short Citations

Standard citations may take a variety of shorter forms. Windy City offers several preamble options and other means for producing them.

Let's start with another passage of default output:

1. Toni Morrison, *Beloved* (New York: Vintage International, 2004), 3.
2. Morrison, *Beloved*, 18.
3. Morrison, *Beloved*, 18.

4. Morrison, *Beloved*, 24–26.
5. Toni Morrison, *Song of Solomon* (New York: Vintage International, 2004), 401-2.
6. Morrison, *Song of Solomon*, 433.
7. Junot Díaz, *The Brief Wondrous Life of Oscar Wao* (New York: Riverhead Books, 2007), 37–38.
8. Morrison, *Song of Solomon*, 403.
9. Díaz, *Oscar Wao*, 152.
10. Díaz, *Oscar Wao*, 201-2.
11. Morrison, *Song of Solomon*, 240; Morrison, *Beloved*, 32.
12. Morrison, *Beloved*, 33.

A shorter form of this passage appears in *CMOS* 14.34:[2]

1. Morrison, *Beloved*, 3.
2. Morrison, 18.
3. Morrison, 18.
4. Morrison, 24–26.
5. Morrison, *Song of Solomon*, 401-2.
6. Morrison, 433.
7. Díaz, *Oscar Wao*, 37–38.
8. Morrison, *Song of Solomon*, 403.
9. Díaz, *Oscar Wao*, 152.
10. Díaz, 201-2.
11. Morrison, *Song of Solomon*, 240; *Beloved*, 32.
12. Morrison, *Beloved*, 33.

In this version, a work's first citation gives short names and titles and omits all other publication information. Consecutive citations of a work may omit the title or, as in the eleventh note, the author's name. For citations in this form, use the preamble option *short*. See section 2.4 for more information.

CMOS 14.34 also shows how to render the passage with *ibid.* Unlike previous editions of *CMOS*, the 17th edition discourages its use. Windy City makes it available with the preamble option *ibid* (see section 2.4). Options *short* and *ibid* together give the following:[3]

1. Morrison, *Beloved*, 3.
2. Ibid., 18.
3. Ibid.
4. Ibid., 24–26.

2. Switching forms within a document isn't a feature of the style. For demonstration purposes, though, it's possible.

3. As explained in section 2.4, Windy City won't print *ibid.* in reference to a citation on a previous page. A page break here may affect the output.

5. Morrison, *Song of Solomon*, 401-2.
6. Ibid., 433.
7. Díaz, *Oscar Wao*, 37–38.
8. Morrison, *Song of Solomon*, 403.
9. Díaz, *Oscar Wao*, 152.
10. Ibid., 201-2.
11. Morrison, *Song of Solomon*, 240; *Beloved*, 32.
12. Morrison, *Beloved*, 33.

For a compromise between standard and short forms, try the preamble option *shortfirst*. It swaps long first citations for short ones but otherwise follows the standard form (see section 2.4). For another variant, try *shortafter*, which gives the same output as *short* but with long first citations. Also with standard citations, the preamble option *idemtracker* shortens the author's name of a work's first citation if the previous citation is of the same author (see section 2.4). The entry option *noauth* omits the author's name altogether (see section 2.5). And the *shorthand* field allows you to set an abbreviation to stand in place of the author's name, the work's title, and other elements of a citation (see sections 8.1 and 14.59).

2.4 Preamble Options

A preamble option is an argument for the *\usepackage* macro that loads biblatex. Preamble options affect the format of notes, bibliographies, and reference lists. Windy City relies on many preamble options from biblatex and supports or provides others to allow you to change the default output.

Many options below are *false* by default. Make an option *true* by passing its name to biblatex, with or without *=true*. Using *annotate* as an example, the following are equivalent:

```
\usepackage[annotate,style=windycity]{biblatex}
\usepackage[annotate=true,style=windycity]{biblatex}
```

If an option is *true* by default, make it *false* by passing its name with *=false*. Using *doi* as an example:

```
\usepackage[doi=false,style=windycity]{biblatex}
```

annotate=*true*, *false* default: `false`

This option is for printing annotated bibliographies. Annotations print in block paragraphs below entries. To change the spacing between entries and annotations, change the value of *\bibitemsep*. Save an annotation in the *annotation* field of a work's bibliography database entry.

collsonly=*true*, *false* default: `false`

Citing individual works of a collection adds entries for those works to the bibliography. To exclude them and print only an entry for the whole collection, use *collsonly*. It has no effect on many *incollection* entries, such as articles in books, or on *article* entries cross-referenced to a *periodical*, but it does filter out chapters of books, books in books, and volumes of collections. For discussion of multivolume works, see section 4.2.

dashed=*true*, *false* default: `true`

Set *false* to remove the 3-em dash for repeated names in bibliographies.

doi=*true*, *false* default: `true`

Set *false* to prevent the *doi* field from printing.

eprint=*true*, *false* default: `true`

Set *false* to prevent the *eprint* field from printing. For more information about eprints, see section 2.8.

ibid=*true*, *false* default: `false`

This option controls whether consecutive citations of a work on the same page receive an *ibid*. For examples, see section 2.3 and *CMOS* 14.34. As of the 17th edition, *CMOS* discourages the use of *ibid.*

ibidpage=*true*, *false* default: `false`

If *true*, the *postnote* field won't print if the previous citation on the page is of the same entry with the same *postnote*. The *ibid* preamble option uses *ibidpage*.

idemtracker=*true*, *false*, *context*, *strict*, *constrict* default: `false`

If *true*, the first citation of a work prints with a shortened author's name if the previous citation is of another work by the same author.

Recall *CMOS* 14.34, where the first citation of Toni Morrison's *Song of Solomon* immediately follows citations of her *Beloved*. The default output prints her full name twice, once for the first citation of *Song of Solomon* and again for the first citation of *Beloved*. If *idemtracker* is *true* (or in many contexts any value other than *false*), her full name prints just once, at the beginning of the series.

For more information on *idemtracker*, see the discussion in biblatex's user guide.

isbn=*true*, *false* default: `false`

Use this option to print ISBNs in bibliographies. A work's ISBN goes in the *isbn* field of its bibliography database entry. With this option, the style prints ISBNs at the end of every entry in the bibliography, before annotations. To print the ISBN of a particular work, use the *isbn* entry option.

issn=*true*, *false* default: `false`

Similar to *isbn* but for ISSNs.

library=*true*, *false* default: `false`

Like *isbn* and *issn*, this option prints the *library* field of every work in the bibliography. Use it to print information about libraries, call numbers, and the like. If you use it with the *isbn* and *annotation* options, it prints after the former but before the latter. To print this information for selected works, use the *library* entry option.

noetal=*true*, *false* default: `false`

This option disables the truncation of name lists in all citations and bibliographies. To disable truncation in the citations and bibliography entries of specific works, use the *noetal* entry option.

nolos=*true*, *false* default: `false`

By default, every work with a *shorthand* receives an entry in the bibliography. If you wish to exclude them, say, to avoid duplication with the output of *printshorthands*, use *nolos*. Since *collsonly* also excludes works from the bibliography, their results may overlap.

nopages=*true*, *false* default: `false`

On the first citation of *article* or *review* entries (and their aliases), Windy City prints the *pages* field if the *postnote* field is blank. This lets you cite the entirety of a work without having to duplicate the content of the *pages* field in the *postnote*. To override this feature, use *nopages*.

reflist=*true*, *false* default: `false`

Use this option to print a bibliography in the author-date format (what *CMOS* calls a reference list). If you use parenthetical citations, consider using *reflist* to maintain consistency with *CMOS*. Again, another way to print a reference list is to pass *env*=*reflist* to *printbibliography*. See section 2 for more information.

short=*true*, *false* default: `false`

As shown in section 2.3, this option prints short citations (see *CMOS* 14.34). The use of *short* has one feature in common with *ibid*: It affects only consecutive citations of a work on the same page. As with *ibid.*, this feature isn't required by *CMOS*, but it prevents readers from having to look at another page to find the title of a citation.

In contexts where *short* would drop a title from a citation, but where no name occupies the author's position, it prints the work's *labeltitle*. This can be a short form of the title, either the title minus the subtitle or the content of the *shorttitle* field, if available.

As noted earlier, *short* has the same effect on first citations as *shortfirst*. But recall from section 2.3 that you can combine *short* and *ibid* for more concise output.

shortafter=*true*, *false* default: `false`

If you want the output of *short* but with long first citations, use *shortafter*. Compare the following with examples in *CMOS* 14.34:

1. Toni Morrison, *Beloved* (New York: Vintage International, 2004), 3.
2. Morrison, 18.
3. Morrison, 18.
4. Morrison, 24–26.
5. Toni Morrison, *Song of Solomon* (New York: Vintage International, 2004), 401-2.
6. Morrison, 433.
7. Junot Díaz, *The Brief Wondrous Life of Oscar Wao* (New York: Riverhead Books, 2007), 37–38.
8. Morrison, *Song of Solomon*, 403.
9. Díaz, *Oscar Wao*, 152.
10. Díaz, 201-2.
11. Morrison, *Song of Solomon*, 240; *Beloved*, 32.
12. Morrison, *Beloved*, 33.

shortfirst=*true*, *false* default: `false`

Use this option to shorten a work's first citation. The resulting output consists mainly of the author's name and the work's title. According to *CMOS*, this approach is optional for documents with complete bibliographies. (See *CMOS* 14.23, also 14.29–14.36.) As with *short*, you may use *shortfirst* with *ibid* for more concise citations.

shortlinks=*true*, *false* default: `false`

If you use Windy City with hyerref, citations contain embedded links to their respective entries in the bibliography. In standard citations, these links encompass the entire citation (minus some punctuation). With *shortlinks*, they're embedded in just one element: the title or, if no title is present, whatever part of the citation occupies the author's position, such as the author's name, *ibid.*, or a shorthand. For comparison, the blue text below shows default links:

1. Samuel A. Morley, *Poverty and Inequality in Latin America: The Impact of Adjustment and Recovery* (Baltimore: Johns Hopkins University Press, 1995), 24–25.
2. Regina M. Schwartz, "Nationals and Nationalism: Adultery in the House of David," *Critical Inquiry* 19, no. 1 (1992): 131–32.
3. Ernest Kaiser, "The Literature of Harlem," in *Harlem: A Community in Transition*, ed. J. H. Clarke (New York: Citadel Press, 1964).
4. Morley, *Poverty and Inequality*, 43.

5. Schwartz, "Nationals and Nationalism," 138.
6. Kaiser, "Literature of Harlem," 189–90.

And here they are with *shortlinks*:

1. Samuel A. Morley, *Poverty and Inequality in Latin America: The Impact of Adjustment and Recovery* (Baltimore: Johns Hopkins University Press, 1995), 24–25.
2. Regina M. Schwartz, "Nationals and Nationalism: Adultery in the House of David," *Critical Inquiry* 19, no. 1 (1992): 131–32.
3. Ernest Kaiser, "The Literature of Harlem," in *Harlem: A Community in Transition*, ed. J. H. Clarke (New York: Citadel Press, 1964).
4. Morley, *Poverty and Inequality*, 43.
5. Schwartz, "Nationals and Nationalism," 138.
6. Kaiser, "Literature of Harlem," 189–90.

swapvol=*true*, *false* default: `false`

In bibliographies and long citations, works in collections may place publication information for the volume before that of the collection or *vice versa*. Windy City gives priority to the volume. To reverse this for all relevant citations, use *swapvol*. For more information, see section 4.1.

url=*true*, *false* default: `true`

Set *false* to prevent the *url* field from printing.

2.5 Entry Options

An entry option goes in the *options* field of a work's database entry. It affects the format of that work. For options that affect the format of every work, see section 2.4.

As with preamble options, many options below are *false* by default. Make an option *true* by putting its name in the *options* field of a work's bibliography database entry, with or without =*true*. Using *annotate* as an example, the following are equivalent:

```
options = {annotate},
options = {annotate=true},
```

If an option is *true* by default, make it *false* by putting its name with =*false* in the *options* field. Using *doi* as an example:

```
options = {doi=false},
```

annotate=*true*, *false* default: `false`

Set *true* to print an entry's *annotation* field. To change the spacing between entries and annotations, change the value of *\bibitemsep*.

doi=*true*, *false* default: `true`

Set *false* to prevent the *doi* field from printing.

eprint=*true*, *false* default: `true`

Set *false* to prevent the *eprint* field from printing. For more information about eprints, see section 2.8.

isbn=*true*, *false* default: `false`

Use this option to print the ISBN of a particular work in a bibliography. The ISBN appears at the end of the work's entry (if applicable, before an annotation). To print ISBNs of every work in the bibliography, see the *isbn* preamble option.

issn=*true*, *false* default: `false`

Similar to *isbn* but for ISSNs.

library=*true*, *false* default: `false`

This option prints the *library* field of a work's bibliography database entry. This information prints at the end of the work's entry (if applicable, after an ISBN and before an annotation). To print the *library* field of every work in the bibliography, use the *library* preamble option.

listvols=*true*, *false* default: `false`

CMOS offers some flexibility over whether a long citation gives a work's total number of volumes (see *CMOS* 14.118). Windy City replicates this in a roundabout way: By default, it prints the *volumes* field in certain long citations only if the *postnote* field is empty. This does a better job of matching examples in *CMOS* than a simpler policy would. For the rest, use *listvols*. It prints the *volumes* field in those citations no matter what the *postnote* contains. For more information, see section 4.1.

noauth=*true*, *false* default: `false`

This option tells the style to bypass the author's position of a work in notes and bibliographies. Citations will begin with the title's position. Below is an example from *CMOS* 14.105:

> 1. *Chaucer Life-Records*, ed. Martin M. Crow and Clair C. Olson from materials compiled by John M. Manly and Edith Richert, with the assistance of Lilian J. Redstone et al. (London: Oxford University Press, 1966).
>
> *Chaucer Life-Records*. Edited by Martin M. Crow and Clair C. Olson from materials compiled by John M. Manly and Edith Richert, with the assistance of Lilian J. Redstone et al. London: Oxford University Press, 1966.

To bypass the author's position in a single note, without affecting the bibliography, use starred versions of citation commands, such as *cite**, *footcite**, and *parencite**.

noetal=*true*, *false* default: `false`

This option disables the truncation of name lists in the citations and bibliography entries of specific works. To disable truncation in all works, use the *noetal* preamble option.

noplace=*true*, *false* default: `false`

In contexts where Windy City expects to print a publisher's location, but no location is specified in the bibliography database, you can tell it to print *n.p.* (for *no place*) with this option. From *CMOS* 14.132:

> (n.p.: Windsor, 1910).

noreprint=*true*, *false* default: `false`

This option helps if you need to indicate a work's original year of publication with the *origdate* or *origyear* field but want to depart from the style's usual output by excluding the *reprint* bibliography string. First, an example of the default output from *CMOS* 15.40 (in the author-year format):

> Maitland, Frederic W. (1898) 1998. *Roman Canon Law in the Church of England*. Reprint, Union, NJ: Lawbook Exchange.

Now, from the same section, an example that requires *noreprint*:

> Darwin, Charles. (1859) 1964. *On the Origin of Species*. Facsimile of the first edition, with an introduction by Ernest Mayr. Cambridge, MA: Harvard University Press.

skipdate=*true*, *false* default: `false`

On rare occasions, you may need an entry in a reference list to skip the *date*. See section 2.7 for examples.

swapauth=*true*, *false* default: `false`

To swap the places of a book's author with an editor or translator, use *swapauth*. This option works for *book*, *bookinbook*, *collection*, *inbook*, and *incollection* entry types. For more information, see section 3.2.

swaptrans=*true*, *false* default: `false`

According to *CMOS*, if a work has an editor and a translator, their names should appear in citations in the order in which they appear on the work's title page (see *CMOS* 14.104). By default, the style lists editors first. The option *swaptrans* reverses this order: Their translators print first. If a work's translators and editors are the same, *swaptrans* reverses their roles, say, from *edited and translated by* to *translated and edited by*. The same goes for compilers, expanders, revisers, and updaters—all of whom the style treats as specialized editors. For editors and translators of an

issuetitle, *maintitle*, or *series*, see their respective options below. See also section 3.2.

swaptrans:book=*true*, *false* default: `false`

A short form of *swaptrans:booktitle*. See below.

swaptrans:bookbook=*true*, *false* default: `false`

A short form of *swaptrans:bookbooktitle*. See below.

swaptrans:bookbooktitle=*true*, *false* default: `false`

Like *swaptrans* but narrower in scope. It applies only to the editors and translators of a *bookbooktitle* (a double cross-referenced *title*). See section 3.2.

swaptrans:booktitle=*true*, *false* default: `false`

Like *swaptrans* but narrower in scope. It applies only to the editors and translators of a *booktitle* (a cross-referenced *title*). See section 3.2.

swaptrans:issue=*true*, *false* default: `false`

A short form of *swaptrans:issuetitle*. See below.

swaptrans:issuetitle=*true*, *false* default: `false`

Like *swaptrans* but for editors and translators of an *issuetitle*.

swaptrans:main=*true*, *false* default: `false`

A short form of *swaptrans:maintitle*. See below.

swaptrans:maintitle=*true*, *false* default: `false`

Like *swaptrans* but for editors and translators of a *maintitle*.

swaptrans:series=*true*, *false* default: `false`

Like *swaptrans* but for editors and translators of a *series*.

swaptrans:title=*true*, *false* default: `false`

Like *swaptrans* but narrower in scope. It applies only to the editors and translators of a *title*, whereas *swaptrans* also affects those of a *booktitle* (a cross-referenced *title*) and a *bookbooktitle* (a double cross-referenced *title*). See section 3.2.

swapvol=*true*, *false* default: `false`

As an entry option, *swapvol* does on a case-by-case basis what the *swapvol* preamble option does globally: When set to true, it changes the format of a work in a collection so that, in bibliographies and long citations, publication information for the collection precedes that of the volume. For more information, see section 4.1.

url=*true*, *false* default: `true`

Set *false* to prevent the *url* field from printing.

2.6 Citation Commands

Windy City supports most of the citation commands familiar from biblatex, plus a small set of custom commands for tricky situations.

2.6.1 *Standard Citation Commands*

The following list, though not exhaustive, shows the most important citation commands from biblatex that Windy City supports:

```
\autocite[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}
\autocites(⟨multiprenote⟩)(⟨multipostnote⟩)[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}...[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}
\cite[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}
\cite*[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}
\cites(⟨multiprenote⟩)(⟨multipostnote⟩)[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}...[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}
\cites*(⟨multiprenote⟩)(⟨multipostnote⟩)[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}...[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}
\footcite[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}
\footcite*[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}
\footcites(⟨multiprenote⟩)(⟨multipostnote⟩)[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}...[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}
\footcites*(⟨multiprenote⟩)(⟨multipostnote⟩)[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}...[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}
\footfullcite[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}
\footfullcite*[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}
\fullcite[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}
\fullcite*[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}
\nocite{⟨key⟩}
\nocite{*}
\parencite[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}
\parencite*[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}
\parencites(⟨multiprenote⟩)(⟨multipostnote⟩)[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}...[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}
\smartcite[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}
\smartcite*[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}
\smartcites(⟨multiprenote⟩)(⟨multipostnote⟩)[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}...[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}
\smartcites*(⟨multiprenote⟩)(⟨multipostnote⟩)[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}...[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}
\textcite[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}
\textcites(⟨multiprenote⟩)(⟨multipostnote⟩)[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}...[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}
\textcites*(⟨multiprenote⟩)(⟨multipostnote⟩)[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}...[⟨prenote⟩][⟨postnote⟩]{⟨key⟩}
```

New users should get comfortable with *cite* and *footcite* (for notes) and *parencite* (for parenthetical citations). Their multicite forms—*cites*, *footcites*, and *paren-*

cites—take comma-separated lists of entry keys, while allowing you to specify distinct *prenote* and *postnote* fields for each work.

Use *nocite* to add works to bibliographies even if you haven't cited them in the text with citations commands. Use it with an asterisk to add every work in every *bib* file that your document loaded with *addbibresource* or *bibliography*.

Windy City sets the *autocite* preamble option to *footnote*, which makes *autocite* equivalent to *smartcite*. The latter runs different citation commands in different contexts. In Windy City, *smartcite* is equivalent to *footcite* in a document's body and *cite* in footnotes and endnotes.[4] If you set the *autocite* preamble option to *inline*, *autocite* is equivalent to *parencite*. If you set it to *plain*, *autocite* is equivalent to *cite*.

`\cite*[`⟨*prenote*⟩`][`⟨*postnote*⟩`]{`⟨*key*⟩`}`

Use this command to cite a work without printing anything in the author's position. It comes in handy when the context makes the author's name clear. From *CMOS* 14.78:

> 1. *Autobiography of Benjamin Franklin*, ed. John Bigelow (Philadelphia: J. B. Lippincott, 1868), 233.
> 2. *Autobiography of Benjamin Franklin*, 234.
>
> Franklin, Benjamin. *Autobiography of Benjamin Franklin*. Edited by John Bigelow. Philadelphia: J. B. Lippincott, 1868.

`\parencite*[`⟨*prenote*⟩`][`⟨*postnote*⟩`]{`⟨*key*⟩`}`

Like *parencite* but suppresses the author's position—useful in passages where the author receives explicit mention. Here's an example from *CMOS* 15.25:

> Fiorina et al. (2005) and Fischer and Hout (2006) reach more or less the same conclusions. In contrast, Abramowitz and Saunders (2005) suggest that the mass public is deeply divided between red states and blue states and between churchgoers and secular voters.

The source for the passage above contains:

```
\begin{quote} Fiorina et al. \parencite*{fiorina2005}... Fischer
and Hout \parencite*{fischer2006}... Abramowitz and Saunders
\parencite*{abramowitz2005}... \end{quote}
```

4. In a *minipage* environment, *smartcite* is equivalent to *cite*. To use *smartcite* with endnotes, use the *endnotes* package.

`\textcite[`⟨*prenote*⟩`][`⟨*postnote*⟩`]{`⟨*key*⟩`}`

Use *textcite* for in-text citations. Here's an example from *CMOS* 13.65:

> "If an astronaut falls into a black hole, its mass will increase, but eventually the energy equivalent of that extra mass will be returned to the universe in the form of radiation. Thus, in a sense, the astronaut will be 'recycled"' (Stephen W. Hawking, *A Brief History of Time: From the Big Bang to Black Holes* [New York: Bantam Books, 1988], 112).

The source for the passage above contains:

```
\begin{quote} ``If an astronaut falls into a black hole...''
\mkbibparens{\textcite[112]{hawking1988}}. \end{quote}
```

Note that *textcite* doesn't enclose citations in parentheses but does drop the final period that standard citations usually end with. The parentheses above come from *mkbibparens*, which switches the note's internal parentheses to brackets.

`\textcite*[`⟨*prenote*⟩`][`⟨*postnote*⟩`]{`⟨*key*⟩`}`

Like *textcite* but suppresses the author's position. From *CMOS* 13.65:

> In their introduction to *Democracy in America* (Chicago: University of Chicago Press, 1999), translators Harvey Mansfield and Delba Winthrop write that Tocqueville "shows that the people are sovereign, whether through the Constitution or despite it, and he warns of the tyranny of the majority" (xvii).

The source for the passage above contains:

```
\begin{quote} In their introduction to \textcite*{tocqueville1999}
...\parencite[xvii]{tocqueville1999}. \end{quote}
```

2.6.2 *Custom Commands: \idemcite*

This family of citation commands isn't strictly necessary but makes some citations simpler than they would be with standard commands.

`\idemcite[`⟨*prenote*⟩`][`⟨*postnote*⟩`]{`⟨*key*⟩`}`
`\idemcites(`⟨*multiprenote*⟩`)(`⟨*multipostnote*⟩`)[`⟨*prenote*⟩`][`⟨*postnote*⟩`]{`⟨*key*⟩`}...[`⟨*prenote*⟩`][`⟨*postnote*⟩`]{`⟨*key*⟩`}`
`\footidemcite[`⟨*prenote*⟩`][`⟨*postnote*⟩`]{`⟨*key*⟩`}`
`\footidemcites(`⟨*multiprenote*⟩`)(`⟨*multipostnote*⟩`)[`⟨*prenote*⟩`][`⟨*postnote*⟩`]{`⟨*key*⟩`}...[`⟨*prenote*⟩`][`⟨*postnote*⟩`]{`⟨*key*⟩`}`

Perhaps the best use case for these commands is the example in *CMOS* 14.57. The sources mentioned in a passage receive long citations with shortened names:

> Only when we gather the work of several scholars—Walter Sutton's explications of some of Whitman's shorter poems; Paul Fussell's careful study of structure in "Cradle"; S. K. Coffman's close readings of "Crossing Brooklyn Ferry" and "Passage to India"; and the attempts of Thomas I. Rountree and John Lovell, dealing with "Song of Myself" and "Passage to India," respectively, to elucidate the strategy in "indirection"—do we begin to get a sense of both the extent and the specificity of Whitman's forms.[1]

1. Sutton, "The Analysis of Free Verse Form, Illustrated by a Reading of Whitman," *Journal of Aesthetics and Art Criticism* 18, no. 2 (December 1959); Fussell, "Whitman's Curious Warble: Reminiscence and Reconciliation," in *The Presence of Walt Whitman*, ed. R. W. B. Lewis (New York: Columbia University Press, 1962); Coffman, "'Crossing Brooklyn Ferry': A Note on the Catalog Technique in Whitman's Poetry," *Modern Philology* 51, no. 4 (May 1954); Coffman, "Form and Meaning in Whitman's 'Passage to India'," *PMLA* 70, no. 3 (June 1955); Rountree, "Whitman's Indirect Expression and Its Application to 'Song of Myself'," *PMLA* 73, no. 5 (December 1958): 549–55; and Lovell, "Appreciating Whitman: 'Passage to India'," *Modern Language Quarterly* 21, no. 2 (June 1960): 131–41

Without commands like *idemcite*, there's often no easy way to tell Windy City to shorten names. The preamble option *idemtracker* helps with consecutive citations of the same author, but that's no use when you want to shorten names because you've mentioned them in the text.

Nevertheless, standard commands can reproduce the example in at least three ways:

```
\footnote{\cites*[Sutton,][]{sutton1959}[Fussell,][]{fussell1962}...
\footcites*[Sutton,][]{sutton1959}[Fussell,][]{fussell1962}...
\footnote{Sutton, \cite*{sutton1959}; Fussell, \cite*{fussell1962}...
```

They're ugly workarounds, but they work.

With *idemcites* and *footidemcites*, on the other hand, you have simpler alternatives that make your intentions clearer and your file easier to read:

```
\footnote{\idemcites{sutton1959,fussell1962,...}[and][]{lovell1960}}
\footidemcites{sutton1959,fussell1962,...}[and][]{lovell1960}
\footnote{\idemcite{sutton1959}; ... and \idemcite{lovell1960}}
```

Notice that the only reason to use *footidemcites* rather than *footidemcite* is to insert *and* before the last citation.

2.6.3 *Custom Commands: \parenauth*

You may prefer to omit the year from parenthetical citations if the context makes it clear or if the inclusion of *n.d.* (for *no date*) seems unnecessary. Omit the year with *\parenauth* and *\parenauths*.

`\parenauth[`⟨*prenote*⟩`][`⟨*postnote*⟩`]{`⟨*key*⟩`}`
`\parenauths(`⟨*multiprenote*⟩`)(`⟨*multipostnote*⟩`)[`⟨*prenote*⟩`][`⟨*postnote*⟩`]{`⟨*key*⟩`}...[`⟨*prenote*⟩`][`⟨*postnote*⟩`]{`⟨*key*⟩`}`

As with *\parencite** and *\parencites**, use these commands with care. Dropping the year from parenthetical citations could result in bad output, such as empty parentheses or ambiguous references. From *CMOS* 15.54.

> Alvin Johnson, in a memorandum prepared sometime in 1937 (Kallen Papers, file 36), observed that…

2.7 Entry Types

You may assign any work to one of the core entry types in the list below or to one of their so-called "type aliases," which, minor differences aside, give the same output. If an entry has a type other than the ones listed below, Windy City processes it as a *book*.

article Type alias: *periodical*

artwork Type alias: *image*

book Type aliases: *booklet*, *manual*, *mvbook*, *mvcollection*, *proceedings*, *report*, *techreport*

collection No type aliases

inbook Type alias: *bookinbook*

incollection Type aliases: *conference*, *inproceedings*, *suppbook*, *suppcollection*

letter No type aliases

misc No type aliases

online Type aliases: *electronic*, *www*

patent No type aliases

reference Type alias: *inreference*

review No type aliases

standard No type aliases

thesis Type aliases: *mastersthesis*, *phdthesis*

unpublished No type aliases

Aliases don't always have the same functions, even when they're fully interchangeable. The difference, though, might be just conceptual. For example, articles in a periodical should take the *article* entry type rather than *periodical*—not because there's any difference in output, but because, if only in principle, the latter is for citing the periodical itself, not its contents. If you want to save some lines in your bibliography database, use it for a periodical when you cite multiple articles from that source.

The same is true for the *inreference* and *reference* entry types. You may cross-reference *inreference* entries to *reference* entries, but they're otherwise equivalent. Take an example from *CMOS* 14.232:

> 1. *Encyclopaedia Britannica*, 15th ed. (1980), s.v. "salvation."

One way to get that output is to cross-reference an *inreference* entry (for the article) to a *reference* entry (for the encyclopedia):[5]

```
@InReference{salvation1980,
  title = {salvation},
  crossref = {britannica1980}
}
@Reference{britannica1980,
  organization = {{\emph{Encyclopaedia Britannica}}},
  edition = {15},
  year = {1980}
}
```

But you could also have a single entry of either type:

```
@Reference{salvation1980,
  organization = {{\emph{Encyclopaedia Britannica}}},
  edition = {15},
  title = {salvation},
  year = {1980}
}
```

On the differences between the *thesis*, *mastersthesis*, and *phdthesis* entry types, see section 8.1.

5. Incidentally, reference works don't always have titles in italics. When necessary, you need to set italics in your bibliography database.

For unusually complicated citations, or those just not supported by the style, consider using the *misc* entry type. The style handles these entries in way that makes it a fallback for almost anything. The example below is from *CMOS* 14.264:

1. Eleanor Roosevelt, "Is America Facing World Leadership?," convocation speech, Ball State Teacher's College, May 6, 1959, radio broadcast, reel-to-reel tape, MPEG copy, 1:12:49, http://libx.bsu.edu/cdm4/singleitem/collection/ElRoos/id/1.

Roosevelt, Eleanor. "Is America Facing World Leadership?" Convocation Speech. Ball State Teacher's College. May 6, 1959. Radio broadcast. Reel-to-reel tape. MPEG copy. 1:12:49. http://libx.bsu.edu/cdm4/singleitem/collection/ElRoos/id/1.

This work's database entry contains most of its information in *usera* (for notes) and *userb* (for bibliographies). The *title* field needs manual formatting, since works of this type may have titles in italics or quotation marks.

```
@Misc{roosevelt1959,
  author = {Roosevelt, Eleanor},
  title = {\mkbibquote{Is America Facing World Leadership?}},
  usera = {convocation speech, Ball State Teacher's College, May 6,
           \thefield{year}, radio broadcast, reel-to-reel tape,
           MPEG copy, 1:12:49},
  userb = {Convocation Speech. Ball State Teacher's College. May 6,
           \thefield{year}. Radio broadcast. Reel-to-reel tape.
           MPEG copy. 1:12:49},
  url = {http://libx.bsu.edu/cdm4/singleitem/collection/ElRoos/id
         /1},
  year = {1959}
}
```

You may also use the *misc* entry type to cross-reference entries in a bibliography, as in *CMOS* 14.81 and 14.82.

Ashe, Gordon. *See* Creasey, John.

Creasey, John [Gordon Ashe, pseud.]. *A Blast of Trumpets*. New York: Rinehart and Winston, 1976.

——— [Anthony Morton, pseud.]. *Hide the Baron*. New York: Walker, 1978.

——— [Jeremy York, pseud.]. *Death to My Killer*. New York: Macmillan, 1966.

Morton, Anthony. *See* Creasey, John.

York, Jeremy. *See* Creasey, John.

Here's the *misc* entry for one of the cross-references above:

```
@Misc{ashe,
  options = {skipdate},
  author = {Ashe, Gordon},
  userb = {\emph{See} Creasey, John}
}
```

The option *skipdate* is necessary only if you plan to format your bibliography as a reference list. It prevents Windy City from printing *n.d.* (for *no date*) after the author's position.

Use *nocite* with the *misc* entries to add them to your bibliography, then cite the remaining entries as usual.

For examples of automatic cross-referencing in notes and bibliographies see section 5 (14.108), section 6 (15.42), and section 4.

2.8 Data Fields

Windy City relies on a small number of data fields that aren't recognized by BibTeX or biblatex. It also uses some standard ones in perhaps unexpected ways.

2.8.1 *Standard Data Fields*

Examples in this document don't always make it clear how Windy City uses standard data fields. The list below highlights a selection of fields that merit special attention.

authortype This field takes three values: *anon* (to print an anonymous author's name in brackets), *anon?* (to add a question mark inside the brackets), and *pseudo* (to print *pseud.* in brackets after the name of a pseudonymous author). From *CMOS* 14.79:

> 1. [Samuel Horsley], *On the Prosodies of the Greek and Latin Languages* (London, 1796).
> 2. [James Hawkes?], *A Retrospect of the Boston Tea-Party, with a Memoir of George R. T. Hewes*, by a Citizen of New-York (New-York, 1834).
>
> [Hawkes, James?]. *A Retrospect of the Boston Tea-Party, with a Memoir of George R. T. Hewes*. By a Citizen of New-York. New-York, 1834.
> [Horsley, Samuel]. *On the Prosodies of the Greek and Latin Languages*. London, 1796.

For pseudonymous authors, another solution is to use the *nameaddon* field. Unlike with *authortype*, *nameaddon* allows you to include an author's given name in the brackets. For examples, see *CMOS* 14.81.

edition To indicate a numbered edition of a work, put the edition's number in this field—for example, 2 for a second edition. To indicate a revised edition, enter either *revised* or *rev. ed.* Both options give the same output. For expanded and updated editions, you

may use *expanded* or *updated*. Add additional data as necessary. In the following example from *CMOS* bibliography 2.4, *edition* contains *updated edition by Arlene O'Sean and Antoinette Schleyer*:

> Swanson, Ellen. *Mathematics into Type*. Updated edition by Arlene O'Sean and Antoinette Schleyer. Providence, RI: American Mathematical Society, 1999.

You may also use the field to indicate a newspaper's edition, such as *Sunday Book Review* (see *CMOS* 14.202).

eprint Windy City supports the built-in resources that biblatex provides for electronic publishing information, even though the output doesn't conform to *CMOS*. To that end, you may use the *eprint* field, along with its cousins *eprinttype* and *eprintclass*, and associated options (*eprint*, *doi*, and *url*), all of which are set to *true* by default.

issue Windy City uses this field with *article*, *online*, and *review* entry types (and their aliases) to record a work's season of publication (spring, summer, autumn/fall, winter). The *date* field also records seasons—but the value *23*, for the third season, returns *Autumn*. To print *Fall*, use the *issue* field. In other words, for *Fall 2013*, a work's bibliography database entry should contain:

```
issue = {Fall},
date = {2013},
```

Whereas for *Autumn 2013*, use either:

```
date = {2013-23},
```

Or:

```
issue = {Autumn},
date = {2013},
```

Note that when *date* contains just a year of publication, you may use the classic *year* field.

label The publication year of a work is usually easy for Windy City to determine. It simply reads the *date* or *year* field of a work's bibliography database entry. But sometimes, especially when works with different publication dates are cross-referenced, the style needs to make difficult choices. If it picks the wrong year, you can override the error by putting the correct one in the *label* field.

pages See comments on the *nopages* preamble option in section 2.4.

pubstate This fields indicates when a work is forthcoming (with value *forthcoming*), a preprint (with value *preprint*), a working paper (with value *working*), or an electronic article published ahead of the official publication date (with value *prepub*).

A preprint or working paper needs an *unpublished* entry in your bibliography database (see *CMOS* 14.173 and 14.218). A prepublication should have an *article* or *periodical* entry (see *CMOS* 14.172). For forthcoming works, see *CMOS* 14.146, 14.172, and 15.45. Forthcoming works also print correctly with *forthcoming* in the *year* field.

Lucki, Deborah D., and Richard W. Pollay. "Content Analyses of Advertising: A Review of the Literature." Working paper, History of Advertising Archives, Faculty of Commerce, University of British Columbia, Vancouver, 1980.

shorthand Windy City doesn't automatically italicize a *shorthand*. Per *CMOS* 14.60, a shorthand should be italicized if the title that it abbreviates is italicized. Set it in the bibliography database with *\emph* or *\nkbibemph*. For examples of a *shorthand*, see section 14.59 and the first citation of *CMOS* in this document's introduction.

shorthandintro You may override the default announcement of a *shorthand* by adding your preferred content to *shorthandintro*. See the first citation of *CMOS* in this document's introduction, where the announcement isn't a note in parentheses but its own sentence.

titleaddon Like *nameaddon*, this field encloses its content in brackets. This is especially useful for translated titles. From *CMOS* 14.99:

1. Henryk Wereszycki, *Koniec sojuszu trzech cesarzy* [The end of the Three Emperors' League] (Warsaw: PWN, 1977); includes a summary in German.
2. N. M. Pirumova, *The Zemstvo Liberal Movement: Its Social Roots and Evolution to the Beginning of the Twentieth Century* [in Russian] (Moscow: Izdatel'stvo "Nauka," 1977).

Wereszycki, Henryk. *Koniec sojuszu trzech cesarzy* [The end of the Three Emperors' League]. Warsaw: PWN, 1977.

type With the *thesis* entry type, Windy City uses *type* to distinguish a Master's thesis from a PhD dissertation. For the latter, *type* should have the value *phdthesis* or *PhD diss.* For the former, use *mathesis* or *master's thesis*. Indicate other types of thesis by entering the appropiate value in the field, such as *bachelor's thesis* or *undergraduate thesis*. No *type* field is needed for the *mathesis* and *phdthesis* entry types.

In rare cases, *type* is necessary for *article* and *review* entry types (and their aliases) when a work's bibliographic information doesn't allow Windy City to distinguish a journal article from a magazine or newspaper article. This happens when a magazine or newspaper article has an issue number. Normally, Windy City prints an issue number before the date and encloses the date in parentheses. But for magazine and newspaper articles, the issue number should go first, and the date shouldn't be in parentheses. The workaround is to include a *type* field with the value *newsmag*. For an example, see *CMOS* 14.204 and compare it with the citation of Beattie in 14.171.

2.8.2 *Nonstandard Data Fields*

Some of Windy City's nonstandard data fields are for its internal handling of cross-referencing. Those fields aren't listed below, as they're not usually meant for use in a bibliography database (but see section 1.2). The rest store information that's crucial for correct formatting. Without them, quite a few citations in this document wouldn't match their counterparts in *CMOS*.

blogtitle
blogsubtitle The name of a blog goes in *blogtitle* and *blogsubtitle*. Keep in mind that blog posts take the usual *title* and *subtitle* fields.

collection Use this field with *unpublished* works for names of manuscript collections. See examples in *CMOS* 14.222, 14.229, and 14.230.

editoraddon This field holds editorial information about a work that belongs immediately after *editor* has printed, without intervening punctuation. For an example, see *CMOS* 14.105, where the citation of *Chaucer Life-Records* includes: "from materials compiled by John M. Manly and Edith Richert, with the assistance of Lilian J. Redstone et al." This field doesn't print when *editor* prints in the author's position. As a result, options that may affect where *editor* prints, such as *swaptrans* and *swapauth*, may affect whether *editoraddon* prints.

seriesaddon This field is for additional information about a book's series. That includes information about the run of a series, such as *2nd ser.* and *n.s.* For examples, see *CMOS* 14.123 and 14.126. Keep in mind that, for journals, which occasionally have a series but no series name, information like *2nd ser.* and *n.s.* go in the *series* field.

shortcollection Similar to *shorttitle* but for the short name of a *collection*.

shortmaintitle This field contains the short form of a *maintitle*. It should only be necessary for certain works in collections. See the citation of *The Complete Tales of Henry James* in section 4.2.

typeaddon In bibliography entries of *unpublished* works, this field adds arbitrary content after the *type* field. To replicate examples in *CMOS* 14.217, use *typeaddon* with the value *presented at the*:

> Hong, Viviana. "Censorship in Children's Literature during Argentina's Dirty War (1976–1983)." Lecture presented at the University of Chicago, Chicago, IL, April 30, 2015.
>
> Teplin, Linda A., Gary M. McClelland, Karen M. Abram, and Jason J. Washburn. "Early Violent Death in Delinquent Youth: A Prospective Longitudinal Study." Paper presented at the Annual Meeting of the American Psychology-Law Society, La Jolla, CA, March 2005.

For *CMOS* 14.216, *typeaddon* contains *last modified*, preceded by a comma and a space:

> 1. Pat Balderdash, "Presbyopia and Screen Size: A Relational Analysis" (unpublished manuscript, May 5, 2017), Microsoft Word file.
>
> Balderdash, Pat. "Presbyopia and Screen Size: A Relational Analysis." Unpublished manuscript, last modified May 5, 2017. Microsoft Word file.

3. Editors and Translators

Windy City offers significant control over the handling of editors and translators. Taking advantage of it, however, may not seem intuitive at first. This section covers all the relevant features and options.

3.1 Types of Editors and Translators

Windy City has four name lists for editors (*editor*, *editora*, *editorb*, and *editorc*) and three name lists for translators (*translator*, *translatora*, and *translatorb*). At points where it's prepared to print them, it cycles through one or both sets of lists, depending on the context, looking for names to print. The set of editors starts with *editor*, followed by *editora*, and so on. The set of translators starts with *translator*, followed by *translatora*, and so on. Editors precede translators, unless you reverse the order with a *swaptrans* entry option (see section 3.2). Within each set, the style prints the first name list that meets its criteria for that context. Apart from exceptions discussed below, you can assign any editor or translator name list to any *title*, *issuetitle*, *maintitle*, or *series*.

3.1.1 *The Basics*

In most cases, you'll assign editors and translators to a *title*. Since it's the default assignment, you can do this just by adding the *editor* and *translator* fields to a database entry. The entry below is an example from *CMOS* 14.104:

```
@Collection{adorno1999,
  author = {Adorno, Theodor W. and Benjamin, Walter},
  title = {The Complete Correspondence, 1928-1940},
  editor = {Lonitz, Henri},
  translator = {Walker, Nicholas},
  address = {Cambridge, MA},
  publisher = {Harvard University Press},
  year = {1999}
}
```

1. Theodor W. Adorno and Walter Benjamin, *The Complete Correspondence, 1928–1940*, ed. Henri Lonitz, trans. Nicholas Walker (Cambridge, MA: Harvard University Press, 1999).

Adorno, Theodor W., and Walter Benjamin. *The Complete Correspondence, 1928–1940*. Edited by Henri Lonitz. Translated by Nicholas Walker. Cambridge, MA: Harvard University Press, 1999.

When the style processes this entry, it identifies the editor and translator of the work with the names in the *editor* and *translator* fields. Since the entry doesn't use *swaptrans*, the resulting output lists the editor and translator, in that order, after the authors and title.

Cross-referencing introduces a bit more complexity, but the principle is the same: Within the scope of an entry, the style associates *editor* and *translator* with *title*. In this example from *CMOS* 14.30, an essay is cross-referenced to a collection:

```
@InCollection{kaiser1964,
  author = {Kaiser, Ernest},
  title = {The Literature of Harlem},
  shorttitle = {Literature of Harlem},
  crossref = {clarke1964}
}
@Collection{clarke1964,
  editor = {Clarke, J. H.},
  title = {Harlem},
  subtitle = {A Community in Transition},
  address = {New York},
```

```
  publisher = {Citadel Press},
  year = {1964}
}
```

1. Ernest Kaiser, "The Literature of Harlem," in *Harlem: A Community in Transition*, ed. J. H. Clarke (New York: Citadel Press, 1964).

Kaiser, Ernest. "The Literature of Harlem." In *Harlem: A Community in Transition*, edited by J. H. Clarke. New York: Citadel Press, 1964.

Since *editor* appears within the *collection* entry, Windy City associates the editor's name with *Harlem*. If you moved *editor* from *collection* to *incollection*, the association would change to *The Literature of Harlem*.

Consider another example:

1. Francesco Petrarca, "The Ascent of Mont Ventoux," trans. Hans Nachod, in *The Renaissance Philosophy of Man*, ed. Ernst Cassirer, Paul Oskar Kristeller, and John Herman Randall Jr. (Chicago: University of Chicago Press, 1948).

Petrarca, Francesco. "The Ascent of Mont Ventoux." Translated by Hans Nachod. In *The Renaissance Philosophy of Man*, edited by Ernst Cassirer, Paul Oskar Kristeller, and John Herman Randall Jr., 36–46. Chicago: University of Chicago Press, 1948.

Hans Nachod translated "The Ascent of Mont Ventoux," among other works in the collection, but not *every* work in the collection. Thus, the *translator* field must fall within the scope of the *incollection* entry:

```
@InCollection{petrarca1948,
  author = {Petrarca, Francesco},
  title = {The Ascent of Mont Ventoux},
  translator = {Nachod, Hans},
  pages = {36-46},
  crossref = {cassirer1948}
}
@Collection{cassirer1948,
  editor = {Cassirer, Ernst and Kristeller, Paul Oskar and Randall,
            Jr., John Herman},
  title = {The Renaissance Philosophy of Man},
  address = {Chicago},
  publisher = {University of Chicago Press},
  year = {1948}
}
```

By the same token, since *editor* falls within the scope of *collection*, the style associates it with *The Renaissance Philosophy of Man*, not "The Ascent of Mont Ventoux."

Windy City supports a second tier of editors after *title*, *issuetitle*, *maintitle*, and *series*. Again, in your bibliography database, make sure to list editors in the proper order: *editor* before *editora*, and so on. Second tier editors never print in the author's position, even when the first does. They always print after the relevant title.

In the examples below, the editors print correctly because there's no ambiguity about which title they're responsible for. Both fall within the same entry, *carter2012*, where their default assignment is *A Performer's Guide*. Citing a child entry, *myers2012*, places the editors after the collection's title, starting with *editor*, whereas citing the parent places *editor* in the author's position and *editora* after the collection's title.

```
@InCollection{myers2012,
  author = {Myers, Herbert},
  title = {Pitch and Transposition},
  pages = {375--393},
  crossref = {carter2012}
}
@Collection{carter2012,
  title = {A Performer's Guide to Seventeenth-Century Music},
  editor = {Carter, Stewart},
  editora = {Kite-Powell, Jeffery},
  editoratype = {revex},
  address = {Bloomington},
  publisher = {Indiana University Press},
  year = {2012}
}
```

As the examples above also indicate, the style supports a variety of editorial roles beyond just editor and translator. They are: compiler, expander, reviser, and updater. To assign them, use the editor and translator type fields. Below are some bibliography database entries for examples in *CMOS* 14.103 and 14.142:

```
@Book{schechter2011,
```

```
  editor = {Schechter, Harold, and Kurt Brown},
  editortype = {compiler},
  title = {Killer Verse},
  subtitle = {Poems of Murder and Mayhem},
  address = {London},
  publisher = {Everyman Paperback Classics},
  year = {2011}
}
@Book{turabian2013,
  author = {Turabian, Kate L.},
  title = {A Manual for Writers of Term Papers, Theses, and
           Dissertations},
  edition = {8},
  editor = {Booth, Wayne C. and Colomb, Gregory G. and
            Williams, Joseph M. and {the University of Chicago
            Press Staff}},
  editortype = {reviser},

  publisher = {University of Chicago Press},
  year = {2013}
}
```

2. Kate L. Turabian, *A Manual for Writers of Term Papers, Theses, and Dissertations*, 8th ed., rev. Wayne C. Booth et al. (Chicago: University of Chicago Press, 2013).

You may combine all six editorial roles in pairs. A work's editor, for example, can also be its translator, compiler, expander, reviser, or updater—but no more than one of these. Simply put the proper value in the corresponding type field. We saw this with *A Performer's Guide*, where the bibliography string *revex* identified Jeffery Kite-Powell as the work's reviser and expander. These are the key lines:

```
editora = {Kite-Powell, Jeffery},
editoratype = {revex},
```

Combinations that involve a translator's role, such as *translated and compiled by*, respond to the *swaptrans* options discussed in section 3.2. For these dual roles,

however, it's probably less confusing in the long run to change values in the editor and translator type fields. The choice is yours. Table 1 lists all editor and translator roles.

editortype	Assignment	*editortype*	Assignment
compiler	compiler	reviser	reviser
comped	compiler and editor	revcomp	reviser and compiler

Table 1

For examples in *CMOS* that use values from Table 1, we need to turn to the book's bibliography. The first example below shows the effect of *reved*, the second of *revup*.

1. H. W. Fowler, *A Dictionary of Modern English Usage*, 2nd ed., rev. and ed. Sir Ernest Gowers (Oxford: Oxford University Press, 1965).
2. Ernest Gowers, *Plain Words: A Guide to the Use of English*, rev. and up. Rebecca Gowers (London: Penguin Books, 2015).

Fowler, H. W. *A Dictionary of Modern English Usage*. 2nd ed. Revised and edited by Sir Ernest Gowers. Oxford: Oxford University Press, 1965.

Gowers, Ernest. *Plain Words: A Guide to the Use of English*. Revised and updated by Rebecca Gowers. London: Penguin Books, 2015.

For editors and translators with more than two roles per title, you need to print more than one name list, either an editor name list and a translator name list or two editor names lists (see the previous discussion of second tier editors). This allows for complex assignments such as "Edited and Translated by Jane Doe. Revised and

Updated by Jane Doe and John Smith." What's not allowed is listing three or more roles at once, as in "Edited, Translated, and Revised by Jane Doe."

Along with the values in Table 1, you may also use *anon*, *anon?*, and *pseudo* in editor and translator type fields to indicate anonymous and pseudonymous editors and translators. For examples using these values with the *authortype* field, see section 8.1 and *CMOS* 14.79 and 15.34.

3.1.2 *Other Options and Titles*

Windy City simplifies the assignments of editors and translators in several ways. For one, the default assignment of every editor name list is *editor*, and the default assignment of every translator name list is *translator*. As a result, you never need to use the values *editor* or *translator* in the type fields. It's strictly optional. The name fields alone set the correct assignment.

Much the same holds when the editor and translator of a work are the same. The usual way to set this assignment is with identical name lists:

```
editor = {Doe, Jane},
translator = {Doe, Jane},
```

This gives a default assignment of *editor and translator* (*edtrans* from Table 1), unless you use the appropriate *swaptrans* entry option, which gives *translator and editor* (*transed* from Table 1). No editor or translator type field is necessary.

When type fields are required, Windy City offers flexibility over how you structure your bibliography entries: If you like, you can set the assignment with just one editor or translator type field and its corresponding name field, or with both name fields and one type field, or with both name fields and both type fields. To set Jane Doe as the compiler and translator of a *title*, Windy City treats all five options below as equivalent:

1.
```
editor = {Doe, Jane},
editortype = {comptrans},
```
2.
```
translator = {Doe, Jane},
translatortype = {comptrans},
```
3.
```
editor = {Doe, Jane},
translator = {Doe, Jane},
editortype = {comptrans},
```
4.
```
editor = {Doe, Jane},
translator = {Doe, Jane},
translatortype = {comptrans},
```

```
5.    editor = {Doe, Jane},
      translator = {Doe, Jane},
      editortype = {comptrans},
      translatortype = {comptrans},
```

The last option above raises the possibility that editor and translator type fields may conflict. What if the editor type is *comptrans* and the translator type is something else, say, *extrans*? If the editors and translators are the same, but the type fields differ, Windy City reads the editor type field and ignores the translator type field.

Three more values for type fields allow you to assign editors and translators to *issuetitle*, *maintitle*, and *series*. Here's an example from *CMOS* 14.123:

```
@Book{allen2009,
  author = {Allen, Judith A.},
  title = {The Feminism of Charlotte Perkins Gilman},
  subtitle = {Sexualities, Histories, Progressivism},
  series = {Women in Culture and Society},
  editor = {Stimpson, Catharine R.},
  editortype = {series},
  address = {Chicago},
  publisher = {University of Chicago Press},
  year = {2009}
}
```

1. Judith A. Allen, *The Feminism of Charlotte Perkins Gilman: Sexualities, Histories, Progressivism*, Women in Culture and Society, ed. Catharine R. Stimpson (Chicago: University of Chicago Press, 2009).

Allen, Judith A. *The Feminism of Charlotte Perkins Gilman: Sexualities, Histories, Progressivism*. Women in Culture and Society, edited by Catharine R. Stimpson. Chicago: University of Chicago Press, 2009.

If there were no *editortype* with the value *series*, the style would have assigned *editor* to *title*. The same goes for *issuetitle* and *maintitle*: Assign editors and translators to them by putting *issuetitle* and *maintitle* in the relevant type fields.

With the help of strings from Table 1, all editor and translator types are available to *issuetitle*, *maintitle*, and *series*. Commas function as delimiters. To take the previous example, you could list Catharine Stimpson as the editor and compiler of the series by putting the values *series,edcomp* or *edcomp,series* in *editortype*.

Almost any entry that relies on cross-referencing can be written without it. Doing so, however, requires some fields in your bibliography database that are usually meant for the style's internal use. These fields include *booktitle* (a cross-referenced

title) and *bookbooktitle* (a double cross-referenced *title*—a *title* cross-referenced by a cross-referenced *title*). To accommodate entries that don't use cross-referencing, the style accepts the values *booktitle* and *bookbooktitle* in editor and translator type fields. An example of double cross-referencing will set us up to use both:

```
@InCollection{doe2018,
  options = {swapvol},
  author = {Doe, Jane},
  title = {A Poem},
  translator = {Smith, John},
  pages = {56-57},
  crossref = {jones2018}
}
@InBook{jones2018,
  editor = {Jones, David},
  title = {A Volume of Poems},
  volume = {2},
  year = {2018},
  crossref = {white2016}
}
@Collection{white2016,
  editor = {White, Amy},
  title = {A Collection of Poems},
  volumes = {4},
  address = {Chicago},
  publisher = {University of Chicago Press},
  year = {2016-18}
}
```

1. Jane Doe, "A Poem," trans. John Smith, in *A Volume of Poems*, ed. David Jones, vol. 2 of *A Collection of Poems*, ed. Amy White (Chicago: University of Chicago Press, 2016–18), 56.

Doe, Jane. "A Poem." Translated by John Smith. In *A Volume of Poems*, edited by David Jones, 56–57. Vol. 2 of *A Collection of Poems*, edited by Amy White. Chicago: University of Chicago Press, 2016–18.

The following alternative dispenses with *crossref* but needs two editor type fields, plus two other fields that don't usually appear in bibliography databases: *bookvolume* (a cross-referenced *volume*) and *bookyear* (a cross-referenced *year*).

```
@InCollection{doe2018.alt,
  author = {Doe, Jane},
```

```
  title = {A Poem},
  translator = {Smith, John},
  pages = {56-57},
  booktitle = {A Volume of Poems},
  editor = {Jones, David},
  editortype = {booktitle},
  bookvolume = {2},
  year = {2018},
  bookbooktitle = {A Collection of Poems},
  editora = {White, Amy},
  editoratype = {bookbooktitle},
  volumes = {4},
  address = {Chicago},
  publisher = {University of Chicago Press},
  bookyear = {2016-18}
}
```

1. Jane Doe, "A Poem," trans. John Smith, in *A Volume of Poems*, ed. David Jones, vol. 2 of *A Collection of Poems*, ed. Amy White (Chicago: University of Chicago Press, 2016–18), 56.

Doe, Jane. "A Poem." Translated by John Smith. In *A Volume of Poems*, edited by David Jones, 56–57. Vol. 2 of *A Collection of Poems*, edited by Amy White. Chicago: University of Chicago Press, 2016–18.

In short, for a title's compilers, expanders, revisers, and updaters, and for any title other than *title*, you need to put the correct value of the assignment in the editor or translator type field that corresponds with the editor or translator name list (*editortype* for *editor*, *translatortype* for *translator*, and so on). Combined with Windy City's support for citing articles, chapters, books, and other works within books, this scheme allows for several sets of editors per work.

3.2 Switching Places and Roles

According to *CMOS*, if a work has an editor and a translator, their names should appear in citations in the order in which they appear on the work's title page (see *CMOS* 14.104). By default, the style lists editors first. To reverse the order, the style provides a suite of entry options that apply to the editors and translators of different titles. This means that if a work has multiple sets of editors and translators, you may swap positions of any set without affecting the others.

For simplicity, let's focus on *swaptrans*. This option swaps the editors and translators of works other than an *issuetitle*, *maintitle*, or *series*. Compare:

1. Jane Doe, *A Book's Title*, ed. John Smith, trans. Jane Doe (Chicago: University of Chicago Press, 2010).

Doe, Jane. *A Book's Title*. Edited by John Smith. Translated by Jane Doe. Chicago: University of Chicago Press, 2010.

1. Jane Doe, *A Book's Title*, trans. Jane Doe, ed. John Smith (Chicago: University of Chicago Press, 2010).

Doe, Jane. *A Book's Title*. Translated by Jane Doe. Edited by John Smith. Chicago: University of Chicago Press, 2010.

If a work has no author, but has editors, the style prints their names in the author's position. The same happens if a work has no author or editor but has translators. The following are examples from *CMOS* 14.103:

1. Jennifer Egan, ed., *The Best American Short Stories, 2014* (Boston: Houghton Mifflin Harcourt, 2014), 100.
2. Theodore Silverstein, trans., *Sir Gawain and the Green Knight* (Chicago: University of Chicago Press, 1974), 34.

Egan, Jennifer, ed. *The Best American Short Stories, 2014*. Boston: Houghton Mifflin Harcourt, 2014.
Silverstein, Theodore, trans. *Sir Gawain and the Green Knight*. Chicago: University of Chicago Press, 1974.

What if a work has no author but has editors and translators? Since Windy City gives priority to editors, it defaults to listing editors in the author's position:

1. John Smith, ed., *A Book's Title*, trans. Jane Doe (Chicago: University of Chicago Press, 2002).

Smith, John, ed. *A Book's Title*. Translated by Jane Doe. Chicago: University of Chicago Press, 2002.

Use *swaptrans* to reverse them:

1. Jane Doe, trans., *A Book's Title*, ed. John Smith (Chicago: University of Chicago Press, 2002).

Doe, Jane, trans. *A Book's Title*. Edited by John Smith. Chicago: University of Chicago Press, 2002.

Similarly, if a work's editors and translators are the same, the style prints the editors' role first, as in *edited and translated by*. Reverse them with *swaptrans*. From *CMOS* 14.104:

> 1. Rigoberta Menchú, *Crossing Borders*, trans. and ed. Ann Wright (New York: Verso, 1999).
>
> Menchú, Rigoberta. *Crossing Borders*. Translated and edited by Ann Wright. New York: Verso, 1999.

You may also swap roles by changing the value in the relevant *editortype* field (see Table 1 in section 1.1). For compilers, expanders, revisers, and updaters, you need to put a value in *editortype* anyway. You may as well pick a value that has the roles in the correct order. Either way, if you pick one that begins with *trans* (*transcomp*, *transed*, *transex*, *transrev*, or *transup*), Windy City assumes that the translator's role goes first. Using *swaptrans* would then put the editor's role first.

As often happens, cross-referencing raises some complications. The problem is that *swaptrans* applies to the editors and translators of a *title*, but cross-referenced works have more than one (a *title*, a cross-referenced *title*, and maybe even a double cross-referenced *title*). Three more entry options allow you to pick among them so as to swap whichever set of editors and translators you want. Here's a silly example to showcase all three options:

```
@InCollection{doe2017,
  author = {Doe, Jane},
  title = {An Essay},
  editor = {Smith, John},
  translator = {Smith, John},
  pages = {18-35},
  crossref = {jones2017}
}
@InBook{jones2017,
  title = {A Volume of Essays},
  editor = {Smith, John},
  translator = {Smith, John},
  volume = {1},
  crossref = {white2017}
}
@Collection{white2017,
  title = {A Collection of Essays},
  editor = {Smith, John},
  translator = {Smith, John},
  volumes = {3},
```

```
  address = {Chicago},
  publisher = {University of Chicago Press},
  year = {2017}
}
```

To swap the first set of editors and translators, use *swaptrans:title*:

1. John Smith, trans. and ed., "An Essay," in *A Volume of Essays*, ed. and trans. John Smith, vol. 1 of *A Collection of Essays*, ed. and trans. John Smith (Chicago: University of Chicago Press, 2017).

Smith, John, trans. and ed. "An Essay." In *A Volume of Essays*, edited and translated by John Smith, 18–35. Vol. 1 of *A Collection of Essays*, edited and translated by John Smith. Chicago: University of Chicago Press, 2017.

To swap the second set of editors and translators, use *swaptrans:booktitle* (or *swaptrans:book*):

1. John Smith, ed. and trans., "An Essay," in *A Volume of Essays*, trans. and ed. John Smith, vol. 1 of *A Collection of Essays*, ed. and trans. John Smith (Chicago: University of Chicago Press, 2017).

Smith, John, ed. and trans. "An Essay." In *A Volume of Essays*, translated and edited by John Smith, 18–35. Vol. 1 of *A Collection of Essays*, edited and translated by John Smith. Chicago: University of Chicago Press, 2017.

To swap the third set of editors and translators, use *swaptrans:bookbooktitle* (or *swaptrans:bookbook*):

1. John Smith, ed. and trans., "An Essay," in *A Volume of Essays*, ed. and trans. John Smith, vol. 1 of *A Collection of Essays*, trans. and ed. John Smith (Chicago: University of Chicago Press, 2017).

Smith, John, ed. and trans. "An Essay." In *A Volume of Essays*, edited and translated by John Smith, 18–35. Vol. 1 of *A Collection of Essays*, translated and edited by John Smith. Chicago: University of Chicago Press, 2017.

To swap editors and translators of an *issuetitle*, *maintitle*, or *series*, use *swaptrans:issuetitle*, *swaptrans:maintitle*, or *swaptrans:series*, respectively. The first two also have short forms: *swaptrans:issue* and *swaptrans:main*.

On rare occasions, you may want to swap positions of an author and an editor or translator. From *CMOS* 14.104:

1. T. S. Eliot, ed., *Literary Essays*, by Ezra Pound (New York: New Directions, 1953).

Eliot, T. S., ed. *Literary Essays*. By Ezra Pound. New York: New Directions, 1953.

You can get this effect with the entry option *swapauth*, which works for *book*, *bookinbook*, *collection*, *inbook*, *incollection*, *mvbook*, and *mvcollection* entry types. But beware: Windy City doesn't look ahead to see if there's really an editor or translator to take the author's place. If it doesn't find one, it still prints the author's name after the title, leaving the author's position empty. Also, if it finds both an editor and a translator, and they're not the same person, it prints the editor's name in the author's position—again, giving priority to editors. If you want the translator's name in the author's position, use *swapauth* with the appropriate *swaptrans* option.

For correct sorting in a bibliography, a work that uses *swapauth* needs a field like *sortname* to sort it by the name of the editor or translator whose name will occupy the author's position. It would be nice if Windy City could do this for you, but at present no feature of biblatex seems to allow the kind of on-the-fly changes to sorting that *swapauth* requires. Below is the entry for the previous example:

```
@Book{pound1953,
  options = {swapauth},
  author = {Pound, Ezra},
  title = {Literary Essays},
  editor = {Eliot, T. S.},
  sortname = {Eliot, T. S.},
  address = {New York},
  publisher = {New Directions},
  year = {1953}
}
```

4. Collections

Before you cite a collection or one of its volumes, you need to consider how you want the citation to look (*CMOS* gives you options) and whether the collection should count as a single work or as a composite. These issues have implications for how you structure entries in your bibliography database and how you use citation commands.

4.1 Structuring Citations

A work in a collection usually has a title and perhaps other publication information that differs from the collection's. When preparing your bibliography database, the most basic choice to make about a work in a collection is which publication information has priority, the collection's or the volume's. Consider an example from *CMOS* 14.119:

1. Tenisha Armstrong, ed., *To Save the Soul of America, January 1961–August 1962*, vol. 7 of *The Papers of Martin Luther King, Jr.*, ed. Clayborne Carson (Berkeley: University of California Press, 1992–).

Armstrong, Tenisha, ed. *To Save the Soul of America, January 1961–August 1962*. Vol. 7 of *The Papers of Martin Luther King, Jr.*, edited by Clayborne Carson. Berkeley: University of California Press, 1992–.

The editor and title of the volume precede the editor and title of the collection. In standard notes and bibliographies, *CMOS* gives you the option of reversing this order. (See especially *CMOS* 14.119, 14.121, and 14.122, and compare 14.144 and 15.41.) Windy City does as well with the entry or preamble option *swapvol*.

1. Clayborne Carson, ed., *The Papers of Martin Luther King, Jr.*, vol. 7, *To Save the Soul of America, January 1961–August 1962*, ed. Tenisha Armstrong (Berkeley: University of California Press, 2014).

Carson, Clayborne, ed. *The Papers of Martin Luther King, Jr.* Vol. 7, *To Save the Soul of America, January 1961–August 1962*, edited by Tenisha Armstrong. Berkeley: University of California Press, 2014.

In contexts where information for just one title appears (certain short citations), the one with priority determines which one identifies the work. By default, as you can see in the second note below, the volume has priority:

1. Tenisha Armstrong, ed., *To Save the Soul of America, January 1961–August 1962*, vol. 7 of *The Papers of Martin Luther King, Jr.*, ed. Clayborne Carson (Berkeley: University of California Press, 1992–).
2. Armstrong, *To Save the Soul of America*, 45.

Whereas with *swapvol*:

1. Clayborne Carson, ed., *The Papers of Martin Luther King, Jr.*, vol. 7, *To Save the Soul of America, January 1961–August 1962*, ed. Tenisha Armstrong (Berkeley: University of California Press, 2014).
2. Carson, *The Papers of Martin Luther King, Jr.*, 7:45.

Notice the volume number in the second note above, separated from the page by a colon. When the collection has priority, the volume number should appear in the citation. There are enough examples in *CMOS* to make that clear. But when the volume has priority, the volume number is at best optional but probably incorrect. (It could cause confusion, since the collection is what comes in volumes, not the volumes themselves.) In any event, Windy City prints the volume number only when the collection has priority, that is, when *swapvol* is *true*.

If you want collections to have priority in every case, use the *swapvol* preamble option, which acts globally. More likely, though, you'll want to give priority to the collection when citing some works but not others. In those cases, use the *swapvol* entry option. A good candidate for the latter is this example from *CMOS* 14.118:

> 1. *The Complete Tales of Henry James*, ed. Leon Edel, vol. 5, *1883–1884* (London: Rupert Hart-Davis, 1963).
>
> James, Henry. *The Complete Tales of Henry James*. Edited by Leon Edel. Vol. 5, *1883–1884*. London: Rupert Hart-Davis, 1963.

The volume's title (*1883–1884*) merely indicates a portion of the collection, somewhat like the volume of an encyclopedia with the title *D–F*. There's nothing wrong with putting it first. But putting it second seems more intuitive.

For other works, *swapvol* may seem like a poor choice, even if the output is formally correct:

> 1. Gordon N. Ray, ed., *An Introduction to Literature*, vol. 1, *Reading the Short Story*, by Herbert Barrows (Boston: Houghton Mifflin, 1959).
>
> Ray, Gordon N., ed. *An Introduction to Literature*. Vol. 1, *Reading the Short Story*, by Herbert Barrows. Boston: Houghton Mifflin, 1959.

Having the editor's name first and the author's name after the volume's title looks odd. But it's not wrong. The volume's author didn't write every volume of the collection. In giving priority to the collection, then, the first position, where an author's name normally goes, should go to the collection's editor, not to the volume's author. By contrast, the default output looks more familiar:

> 1. Herbert Barrows, *Reading the Short Story*, vol. 1 of *An Introduction to Literature*, ed. Gordon N. Ray (Boston: Houghton Mifflin, 1959).
>
> Barrows, Herbert. *Reading the Short Story*. Vol. 1 of *An Introduction to Literature*, edited by Gordon N. Ray. Boston: Houghton Mifflin, 1959.

One drawback of *swapvol* is that some works changed by it won't sort correctly in a bibliography without help. The affected works include those without listed authors and those in which the volume has an author but the collection as a whole doesn't—and possibly others. You can fix them by adding a *sortname* field to their bibliography database entries.

This drawback shouldn't affect *bookinbook*, *inbook*, *incollection*, or *letter* entries when they're cross-referenced to works that are changed by *swapvol*. They should have their own authors or titles that Windy City can use for proper sorting. It seems that *CMOS* gives exactly one such example in 14.120:

1. Unpublished letter to the editor of the *Afro-American* (Washington, DC), in *To Save the Soul of America, January 1961–August 1962*, ed. Tenisha Armstrong, vol. 7 of *The Papers of Martin Luther King, Jr.*, ed. Clayborne Carson (Berkeley: University of California Press, 1992–), 169–71.
2. King, Letter to the *Afro-American*, 170.

King, Martin Luther, Jr. Unpublished letter to the editor of the *Afro-American* (Washington, DC). In *To Save the Soul of America, January 1961–August 1962*, edited by Tenisha Armstrong. Vol. 7 of *The Papers of Martin Luther King, Jr.*, edited by Clayborne Carson. Berkeley: University of California Press, 1992–.

Here's the output with the preamble or entry option *swapvol*:

1. Unpublished letter to the editor of the *Afro-American* (Washington, DC), in *The Papers of Martin Luther King, Jr.*, ed. Clayborne Carson, vol. 7, *To Save the Soul of America, January 1961–August 1962*, ed. Tenisha Armstrong (Berkeley: University of California Press, 2014), 169–71.
2. King, Letter to the *Afro-American*, 170.

King, Martin Luther, Jr. Unpublished letter to the editor of the *Afro-American* (Washington, DC). In *The Papers of Martin Luther King, Jr.*, edited by Clayborne Carson. Vol. 7, *To Save the Soul of America, January 1961–August 1962*, edited by Tenisha Armstrong. Berkeley: University of California Press, 2014.

In neither case does Windy City print the volume number before the page reference. That's because, with or without *swapvol*, the citation is directly to the work's title, not to the collection. The same goes for articles, chapters, books, and other works of this type. Further, consistent with *CMOS* 14.108 and 15.42, Windy City cross-references previously cited volumes.

1. Jane Doe, "A Poem," trans. John Smith, in *A Volume of Poems*, ed. David Jones, vol. 2 of *A Collection of Poems*, ed. Amy White (Chicago: University of Chicago Press, 2016–18), 56.
2. Mary Adams, "Another Poem," in Jones, *A Volume of Poems*, 128.

2. Mary Adams, “Another Poem,” in White, *A Collection of Poems*, 128.

How does Windy City determine which entries in a bibliography database work with *swapvol*? To keep things simple, let’s focus on individual volumes of a collection, rather than works collected in them, like articles and chapters. Below are entries for an earlier example:

```
@InBook{armstrong2014,
  editor = {Armstrong, Tenisha},
  title = {To Save the Soul of America, January 1961–August
           1962},
  shorttitle = {To Save the Soul of America},
  volume = {7},
  year = {2014},
  crossref = {carson1992}
}
@Collection{carson1992,
  editor = {Carson, Clayborne},
  title = {The Papers of Martin Luther King, Jr.},
  volumes = {14},
  address = {Berkeley},
  publisher = {University of California Press},
  year = {1992–}
}
```

A *bookinbook* or *inbook* entry for a volume works with *swapvol* if it has a *title*, a *volume*, and another *title* inherited from a cross-referenced entry, and if it lacks certain fields that it shouldn’t have, such as a *maintitle* field or a *volume* field inherited from the cross-referenced entry. You can find the exact details in *windycity.bbx*. Just remember that entries like these should always be cross-referenced to a *collection* or to one of its aliases. Since Windy City treats them the same, it makes no difference whether you designate entries for volumes as *bookinbook* or *inbook*.

With one exception, you can get the same output with a *book*, *collection*, *mvbook*, or *mvcollection* entry. Here’s a counterpart to the previous example using *collection*:

```
@Collection{carson2014,
  editor = {Armstrong, Tenisha},
  title = {To Save the Soul of America, January 1961–August
```

```
          1962},
  volume = {7},
  maintitle = {The Papers of Martin Luther King, Jr.},
  editora = {Carson, Clayborne},
  editoratype = {maintitle},
  volumes = {14},
  address = {Berkeley},
  publisher = {University of California Press},
  year = {2014}
}
```

These entry types work with *swapvol* if they have *volume* and *maintitle* fields, among other conditions. You may prefer them over *bookinbook* or *inbook* entries if you only intend to cite one volume of the collection and have no need to cite the collection as a whole. You risk trouble, though, if the volumes of the collection have different publication dates, as they do for *The Papers of Martin Luther King, Jr*. If the publication information for this volume goes last, the bibliography and long citation should list the publication date as *2014*. If the publication information for the collection goes last, that date is *1992*–. A *book* or *collection* entry, however, has just one field for a publication date, so using *swapvol* on *carson2014* would print *2014*, not *1992*–. Otherwise, the entry types are interchangeable. You can find examples of both approaches in *windycity.bib*.

Certain entries cross-referenced to entries that work with *swapvol* also work with it. Those entry types are limited to *bookinbook*, *inbook*, *incollection*, or *letter*. For the letter cited above:

```
@Letter{king2014,
  author = {King, Jr., Martin Luther},
  title = {Unpublished letter to the editor of the
           \emph{Afro-American} (Washington, DC)},
  crossref = {armstrong2014}
}
```

You may cross-reference this entry to *armstrong2014* or *carson2014*. The only difference is that, with *swapvol*, cross-referencing to *carson2014* once more gives the wrong publication date for the collection. With many collections, this wouldn't be an issue. Convenience, then, is perhaps the only consideration in choosing how you do it. If you plan to cite more than one volume of a collection, and different works in those volumes or the collection as a whole, cross-referencing to *bookinbook* or *inbook* entries is probably simpler. The other way is simpler if you plan to cite just one work in one volume.

As mentioned in *CMOS* 15.41, reference lists should give priority to the volume, not to the collection. Nevertheless, Windy City doesn't prevent you from using *swapvol* with *reflist*. (If you do use them together, it's best to choose the *swapvol* entry option, which does a better job at formatting and sorting works in reference lists than the *swapvol* preamble option.) Either way, remember that when a volume and a collection have different publication dates, a reference list entry prints both dates, which in turn requires you to use the *bookinbook* or *inbook* approach.

Armstrong, Tenisha, ed. 2014. *To Save the Soul of America, January 1961–August 1962*. Vol. 7 of *The Papers of Martin Luther King, Jr.*, edited by Clayborne Carson. Berkeley: University of California Press, 1992–.

A final issue concerns whether you want long citations to give a work's total number of volumes. Whereas entries in a bibliography almost always give that number (the exceptions are those that work with *swapvol*), doing so in notes is optional (per *CMOS* 14.118).

Here's what Windy City does: Apart from entries that work with *swapvol*, it prints the *volumes* field in long citations only if the *postnote* field is empty. That's not a requirement of *CMOS*. But there are several reasons for preferring this approach. If the *postnote* is empty, printing the total preserves the correspondence between the long citation and its entry in the bibliography. This prevents the appearance that something has gone wrong when an element in one is missing from the other. If the *postnote* isn't empty, it likely contains information that, as with page references, should also include a volume number (see section 4.2). Including a volume number makes it less important, arguably, to include the total number of volumes. The main benefit, anyway, is that Windy City's approach is consistent with citations of *The Lisle Letters* in *CMOS* 14.117 and 14.118. No simpler rule would be.

Confused? All you need to know is that, barring exceptions for *swapvol*, if you want to print a work's total number of volumes without regard to the *postnote*, use the entry option *listvols*. Windy City uses it to match some examples in *CMOS*, such as in 14.59:

1. Nathaniel B. Shurtleff, ed., *Records of the Governor and Company of the Massachusetts Bay in New England (1628–86)*, 5 vols. (Boston, 1853–54), 1:126 (hereafter cited as *Mass. Records*).

4.2 Collections as Single Works

Although its discussion is a bit obscure, *CMOS* treats some multivolume collections as single works—but only, it seems, if every volume of the collection has the same title and publication date. To illustrate the distinction between a collection that

counts as a single work and one that doesn't, *CMOS* gives the following examples in 14.118:

1. Muriel St. Clare Byrne, ed., *The Lisle Letters* (Chicago: University of Chicago Press, 1981), 4:243.
2. *The Complete Tales of Henry James*, ed. Leon Edel, vol. 5, *1883–1884* (London: Rupert Hart-Davis, 1963), 32–33.
3. Byrne, *Lisle Letters*, 4:245.
4. *Complete Tales of Henry James*, 5:34.

In citations of *The Lisle Letters*, volume numbers and pages are separated by a colon. With *The Complete Tales of Henry James*, only the second citation follows this pattern. In the first, the volume number appears earlier, after the editor's name. Why? Apparently, *The Lisle Letters* is a single, multivolume work because every volume has the same title and publication date. Not so *The Complete Tales of Henry James*. Its volumes have different titles and publication dates.

To get the right output, your bibliography database and citations need to reflect this distinction. Think of it this way: If a multivolume collection meets the criteria of a single work (all volumes have the same title and publication date), your bibliography database should have just one entry to which all citations of the collection refer, regardless of whether they cite particular volumes or the collection as a whole. Here's the entry for *The Lisle Letters*:

```
@Collection{byrne1981,
  editor = {Byrne, Muriel St. Clare},
  title = {The Lisle Letters},
  volumes = {6},
  address = {Chicago},
  publisher = {University of Chicago Press},
  year = {1981}
}
```

To cite a particular volume of the collection, include the volume number in the citation's *postnote*. For citations of pages, remember the format from *CMOS* 14.118: Volume numbers and pages are separated with a colon. Here's the source for the first citation of *The Lisle Letters*:

```
\cite[4:243]{byrne1981}
```

To cite a volume by itself, without a page reference, or to cite chapters, sections, and other parts of the work, remember to use the appropriate abbreviations (for some examples, see *CMOS* 14.120, 15.23, and 15.41):

```
\cite[vol. 3, chap. 9]{byrne1981}
```

What if the *postnote* is empty? Windy City assumes that you mean to cite the collection as a whole. As such, the first, long citation of the work prints the collection's total number of volumes. Subsequent entries indicate the collection in whatever short form corresponds to the preamble options. The following shows the default output for two such citations of the collection:

1. Muriel St. Clare Byrne, ed., *The Lisle Letters*, 6 vols. (Chicago: University of Chicago Press, 1981).
2. Byrne, *Lisle Letters*.

For collections like *The Complete Tales of Henry James*, which don't count as single works, every volume needs to have its own entry in the bibliography database. Here's the entry for the volume cited in *CMOS* 14.118:

```
@Collection{james1963.5,
  options = {swapvol},
  author = {James, Henry},
  title = {1883-1884},
  volume = {5},
  maintitle = {The Complete Tales of Henry James},
  shortmaintitle = {Complete Tales of Henry James},
  editor = {Edel, Leon},
  editortype = {maintitle},
  volumes = {12},
  address = {London},
  publisher = {Rupert Hart-Davis},
  year = {1963}
}
```

Since the volume number is part of the entry and needs to print in different places depending on the context, don't include it in the *postnote*. Let Windy City handle it. Below is the source for the first and second citations of *The Complete Tales of Henry James*:

```
\item \cite*[32--33]{james1963.5}
  ...
\item \cite*[34]{james1963.5}
```

The first citation prints the volume number after the editor's name, long before the *postnote*. The second prints it just before the *postnote*, separated from the page by a colon:

2. *The Complete Tales of Henry James*, ed. Leon Edel, vol. 5, *1883–1884* (London: Rupert Hart-Davis, 1963), 32–33.

…

4. *Complete Tales of Henry James*, 5:34.

Neither type of collection uses cross-referencing in the bibliography database. For *The Lisle Letters*, cross-referencing would introduce needless complexity. A single work should have a single entry, not multiple, cross-referenced entries. For *The Complete Tales of Henry James*, cross-referencing would result in errors because, with different titles and publication dates, not all publication data for the collection is true of each volume. To cite the collection as a whole, as in *CMOS* 14.117, add a separate entry:

```
@Collection{james1962,
  author = {James, Henry},
  title = {The Complete Tales of Henry James},
  shorttitle = {Complete Tales of Henry James},
  editor = {Edel, Leon},
  volumes = {12},
  address = {London},
  publisher = {Rupert Hart-Davis},
  year = {1962-64}
}
```

4.3 Works *in* Volumes or *as* Volumes

Many examples so far show the use of the *volume* field. What they don't quite show is that, as with editors and translators, Windy City associates *volume* with an entry's lowest level title. Usually, this doesn't require any thought when preparing a bibliography database. The *volume* field goes where you'd expect it to. But if you're not careful, you could end up with errors, especially when citing books in collections.

```
@InBook{spinoza1900.1.1,
  title = {A Theological-Political Treatise},
  crossref = {spinoza1900.1}
}
@Collection{spinoza1900.1,
  author = {Spinoza, Benedict de},
  title = {The Chief Works of Benedict de Spinoza},
  edition = {revised},
  translator = {Elwes, R. H. M.},
  volume = {1},
  address = {London},
```

```
    publisher = {George Bell {and} Sons},
    year = {1900}
}
```

In the entries above, Windy City associates *volume* with *The Chief Works of Benedict de Spinoza*, not with *A Theological-Political Treatise*. The latter, it assumes, isn't volume one of the collection but a work contained *in* volume one, presumably with other works. Windy City formats the citation accordingly:

> 1. Benedict de Spinoza, *A Theological-Political Treatise*, in *The Chief Works of Benedict de Spinoza*, rev. ed., trans. R. H. M. Elwes, vol. 1 (London: George Bell and Sons, 1900).
>
> Spinoza, Benedict de. *A Theological-Political Treatise*. In *The Chief Works of Benedict de Spinoza*, rev. ed., translated by R. H. M. Elwes. Vol. 1. London: George Bell and Sons, 1900.

If *volume* were within the scope of *spinoza1900.1.1*, Windy City would assume that *A Theological-Political Treatise* is volume one of *The Chief Works of Benedict de Spinoza*. The same error would occur if you put all the data for the citation into a *collection* entry. Windy City would associate *volume* with *title*, not with *maintitle*. The upshot is that correctly citing a work like this requires cross-referencing an *inbook* or *bookinbook* entry to a *collection*, *book*, *mvbook*, or *mvcollection* entry. (Again, the alternatives give the same output.) Only then would Windy City associate *volume* with the right *title*.

> Only when we gather the work of several scholars—Walter Sutton's explications of some of Whitman's shorter poems; Paul Fussell's careful study of structure in "Cradle"; S. K. Coffman's close readings of "Crossing Brooklyn Ferry" and "Passage to India"; and the attempts of Thomas I. Rountree and John Lovell, dealing with "Song of Myself" and "Passage to India," respectively, to elucidate the strategy in "indirection"—do we begin to get a sense of both the extent and the specificity of Whitman's forms.[1]

14.115 Microform editions

Farwell's citation fails to match *CMOS* because the *howpublished* field, which seems like the best choice to contain *microfiche*, follows the *postnote* field, which contains *p. 67, 3C12*. This order is necessary elsewhere, such as in *CMOS* 14.163.

14.120 Chapters and other parts of individual volumes

There are some peculiarities with the first example. In the printed edition, but not online, *CMOS* errs in having *.ed* rather than *edited by* in the bibliography and neglects to invert the author's name. More worrisome are the striking differences between the note and bibliography. They may represent alternative ways of formatting the data, as other examples do. But the note seems inconsistent with *CMOS* 14.118, and so doesn't make much sense as an alternative. Windy City ignores it and in both cases follows the example of the bibliography.

1. Chen Jian, "China and the Cold War after Mao," in *Endings*, ed. Melvyn P. Leffler and Odd Arne Westad, vol. 3 of *The Cambridge History of the Cold War* (Cambridge: Cambridge University Press, 2010), 180.

14.124 Series or multivolume work?

In the second example, *vol. 6* refers to the book's series, Readings in Western Civilization. Usually, the number of a series isn't recorded as a volume, so Windy City doesn't use the *volume* field for them. Instead, it uses the *number* field, which it prints with no preceding abbreviation. Add one to the field as necessary. The *number* field for the second example below contains *vol. 6.*

1. John W. Boyer and Julius Kirshner, eds., *Readings in Western Civilization*, 9 vols. (Chicago: University of Chicago Press, 1986–87).

2. Eric W. Cochrane, Charles K. Gray, and Mark Kishlansky, *Early Modern Europe: Crisis of Authority*, Readings in Western Civilization, ed. John W. Boyer and Julius Kirshner, vol. 6 (Chicago: University of Chicago Press, 1987).

The first and third notes below present a challenge: If a bibliography database entry contains an address for a work, such as a DOI, Windy City prints it in the work's first, long citation. Such is the case with the second note below. To cite an address for just part of a work, but print one for the whole work in the bibliography, you need to override the style's default behavior. The first and third notes do this with a command that temporarily clears the work's DOI from its bibliography database entry. Here's an example from the source:

```
\AtNextCitekey{\clearfield{doi}}
\item \cite[chap. 3, \url{https://doi.org/10.1093/acprof:oso/

5.6 Periodicals

14.171 Journal volume, issue, and date

The note for Harper includes the month of publication. Windy City includes it in the bibliography as well, even though *CMOS* omits it. As for Lock's entry, *CMOS* clearly errs in printing the surname twice. Also, for Wilder's article, Windy City prints *nos.* before *1/2*, not *no.*, as *CMOS* has it. To print the correct season, Wilder's entry in the bibliography database includes *Fall* in the *issue* field. Using the *date* field with *2013-23* would print *Autumn 2013*.

5.10 Special Types of References

14.232 Reference works consulted in physical formats

Some reference works show full publication information in the same way as books. Use the *book* entry type for them. The first three citations below are different. They need the *reference* or *inreference* entry type. See section 2.7 for more information. Following the suggestion in *CMOS* 14.232, *reference* and *inreference* works don't appear in bibliographies.

14.233 Reference works consulted online

Like some of the reference works in the previous section, the ones below need the *reference* or *inreference* entry type. As odd as it may seem, but consistent with *CMOS*, they, too, aren't included in bibliographies. See section 2.7 for more information.

6. Examples from *CMOS* Chap. 15, "Author-Date References"

Examples in this section reproduce those in *CMOS* chapter 15. To help with cross-checking, subsection numbers and headings are from *CMOS*. Since parenthetical citations are relatively simple, and since the format of references lists is derivative of the default, the examples below are more selective than those in the previous section.

6.1 Basic Format, with Examples and Variations

15.24 Additional material in text citations

(Mandolan 2017; t-tests are used here)

15.25 Text citations in relation to surrounding text and punctuation

> Fiorina et al. (2005) and Fischer and Hout (2006) reach more or less the same conclusions. In contrast, Abramowitz and Saunders (2005) suggest that the mass public is deeply divided between red states and blue states and between churchgoers and secular voters.

15.27 Several references to the same source

Complexion figures prominently in Morgan's descriptions. When Jasper compliments his mother's choice of car (a twelve-cylinder Mediterranean roadster with leather and wood-grained interior), "his cheeks blotch indignantly, painted by jealousy and rage" (Chaston 2000, 47). On the other hand, his mother's mask never changes, her "even-tanned good looks" (56), "burnished visage" (101), and "air-brushed confidence" (211) providing the foil to the drama in her midst.

15.29 Text citations of works with more than three authors

15.44 No date of publication in author-date references

(Nano [1750?]), (Nano, n.d.)

Nano, Jasmine L. [1750?]. *Title of Work…*

———. n.d. *Title of Another Work…*

15.45 "Forthcoming" in author-date references

(Faraday, forthcoming)

Faraday, Carry. Forthcoming. "Protean Photography." In *Seven Trips beyond the Asteroid Belt*, edited by James Oring. Cape Canaveral, FL: Launch Press.

15.47 Parentheses or comma with issue number

In the second reference list entry below, Windy City prints a colon after the journal number. *CMOS* prints a comma there—likely an error.

(Glass and Levchak 2014), (Meyerovitch 1959)

Glass, Jennifer, and Philip Levchak. 2014. "Red States, Blue States, and Divorce: Understanding the Impact of Conservative Protestantism on Regional Variation in Divorce Rates." *American Journal of Sociology* 119 (4): 1002–46. https://doi.org/10.1086/674703.

Meyerovitch, Eva. 1959. "The Gnostic Manuscripts of Upper Egypt." *Diogenes*, no. 25: 84–117.

15.48 Colon with volume number

The example below shows the output when an article's publication month isn't included in the bibliography database and so doesn't come between a volume number and a page reference.

(Gunderson and Leal 2015)

15.49 Newspapers and magazines in reference lists

(*New York Times* 2002)

New York Times. 2002. "In Texas, Ad Heats Up Race for Governor." July 30, 2002.

15.51 Citing blogs in author-date format

CMOS seems mistaken in printing a period after *Chronicle of Higher Education* instead of a comma. Compare with 14.208 and 15.42.

(Germano 2017)
